1	Introduction	1
	References	4
 Part I Theoretical Foundations		
2	State-of-the-Art for the BIEM	9
2.1	The BIEM as an Effective Computational Tool	9
2.1.1	Available Computational Techniques for Elastodynamics of Inhomogeneous Media	10
2.1.2	BIEM for Inhomogeneous and Heterogeneous Media	11
2.1.3	Fundamental Solutions for Continuously Inhomogeneous Media and BIEM Formulations	15
2.1.4	Green's Functions and BIEM Formulations for a Homogeneous Half-Space	19
2.1.5	BIEM Based on the Green's Function for a Layered Half-Plane	20
2.1.6	BIEM Based on the Green's Function for a Continuously Inhomogeneous in Depth Half-Plane	21
2.2	BIEM Application in Seismic Wave Propagation Problems	22
2.2.1	Elastic Waves in Crack-Free Media	22
2.2.2	Elastic Waves in Fractured Media	27
	References	36
3	Elastodynamic Problem Formulation	53
3.1	Elastodynamic Field Equations	53
3.2	Problem Formulation	56
3.2.1	Anti-plane Case	60
3.2.2	In-Plane Case	61
3.3	The Double Role of Heterogeneities	62
3.3.1	Heterogeneities as Wave Scatterers	62
3.3.2	Heterogeneities as Stress Concentrators	63

3.4	Problem Formulation Using BIE Based on the Fundamental Solution	65
3.4.1	Displacement BIE for Crack-Free Domains.	65
3.4.2	Degeneration of Displacement BIE for Cracked Domains	67
3.4.3	Traction BIE for Cracked Domains	67
3.4.4	BIEM for Inhomogeneous and Heterogeneous Media	72
3.5	Problem Formulation via BIE Based on the Green's Function	74
3.5.1	Advantages and Disadvantages of BIEM Based on the Green's Function	74
3.5.2	BIEM for Inhomogeneous Half-Plane with Surface Relief and Cavities	75
	References.	77
4	Fundamental Solutions for a Class of Continuously Inhomogeneous, Isotropic, and Anisotropic Materials	79
4.1	Introduction	79
4.2	Problem Statement	80
4.3	Transformation of the Governing Equation.	81
4.3.1	Material Profiles	82
4.3.2	Transformed Equations	83
4.4	Application of Radon Transform	83
4.5	Fundamental Solution for 'Case A'.	86
4.5.1	Inverse Radon Transform	88
4.5.2	Asymptotic Behavior.	89
4.6	Fundamental Solution for 'Case B'.	90
4.7	Inhomogeneous Isotropic Material	93
4.7.1	'Case A' Results	94
4.7.2	'Case B' Results	94
4.7.3	Poisson's Equation as a Special Case	95
	References.	99
5	Green's Function for the Inhomogeneous Isotropic Half-Plane	101
5.1	Half-Plane Green's Function: In-Plane Case.	101
5.1.1	Introduction.	101
5.1.2	Problem Statement and Solution Outline.	102
5.1.3	Solution Methodology.	104
5.1.4	Recovery Process for the Homogeneous Case.	108
5.1.5	Elastostatic Green's Functions for the Half-Plane	110
5.2	Half-Plane Green's Function: Anti-plane Case	112
5.2.1	Introduction.	112
5.2.2	Statement of the Problem and Solution Method	113
	References.	120

6	Wave Propagations in Inhomogeneous Isotropic/Orthotropic Half-Planes.	123
6.1	The Isotropic and Inhomogeneous Half-Plane.	123
6.1.1	Introduction and Problem Statement	123
6.1.2	The Inhomogeneous Half-Plane.	128
6.2	Inhomogeneous Orthotropic Half-Planes.	134
6.2.1	Introduction and Problem Statement	134
6.2.2	Half-Plane Solutions	136
	References.	145
 Part II Wave Propagation in Inhomogeneous and Heterogeneous Regions: The Anti-Plane Strain Case		
7	Anti-plane Strain Wave Motion in Unbounded Inhomogeneous Media	149
7.1	SH Wave Propagation in an Exponentially Inhomogeneous Plane with Cavities and Cracks	149
7.1.1	Introduction	149
7.1.2	Problem Statement.	150
7.1.3	BIEM Formulation	153
7.1.4	Numerical Implementation and Results	156
7.2	SH Wave Scattering in an Orthotropic Half-Plane Weakened by Cavities	161
7.2.1	Introduction	161
7.2.2	Statement of the Problem	161
7.2.3	Green's Function	163
7.2.4	Boundary Integral Equations	165
7.2.5	Numerical Solutions	166
7.3	A Quadratically Inhomogeneous Half-Plane with Free Surface Relief Under SH Wave.	170
7.3.1	Introduction and Problem Statement	170
7.3.2	Green's Function of Inhomogeneous In-depth Half-Plane	172
7.3.3	BIEM Formulation	173
7.3.4	Numerical Scheme and Its Verification	174
7.3.5	Parametric Study	176
	References.	178
8	Anti-plane Strain Wave Motion in Finite Inhomogeneous Media	181
8.1	Introduction	181
8.2	Description of the Problem.	185
8.2.1	The BVP 1 Statement	187
8.2.2	The BVP 2 Statement	188

