
Contents

Part I Introduction

1	Computational Probability	3
1.1	Four Simple Examples of the Use of APPL	3
1.2	A Different Way of Thinking	8
1.3	Overview	11
2	Maple for APPL	13
2.1	Numerical Computations	13
2.2	Variables	15
2.3	Symbolic Computations	16
2.4	Functions	17
2.5	Data Types	19
2.6	Solving Equations	20
2.7	Graphing	22
2.8	Calculus	23
2.9	Loops and Conditions	26
2.10	Procedures	28

Part II Algorithms for Continuous Random Variables

3	Data Structures and Simple Algorithms	33
3.1	Data Structures	33
3.2	Simple Algorithms	37
4	Transformations of Random Variables	47
4.1	Theorem	48
4.2	Implementation in APPL	50
4.3	Examples	52

5	Bivariate Transformations of Random Variables	57
5.1	Algorithm	58
5.2	Data Structure	59
5.3	Implementation	60
5.4	Examples	62
6	Products of Random Variables	73
6.1	Theorem	74
6.2	Implementation in APPL	76
6.3	Examples	79
6.4	Extensions	82
6.5	Algorithm	84

Part III Algorithms for Discrete Random Variables

7	Data Structures and Simple Algorithms	89
7.1	Data Structures	89
7.2	Simple Algorithms	99
8	Sums of Independent Discrete Random Variables	111
8.1	Preliminary Examples	111
8.2	Conceptual Algorithm Development	116
8.3	Algorithm	126
8.4	Implementation Issues	128
8.5	Examples	130
9	Order Statistics for Random Sampling from Discrete Populations	139
9.1	Notation and Taxonomy	139
9.2	Sampling Without Replacement	141
9.3	Sampling with Replacement	145
9.4	Extension	150

Part IV Applications

10	Reliability and Survival Analysis	155
10.1	Systems Analysis	155
10.2	Lower Confidence Bound on System Reliability	161
10.3	Survival Analysis	164
10.4	Applying Bootstrap Methods to System Reliability	172

11 Symbolic ARMA Model Analysis	191
11.1 ARMA Model Basics	192
11.2 Implementation	193
11.3 Examples	197
12 Stochastic Simulation	209
12.1 Tests of Randomness	209
12.2 Input Modeling	215
12.3 Kolmogorov–Smirnov Goodness-of-Fit Test	223
13 Transient Queueing Analysis	241
13.1 Introduction	241
13.2 Basics of the $M/M/s$ Queue	243
13.3 Creating the Sojourn Time Distribution	244
13.4 Transient Analysis Applications	247
13.5 Covariance and Correlation in the $M/M/1$ Queue	253
13.6 Extending Covariance Calculations	260
13.7 Sojourn Time Covariance with k Customers Initially Present ..	269
14 Bayesian Applications	277
14.1 Introduction	277
14.2 Bayesian Inference on Single-Parameter Distributions	279
14.3 Bayesian Inference on Multiple-Parameter Distributions	287
15 Other Applications	301
15.1 Stochastic Activity Networks	301
15.2 Benford’s Law	310
15.3 Miscellaneous Applications	315
References	323
Index	329

Computational Probability

Algorithms and Applications in the Mathematical
Sciences

Drew, J.H.; Evans, D.L.; Glen, A.G.; Leemis, L.M.

2017, XI, 336 p. 85 illus., 25 illus. in color., Hardcover

ISBN: 978-3-319-43321-9
