1	Introduction and Motivation for Dark Matter	1
1.1	Introduction to the Standard Model	3
1.1.1	Fundamental Particles and Forces	3
1.1.2	Electroweak Symmetry Breaking	6
1.1.3	Limitations of the Standard Model	8
1.2	Dark Matter Relic Density	9
1.3	Astrophysical Evidence for Dark Matter	11
1.3.1	Galactic Scales	12
1.3.2	Galactic Rotation Curves	12
1.3.3	The Bullet Cluster	13
1.3.4	The Cosmic Microwave Background	15
1.4	Weakly Interacting Massive Particles	17
1.5	Review of Searches for Weakly Interacting Massive Particles	19
1.5.1	Direct Detection Experiments	19
1.5.2	Indirect Detection Experiments	22
	References	25
2	The ATLAS Experiment	27
2.1	The CERN Large Hadron Collider	27
2.2	The ATLAS Detector	32
2.3	Inner Detector	34
2.4	Calorimetry	37
2.4.1	Particle Showers	38
2.4.2	Electromagnetic Calorimeters	40
2.4.3	Hadronic Calorimeters	43
2.4.4	Forward Calorimeters	44
2.5	Muon Spectrometers	46
2.6	Triggering System	48
2.7	Simulation	50
2.7.1	Event Generation	51
2.7.2	Detector Simulation and Digitization	51

2.8	Computing and Data Management	52
	References.	53
3	ATLAS Reconstruction and Performance	55
3.1	Introduction	55
3.2	Electrons and Photons	55
3.2.1	Reconstruction.	55
3.2.2	Performance	57
3.3	Muons	58
3.3.1	Reconstruction.	58
3.3.2	Performance	59
3.4	Tau Leptons and b -Jets.	61
3.4.1	Tau Lepton Reconstruction and Performance	61
3.4.2	b -Jet Reconstruction and Performance.	62
3.5	Missing Transverse Momentum	62
3.5.1	Reconstruction.	62
3.5.2	Performance	66
	References.	68
4	Jet Reconstruction and Performance	71
4.1	Introduction	71
4.2	Topo-Clustering and Reconstruction.	74
4.2.1	Topo-Cluster Formation	74
4.2.2	Jet Reconstruction	76
4.2.3	Jet Associations.	81
4.2.4	Jet Cleaning.	81
4.3	Jet Energy Scale Calibration.	82
4.3.1	Overview.	82
4.3.2	Pileup Suppression	84
4.3.3	Origin Correction	89
4.3.4	Absolute Jet Energy Scale.	89
4.3.5	Global Sequential Calibration	91
4.3.6	In situ Jet Measurements.	92
4.3.7	Single Hadron Response Measurements	98
4.4	Jet Punch-Through	99
4.4.1	Identifying Punch-Through Jets.	100
4.4.2	Correcting for Lost Energy	104
4.4.3	Performance of the Punch-Through Correction	107
4.5	Jet Energy Resolution.	109
4.6	Jets and Masked Tile Calorimeter Regions.	111
4.6.1	The Origin of Masked Tile Calorimeter Regions.	111
4.6.2	The Impact of Masked Modules on Jet Kinematics.	113
4.6.3	The Impact of Masked Modules on Other Quantities	116

4.6.4	Cleaning Bad Jets	117
4.6.5	Summary	123
4.7	Conclusions	124
	References.	125
5	Jet Uncertainties	127
5.1	Introduction	127
5.2	Overview	128
5.3	Uncertainty Components.	129
5.3.1	Common to Z/ γ -Jet Balance	129
5.3.2	Z-Jet Balance.	133
5.3.3	γ -Jet Balance.	134
5.3.4	Multi-jet Balance.	135
5.3.5	Di-jet η -Intercalibration	137
5.3.6	Pileup Suppression	138
5.3.7	Flavour Differences	140
5.3.8	Other Sources	142
5.4	Uncertainty Comparisons	142
5.4.1	The Moriond2013 Release.	143
5.4.2	The Final2012 Release.	145
5.4.3	Comparing Releases	146
5.5	Reductions Via Matrix Eigen-decomposition	147
5.5.1	Eigen-decomposition Description	148
5.5.2	Global Reductions.	149
5.5.3	Category Reductions	150
5.6	Alternative Correlation Scenarios	153
5.6.1	The Moriond2013 Alternative Scenario.	156
5.6.2	The Final2012 Alternative Scenarios	158
5.6.3	Reductions.	165
5.7	Conclusions	166
	References.	166
6	The Mono-Jet Analysis	167
6.1	Introduction	167
6.2	Standard Model Backgrounds.	169
6.3	Signal and Control Region Overview	170
6.4	Event Selection and Cleaning	171
6.4.1	Triggering Events	172
6.4.2	Event Quality	175
6.4.3	Object Definitions	175
6.4.4	Overlap Removal.	179
6.4.5	Jet Cleaning.	179
6.4.6	Masked Tile Calorimeter Modules.	180
6.4.7	Isolated Track Rejection	181

6.4.8	Pre-selection	182
6.4.9	Signal and Control Region Specific Selections	183
6.5	Dataset Information	187
6.5.1	Data Samples	187
6.5.2	Simulated Samples	187
6.6	Background Determination	189
6.6.1	Data-Driven $W + jets$ and $Z + jets$ Estimation Technique	189
6.6.2	$Z \rightarrow \ell\ell$ Control Regions	192
6.6.3	$W \rightarrow \ell\nu$ Control Regions	197
6.6.4	Coherence of $Z \rightarrow \nu\nu + jets$ Data-Driven Estimates.	203
6.6.5	Multi-jet Control Region	204
6.6.6	Non-collision Background Estimation	207
6.6.7	Top Control Region	211
6.6.8	Estimating Other Backgrounds	212
6.7	Systematic Uncertainties	214
6.7.1	Jet Energy Scale and Resolution	215
6.7.2	Lepton Identification and Scale	215
6.7.3	E_T^{miss} SoftTerm Scale and Resolution.	216
6.7.4	Trigger Efficiency	216
6.7.5	Data Taking Conditions.	217
6.7.6	Event Cleaning	217
6.7.7	Top Normalization	218
6.7.8	Diboson Normalization	218
6.7.9	Other Background Normalizations.	222
6.7.10	Theoretical Systematic Uncertainties on the Transfer Factor	222
6.7.11	Summary Tables for Dominant Signal Region Processes	224
6.8	Results	228
6.8.1	Combined $Z \rightarrow \nu\nu + jets$ Data-Driven Estimates	228
6.8.2	Event Yields	232
6.8.3	Model-Independent Limits.	233
6.9	Conclusions	234
	References.	235
7	Mono-jet Dark Matter Interpretation	237
