

Contents

1	A Short Journey to the Realm of Corrosion	1
1.1	Introduction	1
1.2	Definition of Corrosion	1
1.3	Electrochemical Corrosion: A Brief Introduction	2
1.3.1	When Corrosion Happens?	4
1.3.2	Corrosion Forecast	5
1.4	Summary and Conclusions	8
	References	8
	Further Reading	8
2	Technical Mitigation of Corrosion: Corrosion Management	9
2.1	Introduction	9
2.2	Corrosion Management: A Technical Approach	9
2.2.1	The Rational of Using Coatings and Linings	10
2.2.2	The Rational of Anodic and Cathodic Protection	10
2.2.3	Use of Inhibitors	12
2.2.4	Material Selection and Design Improvement	14
2.3	Summary and Conclusions	15
	References	15
3	Nontechnical Mitigation of Corrosion: Corrosion Knowledge Management	17
3.1	Introduction	17
3.2	Corrosion (Knowledge) Management: A Managerial Approach	18
3.2.1	Importance of Defining “Resources” and “Targets”	18
3.2.2	Why Should We Care About Corrosion?	20
3.3	Components of Corrosion Knowledge Management as a Managerial Tool	23
3.4	Conclusion and Summary	27
	Selected References	28

4	Microbiologically Influenced Corrosion (MIC)	29
4.1	Introduction	29
4.2	Definition of MIC	30
4.3	Importance of MIC	32
4.4	Historical Profile of Advances in Understanding MIC	33
4.5	Categorising Bacteria	36
4.6	Biofilm Formation and Its Stages	39
4.7	How Biofilms Demonstrate Their Effects on Corrosion	45
4.7.1	Enhancing Corrosion	46
4.7.2	Corrosion Deceleration Effect of Biofilms	48
4.8	The Bacteria Involved in MIC	52
4.8.1	Sulphate-Reducing Bacteria (SRB)	53
4.8.2	Iron-Reducing Bacteria	63
4.8.3	Magnetic Bacteria	71
4.8.4	Clostridia	73
4.9	Summary and Conclusions	77
	Selected References	79
	Further Reading	79
5	How Does a System Become Vulnerable to MIC?	81
5.1	Introduction	81
5.2	General Points Regarding Vulnerability of Industrial Systems	81
5.3	Important System/Working Conditions Leading into MIC	83
5.3.1	Physico-Mechanical Factors and Their Effects on MIC	84
5.3.2	Chemical Factors	86
5.4	Summary and Conclusions	96
	Selected References	96
6	How MIC Is Detected and Recognised?	99
6.1	Introduction	99
6.2	Investigating Vulnerable Systems and Components	101
6.3	Pit Morphology	102
6.4	Mineralogical Finger Prints	103
6.5	Appearance and Colour of Corrosion Products	105
6.6	Characteristics of Microbial Attack	107
6.7	Laboratory Methods	109
6.7.1	Culture-Dependent Methods	109
6.7.2	Culture-Independent Methods	112
6.8	Quick (Or Rapid) Check Tests	114
6.9	Electrochemical Recognition Methods and Their Application to MIC	116
6.10	Summary and Conclusions	119
	Selected References	121

7	Examples of Some Systems Vulnerable to MIC	125
7.1	Introduction	125
7.2	Buried Metallic Pipelines	126
7.3	Maritime Piled Structures (Jetty and Wharves)	130
7.4	Offshore Platforms	134
7.5	Fire Water Lines	137
7.6	Summary and Conclusions	138
	Selected References	138
8	Examples of Some Materials Vulnerable to MIC	141
8.1	Introduction	141
8.2	Copper and Cupronickels	142
8.3	Duplex Stainless Steels	144
8.4	Concrete	146
8.5	Summary and Conclusions	150
	Selected References	150
9	How Is MIC Treated?	153
9.1	Introduction	153
9.2	Physical-Mechanical Treatments	155
9.2.1	Pigging	155
9.2.2	Use of Ultraviolet Radiation	156
9.2.3	Ultrasonic Treatment	158
9.3	Chemical Treatments	159
9.3.1	Pros and Cons of Some Biocides	160
9.3.2	A Note on Dual Biocide Treatment	168
9.3.3	“Natural” Biocides	169
9.4	Electrochemical Methods	170
9.4.1	Cathodic Protection (CP)	171
9.4.2	Coating	177
9.5	Biological Methods	179
9.6	Summary and Conclusions	181
	Selected References	181
10	(Mathematical) Modelling of MIC by Fuzzy Logic	185
10.1	Introduction	185
10.2	MIC Models	185
10.3	Fuzzy Calculations	187
10.4	Fuzzy Modelling of Microbial and Non-microbial Corrosion of Carbon Steel in a Post-cracked Stage in Reinforced Concrete Structures by Their Open Circuit Potential Patterns	188
10.4.1	Basic Concepts	188
10.4.2	Environment Versus Material	190
10.4.3	Algorithm and Methodology	191
10.4.4	Fuzzy Model	192

10.4.5	Fuzzy Composite Functions.	193
10.4.6	Validation	195
10.4.7	Results and Discussion	196
10.5	Conclusions	198
	Selected References.	199
11	Diplomacy of MIC Treatment	201
11.1	Introduction	201
11.2	MCKM and MCM	202
11.2.1	Microbial Corrosion Management (MCM)	202
11.2.2	Microbial Corrosion Knowledge Management (MCKM)	205
11.3	Conclusion	211
	Selected References.	212
	Erratum to: How MIC Is Detected and Recognised?	E1
	Glossary	213
	Index	215

Microbiologically Influenced Corrosion
An Engineering Insight

Javaherdashti, R.

2017, XXI, 216 p. 90 illus., Hardcover

ISBN: 978-3-319-44304-1
