1	System Design and the Design Process	1
1.1	Section 1. The SIMILAR Process	1
1.1.1	State the Problem	1
1.1.2	Investigate Alternative Designs	2
1.1.3	Model the System	3
1.1.4	Integrate	3
1.1.5	Launch the System	4
1.1.6	Assess Performance	4
1.1.7	Re-evaluate	4
1.1.8	Ancillary Materials	4
1.1.9	Homework	5
1.2	Section 2. Abstraction	9
1.2.1	Homework	11
1.3	Section 3. The Design Process	15
1.3.1	Design of a Chocolate Chip Cookie Acquisition System	15
1.3.2	Section Summary	28
1.3.3	Homework	30
1.4	Section 4. Systems Engineering Design Documents	32
1.4.1	Example: Disposing of Financial Records	34
1.4.2	Homework	40
1.5	Section 5. Fundamental Principles of Good Design	41
1.5.1	Design for Reuse	51
1.5.2	Section Summary	52
1.5.3	Homework	54
1.6	Section 6. Principles of Function Design	58
1.6.1	Allocate Each Function to Only One Component	58
1.6.2	Assure Functional Independence	59
1.6.3	Homework	60

1.7	Section 7. Generic Tactical Missile	61
1.7.1	Homework Problems	66
1.8	Section 8. Model-Based System Engineering	67
1.8.1	State-Based Modeling	69
1.8.2	Finesse Point	70
1.8.3	Activity Diagram Modeling	71
1.8.4	Homework	74
1.9	Section 9. Automobile Seatbelt System	77
1.9.1	Summary	83
1.9.2	Homework	84
1.10	Section 10. Parking Garage, First Iteration	88
1.10.1	First Iteration Design Solution	90
1.10.2	Homework	94
1.11	Section 11. Parking Garage, Second Iteration	98
1.11.1	Summary of the Diagrams	99
1.11.2	Second Iteration Design Solution	99
1.11.3	<i>Mapping Between Models</i>	113
1.11.4	Homework	113
1.12	Section 12. Parking Garage, Third Iteration	117
1.12.1	Analysis Model for the Parking Garage	117
1.12.2	Parking Garage Test Procedure	121
1.12.3	Homework	131
1.13	Section 13. Parking Garage, Fourth Iteration	131
1.13.1	Fourth Iteration Design Solution	132
1.13.2	Homework	132
1.14	Section 14. Parking Garage, Fifth Iteration	133
1.14.1	Fifth Iteration Design Solution	133
1.14.2	Homework	144
1.15	Section 15. When Is a State Machine Necessary?	145
1.15.1	What Type of Systems Have States and What Type of Models Need States?	147
1.15.2	Homework	148
1.16	Summary	150
	References	154
2	Decisions and Mistakes	159
2.1	Section 16. Human Foibles	159
2.1.1	Homework	165
2.2	Section 17. Prospect Theory	167
2.2.1	Subjective Utility	169
2.2.2	Subjective Probability	172
2.2.3	Subjective Expected Utility	174
2.2.4	Implications	175
2.2.5	What Is Risk?	176
2.2.6	Confirmation Bias	177

2.2.7	Severity Amplifiers	179
2.2.8	Framing	180
2.2.9	Framing Is the Overarching Process	181
2.2.10	Section Summary	182
2.2.11	Homework Problems	183
2.3	Section 18. Potential Mental Mistakes in Trade-off Studies	186
2.3.1	Prospect Theory	187
2.3.2	Problem Statement Mistakes	189
2.3.3	Evaluation Criteria Mistakes	192
2.3.4	Mistakes in Importance Weights	193
2.3.5	Alternative Solution Mistakes	195
2.3.6	Evaluation Data Mistakes	199
2.3.7	Scoring Function Mistakes	202
2.3.8	Output Score Mistakes	205
2.3.9	Combining Function Mistakes	206
2.3.10	Preferred Alternative Mistakes	207
2.3.11	Sensitivity Analysis Mistakes	208
2.3.12	Section Summary	210
2.3.13	Homework	210
2.3.14	Summary of Section 18	212
2.4	Section 19. Heuristics: Cost-Effective Shortcuts to Desired Outcomes	213
2.4.1	Homework for Section 19	221
2.5	Summary	222
	References	225
3	Common Methods and Processes	229
3.1	Section 20. Evaluation Criteria	229
3.1.1	The Problem Statement	229
3.1.2	Concept Exploration	230
3.1.3	Validation	230
3.1.4	Designing Evaluation Criteria	231
3.1.5	Weights of Importance	240
3.1.6	Homework	244
3.2	Section 21. Scoring Functions	246
3.2.1	Linear Normalization	247
3.2.2	Wymore's Scoring Functions	249
3.2.3	Homework	257
3.3	Section 22. Combining Functions	258
3.3.1	Common Combining Functions	259
3.3.2	Mathematical Summary	266
3.3.3	Section Summary	287
3.3.4	Homework	288

