1	Health Care System and Geospatial Technology: A Conceptual Framework of the Study	1
1.1	Introduction	1
1.2	Significance of the Study	2
1.3	Role of Geospatial Technology in Health Care Analysis	3
1.4	Medical Geography	5
1.4.1	Determinant of Health	6
1.4.2	Public Health	6
1.4.3	Community Health	7
1.4.4	Health Care	7
1.4.5	Disease	7
1.4.6	Spatial Epidemiology	8
1.4.7	Concept of Primary Health Care	8
1.4.8	Five-Year Plans-National Health Policy in India	13
1.5	Review of Literatures	18
1.6	Objective of the Study	23
1.7	Hypotheses of the Work	24
1.8	Data Used and Methodology for the Study	24
1.9	Organization of Chapters in This Study	25
	References	25
2	Applying Remote Sensing and GIS in Study of Physical and Cultural Aspects of Varanasi District	29
2.1	Locational Extent of the Area	29
2.2	Geology of the Area	31
2.3	Physiographic Divisions	32
2.3.1	Upper Ganga-Varuna Plain	32
2.3.2	Varuna-Gomati Interfluence	32
2.3.3	The Ganga-Varuna Interfluence	33
2.4	Drainage and Water Ponds	34
2.4.1	The Ganga River	35

2.4.2	The Gomati River	36
2.4.3	The Varuna River	36
2.4.4	The Assi River	36
2.5	Climatic Characteristics of the Varanasi District.....	37
2.5.1	Temperature	37
2.5.2	Precipitation/Rainfall	38
2.6	Ground Water: Present Status and Prospects	39
2.6.1	Current Status of Water Supply	41
2.6.2	Available Resources.....	42
2.6.3	Ponds as a Source of Recharge	43
2.6.4	Pollution.....	44
2.7	Soils	49
2.7.1	Ganga Sandy Soil	50
2.7.2	Western Low Land Soil	50
2.7.3	Western Upland Soil	50
2.7.4	Loamy Soil.....	51
2.8	Land Use and Natural Vegetation	51
2.9	Transportation Network and Connectivity.....	53
2.10	Communication and Educational Facilities	55
2.11	Solid Waste Generation and Management.....	56
	References.....	60
3	Integration of Census Data with GIS for Analysis of Population Characteristics.....	63
3.1	Population Characteristics	63
3.2	Population Projection.....	64
3.3	Population Density.....	66
3.3.1	Arithmetic Density.....	66
3.3.2	Physiological Density	66
3.3.3	Agricultural Density	67
3.4	Population Growth and Distribution.....	70
3.4.1	Male-female Population Growth Rate	73
3.4.2	Scheduled Caste/Scheduled Tribe (SC/ST) Population.....	75
3.5	Spatial Pattern of Sex Ratio	79
3.6	Spatial Pattern of Literacy	81
3.7	Occupational Structure	83
3.7.1	Main Workers	88
3.7.2	Non-Workers.....	92
	References.....	92
4	Analysis of Health Care Facility Using GIS and GPS	93
4.1	Health Care Facilities.....	93
4.2	Spatial Analysis of Social Indicator in Varanasi District.....	95
4.3	Spatial Analysis of Health Care Facilities in Varanasi District	95
4.3.1	Density of Health Care Facilities.....	100

