Contents

Part I Modelling of Transport Systems and Travelling Behaviour

Development of Various Scenarios of ITS Systems for Urban Area 3
Grzegorz Karoń and Ryszard Janecki

The Influence of Countdown Timers on the Traffic Safety of Pedestrians and Vehicles at the Signalized Intersection 13
Aleksander Sobota, Marcin Jacek Klos and Grzegorz Karoń

Air Transport Service in Academic Research at Polish Airports 23
Dariusz Tłoczyński

Underage Pedestrian Road Users in Terms of Road Accidents 33
Piotr Czech

Part II Smart Cities and Green Travelling

Regression Based Emission Models for Vehicle Contribution to Climate Change 47
Ander Pijoan, Iraia Oribe-Garcia, Oihane Kamara-Esteban, Konstantinos N. Genikomsakis, Cruz E. Borges and Ainhoa Alonso-Vicario

The Effect of University Campuses on the Modal Split of Polish Cities 65
Romanika Okraszewska, Aleksandra Romanowska and Kazimierz Jamroz

Distance and Frequency of Travels Made with Selected Means of Transport—A Case Study for the Upper Silesian Conurbation (Poland) 75
Grzegorz Sierpiński

Pedestrian Route Search Based on OpenStreetMap 87
Sebastian Naumann and Mikhail Y. Kovalyov

Part III Modern Transport and Logistics in Urban Areas

Road Pavement Condition as a Determinant of Travelling Comfort 99
Marcin Staniek

Risks Arising from Introducing Bicycle Traffic onto Designated Bus Lanes 109
Marek Bauer

Support for Green Logistics Using the GTAlg Tool 121
Ireneusz Celiński

Application of the Genetic Algorithm for Optimization of the Public Transportation Lines 135
Aleksander Król

Part IV New Solutions for Transport Systems in the World

Analysis of Significance of Differences Between Psychotechnical Parameters for Drivers at the Entries to One-Lane and Turbo Roundabouts in Poland 149
Elżbieta Macioszek

Towards an Optimal Multimodal Travel Planner—Lessons from the European Experience 163
Przemyslaw Borkowski

A Hybrid Planning Method for Charging Infrastructure for Electrically Driven Buses in Public Transportation 175
Hubert Büchter and Sebastian Naumann

Location of Electric Buses Recharging Stations Using Point Method Procedure 187
Krzysztof Krawiec

Testing Station-Related Railway Control Systems—Functional and Failure-Response Tests 195
Szymon Surma and Marcin Gołębiewski