3.4	Section 23. Quantitative Assessments	290
3.4.1	Measures	290
3.4.2	Technical Performance Measures	291
3.4.3	Homework	297
3.5	Section 24. Prioritization	298
3.5.1	Why Is Prioritization Important?	298
3.5.2	Criteria Used for Prioritization	300
3.5.3	Combining Information	302
3.5.4	Section Summary	304
3.5.5	Homework	305
3.6	Section 25. Analyzing the Data	306
3.6.1	Frequency Versus Probability	306
3.6.2	Shape of the Data	308
3.6.3	Do Nothing Alternative	314
3.6.4	Verification and Validation	315
3.6.5	Testing	315
3.6.6	Anomalous Data	320
3.6.7	Homework	320
3.7	Section 26. Sensitivity Analysis	327
3.7.1	Simple Definitions	327
3.7.2	Introduction	328
3.7.3	Motivation	328
3.7.4	Analytic Sensitivity Functions	330
3.7.5	Empirical Sensitivity Functions	341
3.7.6	The Taguchi Sensitivity Technique	346
3.7.7	The <i>What-If</i> Sensitivity Technique	354
3.7.8	Discussion	354
3.7.9	Section Summary	357
3.7.10	Homework Problems	357
3.8	Summary	367
	References	369
4	Discovering System Requirements	373
4.1	Section 27. What Are Requirements?	373
4.1.1	State the Problem	374
4.1.2	Example Requirement	378
4.1.3	Characteristics of a Good Requirement	379
4.1.4	Characterization of Requirements	386
4.1.5	Attributes of Requirements	401
4.1.6	A Requirement Template	402
4.1.7	Example Requirements	402
4.1.8	Homework	404
4.2	Section 28. Requirements Development and Management	408
4.2.1	Requirements Process	409

4.2.2	Fitting the Requirements Process into the Systems Engineering Process	422
4.2.3	Related Items	425
4.2.4	Requirements Volatility	428
4.2.5	Inspections	431
4.2.6	Heuristic Example of Requirements	431
4.2.7	Sensitivity Analysis	433
4.2.8	Homework	433
4.3	Section 29. Hybrid Process for Capturing Requirements	436
4.3.1	Hybrid Process	436
4.3.2	Homework	449
4.4	Summary	452
	References	455
5	Trade-off Studies	459
5.1	Section 30. Decision Analysis and Potential Mistakes	459
5.1.1	History	459
5.1.2	Decision Analysis and Resolution	460
5.1.3	Potential Mental Mistakes in Trade-off Studies	472
5.1.4	Homework Problems	479
5.2	Section 31. Mental Mistakes Actually Made in Trade-off Studies	491
5.2.1	Research Methodology	491
5.2.2	Examples of Mental Mistakes in Trade-off Studies	492
5.2.3	Homework Problems	517
5.3	Section 32. BIMS, an Example Trade-off Study	519
5.3.1	BIMS Problem Statement	519
5.3.2	System Design	521
5.3.3	Evaluation Criteria	534
5.3.4	Preferred Alternatives	541
5.3.5	Risk Analysis	550
5.3.6	Section Summary	554
5.3.7	Homework Problems	555
5.4	Section 33. Trade-off Study of a Ship-to-Air Missile	559
5.4.1	Problem Situation	559
5.4.2	History of the Problem	559
5.4.3	The Customer	559
5.4.4	Use Case Models	560
5.4.5	Concept Exploration	564
5.4.6	Launch Platform Trade-off Study	569
5.4.7	Homework Problems	579
5.5	Summary	592
	References	593

6	Risk Analysis and Management	597
6.1	Section 34. Risk Analysis	597
6.1.1	History of Risk Analysis	597
6.1.2	Risks in a Pinewood Derby	599
6.1.3	Project Risk Management	608
6.2	Discussion	611
6.2.1	A Risk Template	614
6.2.2	Examples Using the Cookie Acquisition System	616
6.2.3	Homework	617
6.3	Section 35. Incorporating Solar Power into an Electric Grid	620
6.3.1	Introduction	620
6.3.2	Definition of Risk	620
6.3.3	The Risk Control Process	625
6.3.4	System Characterization	627
6.3.5	Risk Severities	629
6.3.6	An Algorithm for Computing Severity	630
6.3.7	Section Summary	631
6.3.8	Homework Problems	631
6.4	Section 36. Risk Analysis of a Power Grid with PV Solar Panels	635
6.4.1	Description of Identified Risks	636
6.4.2	Normalization of Frequency and Severity	648
6.4.3	Other Risks	651
6.4.4	Sensitivity Analyses	654
6.4.5	Risk Management	659
6.4.6	Unintended Consequences	662
6.4.7	Unlikely Failures	663
6.4.8	Homework Problems	664
6.5	Summary	666
	References	670
7	Comparing Four Processes	673
7.1	Section 37. Requirements, DAR, Trade-offs, and Risk	673
7.1.1	The Requirements Discovery Process	673
7.1.2	The DAR Process	674
7.1.3	The Trade-off Study Process	675
7.1.4	The Risk Analysis Process	675
7.1.5	Comparison of Requirements, DAR, Trade-off, and Risk Processes	677
7.1.6	A Requirement	680
7.1.7	An Evaluation Criterion	680
7.1.8	A Risk	682
7.1.9	Comparison of the Requirement, Evaluation Criterion, and Risk	682

7.2	Section 38. The SIMILAR Process	684
7.2.1	State the Problem	685
7.2.2	Investigate Alternatives	685
7.2.3	Model the System	686
7.2.4	Integrate	686
7.2.5	Launch the System	687
7.2.6	Assess Performance	687
7.2.7	Re-evaluate	687
7.3	Section 39. The Overarching Process	688
7.4	Section 40. Denouement	688
7.5	Section 41. Homework	691
7.5.1	Human Behavior	691
7.5.2	What Have You Learned?	691
7.5.3	Suggestions for Improvement	691
	Index	693
