

Contents

1	Mathematical Aspects of Using Neural Approaches for Information Retrieval	1
1.1	Information Retrieval Models	3
1.2	Mathematical Background	7
1.2.1	Discrete Cosine Transformation	7
1.2.2	Algorithm for Image Compression Using Discrete Cosine Transformation	8
1.2.3	Multilayer Nonlinear Perceptron	12
1.2.4	Fuzzy Neural Perceptron	15
1.3	A New Approach of a Possibility Function Based Neural Network	17
1.4	Architecture of the PFBNN	18
1.5	Training Algorithm of the PBFNN	20
1.6	Neural Networks-Based IR	26
1.6.1	Keyword Recognition Approach Based on the Fuzzy Multilayer Perceptron	28
1.6.2	Text Document Retrieval Approach on the Base of a Spreading Activation Neural Network	31
	References	34
2	A Fuzzy Kwan–Cai Neural Network for Determining Image Similarity and for the Face Recognition	37
2.1	Introduction	37
2.2	Related Work	40
2.3	Background	41
2.3.1	Measure of the Class Similarities	41
2.3.2	Similarity-Based Classification	42
2.3.3	Using Kohonen Algorithm in Vector Quantization	46

2.3.4	Fourier Descriptors	47
2.3.5	Fuzzy Neurons	51
2.4	Fuzzy Kwan–Cai Neural Network	53
2.4.1	Architecture of FKCNN	54
2.4.2	Training Algorithm of FKCNN	57
2.4.3	Analysis of FKCNN	58
2.5	Experimental Evaluation	59
2.5.1	Data Sets	59
2.5.2	Evaluation Criteria	60
2.5.3	Experimental Results	62
2.6	Face Recognition	66
2.6.1	Applying the Fuzzy Kwan–Cai Neural Network for Face Recognition	69
2.6.2	Applying Kohonen Maps for Feature Selection	75
	References	77
3	Predicting Human Personality from Social Media Using a Fuzzy Neural Network	81
3.1	Classifying Personality Traits	81
3.2	Related Work	84
3.2.1	Personality and Word Use	84
3.2.2	Neural Methods	84
3.3	A Neural Network for Predicting Personality	85
3.3.1	Regression Using Neural Networks	86
3.3.2	Fuzzy Gaussian Neural Network	88
3.3.3	Architecture	89
3.3.4	Basic Equations	91
3.3.5	On-Line Weight Initialization	93
3.3.6	Training Algorithm	94
3.4	Experimental Evaluation	98
3.4.1	Task, Data Set, Data Processing and Evaluation Details	98
3.4.2	Baselines	100
3.4.3	Experimental Setup	101
3.4.4	Experimental Results and Analysis	102
	References	104
4	Modern Neural Methods for Function Approximation	107
4.1	Mathematical Background	107
4.1.1	Discrete Fourier Transform	108
4.1.2	Numerical Methods for Function Approximation	110
4.2	Fourier Series Neural Network (FSNN)	111
4.3	A New Neural Network for Function Approximation	114
4.4	Experimental Evaluation	117