4.3.2	Distribution and Condition of Bed in the PHCs and CHCs/Hospitals.....	100
4.3.3	Availability of Doctors and Paramedical Staff	100
4.3.4	Distribution of Health Care Facilities in Terms of Per Lakh Population	103
4.4	Physical Status and Other Available Facilities at Primary Health Centres.....	107
4.5	Proximity/Buffer Area Analysis of PHCs/New PHCs/CHCs.....	116
4.6	Shortest Road Estimation Through Network Analysis.....	119
	References.....	121
5	GIS in Vector Born Disease Mapping.....	123
5.1	Vector Born Disease	123
5.2	Disease Mapping	124
5.3	Important Vector-Borne Diseases	125
5.3.1	Malaria.....	125
5.3.2	Dengue Fever	128
5.3.3	Filariasis.....	128
5.3.4	Kala-Azar.....	128
5.4	Data Required for GIS Based Vector Born Disease (VBD) Mapping.....	129
5.5	Methodology Adopted for Vector Born Disease (VBD) Mapping.....	129
5.6	Status of Vector Born Diseases (VBD) in the Varanasi District.....	130
	References.....	136
6	A Study of Malaria Susceptibility Mapping Using Statistical Methods with GIS	139
6.1	Introduction.....	139
6.2	Data Collection and Methodology for Malaria Susceptibility Modeling.....	140
6.2.1	Malaria Inventory Map	141
6.3	Malaria Influencing Data Layers and Related Map Preparations	142
6.3.1	Rainfall	142
6.3.2	Temperature	143
6.3.3	Population Density.....	144
6.3.4	Distance to River/Streams.....	146
6.3.5	Distance to Road.....	149
6.3.6	Distance to Health Facilities	149
6.3.7	Distance to Water Ponds	152
6.3.8	Normalized Difference Vegetation Index (NDVI).....	153
6.3.9	Land Use Land Cover (LULC)	155
6.4	Methods and Results of Statistical Methods.....	158
6.4.1	Multiple Linear Regression Method (Step-Wise Method).....	158

6.4.2	Information Value Method (InfoVal)	163
6.4.3	Heuristic Approach (Qualitative Map Combination)	166
6.5	Comparison of Statistical Methods to Select Optimum Model for MSZ by Qs Method	170
6.6	Verification of the Susceptibility Methods by Area Under Curve (AUC).....	173
	References.....	176
7	An Analysis of Geographical Survey for Utilization of Health Care Facilities	177
7.1	Utilization of Health Care Service.....	177
7.2	Vaccination and Immunization	178
7.2.1	Infant Immunization	179
7.2.2	Extensive Vaccination and Immunization Programme	179
7.3	Utilization of Family Welfare Programme	181
7.3.1	Immunization to Pregnant Women	184
7.3.2	Delivery.....	184
7.3.3	Distribution of Vitamin A and Iron Tablets	185
7.3.4	Contraception.....	185
7.3.5	Treatment	185
7.4	The Utilization of Health Care Facilities in Opinion of Respondents Through Personal Survey.....	188
7.4.1	Distance Wise Respondent's Opinion Regarding Health Care Facilities.....	192
7.4.2	Caste/Religion-Wise Respondent's Opinion Regarding Health Care Facilities	196
7.4.3	Education-Wise Respondents Opinion Regarding Health Care Facilities	200
7.4.4	House Type-Wise Respondents Opinion Regarding Health Care Facilities	203
7.4.5	Occupation-Wise Respondents Opinion Regarding Utilization of Health Care Services.....	205
7.4.6	Nature of Health Care Facilities and Their Availability	207
	References.....	211
8	GIS Initiatives in Health Care Planning	213
8.1	Introduction.....	213
8.2	Materials and Methodology	214
8.3	Result & Discussion	216
8.3.1	Distance to Road & Highway and Weightage	216
8.3.2	Distance to Health Centres & City Hospitals and Weightage.....	217
8.3.3	Weightage of Malaria Susceptible Model Map	218
8.4	Hospital Requirement Index (HRI) and Hospital Requirement Zone (HRZ).....	220

8.5	Reasons for Systematic Planning of Health Facilities	221
8.5.1	Inadequate Facilities and Network of Health Centres and Sub-Centres.....	221
8.5.2	Poor Infrastructure Facilities at Primary Health Centres (PHCs)	223
8.5.3	Distance Constraint.....	224
8.5.4	Poor Socio-Economic Condition of the Villagers	225
8.5.5	Less Availability of Doctors	226
8.5.6	Lack of Awareness About the Services Available of PHCs/CHCs.....	226
8.5.7	Cause of Dissatisfaction	227
8.6	Education and Training.....	229
8.7	Action Points	230
	References.....	231

Geoinformatics in Health Facility Analysis

Rai, P.K.; Nathawat, M.S.

2017, XIX, 231 p. 99 illus., 77 illus. in color., Hardcover

ISBN: 978-3-319-44623-3