8.3	Hybrid Computational Technique	189
8.3.1	FDM-BEM Coupling.	190
8.3.2	The FDM for the Wider Geological Cross Section	191
8.3.3	The BEM for Modeling the 'BEM Box' Area.	192
8.4	Verification Study.	194
8.4.1	Verification of the BEM Numerical Scheme	194
8.4.2	Verification of the Hybrid FDM-BEM Scheme	196
8.5	Parametric Study: Case Study for a Thessaloniki Metro Station	197
8.5.1	Two Tunnels in the Homogeneous Anisotropic Half-Plane Under Incident SH Waves	198
8.5.2	Two Tunnels in the Inhomogeneous Isotropic Half-Plane Under Incident SH Waves	199
8.5.3	Response of the Metro Tunnels Embedded in the 'BEM Box' to an Incident Gabor Pulse	200
8.5.4	Response of the Metro Tunnels Embedded in the 'BEM' Box to the July 4, 1978 M 5.1 Aftershock.	204
	References.	208

Part III Wave Propagation in Inhomogeneous and Heterogeneous Regions: The In-Plane Case

9	In-Plane Wave Motion in Unbounded Cracked Inhomogeneous Media	213
9.1	Wave Scattering by Cracks in Infinite Quadratically Inhomogeneous Media	213
9.1.1	Introduction.	213
9.1.2	Boundary-Value Problem Formulation	214
9.1.3	Fundamental Solutions for the Inhomogeneous Continuum.	216
9.1.4	Numerical Solution of the BVP.	218
9.1.5	Numerical Examples	220
9.2	Wave Scattering by Cracks in Infinite, Exponentially Inhomogeneous Media	231
9.2.1	Introduction.	231
9.2.2	Problem Statement.	231
9.2.3	Fundamental Solution and Incident Plane Wave Solutions	234
9.2.4	BIEM Formulation and Numerical Implementation	236
9.2.5	Numerical Results	238
	References.	244

10 Site Effects in Finite Geological Region Due to Wavepath	
Inhomogeneity	247
10.1 Introduction	247
10.2 Formulation of the Problem	248
10.2.1 Internal Problem	249
10.2.2 External Problem.	250
10.2.3 Superposition of the Internal and External Subproblems	251
10.3 Hybrid BIE-Plane Wave Decomposition Method	251
10.3.1 BIE Method for Solution of the Internal Problem	252
10.3.2 Hybrid BIE-Plane Wave Decomposition Method for Solution of the External Problem.	252
10.3.3 Free-Field Motion in the Half-Plane	253
10.3.4 Composite Region Solution Strategy	254
10.4 Numerical Example	255
10.4.1 The Q-Inhomogeneous Half-Plane.	257
10.4.2 The E-Inhomogeneous Half-Plane	262
References.	264
11 Wave Scattering in a Laterally Inhomogeneous, Cracked	
Poroelastic Finite Region	265
11.1 Introduction	265
11.2 Problem Formulation	266
11.2.1 Governing Equation of Motion and Boundary Conditions.	266
11.2.2 The Bardet's Viscoelastic Model.	269
11.3 Hybrid Computational Model	272
11.3.1 Hybrid Computational Technique	273
11.3.2 The Combined BEM Approach.	274
11.4 Numerical Results.	276
11.4.1 Finite Laterally Non-homogeneous Cracked Geological Inclusion in a Layered Half-Plane Containing a Seismic Source.	277
11.4.2 Layered Poroelastic Half-Plane Containing a Seismic Source	282
11.4.3 Poroelastic Cracked Geological Inclusion in a Homogeneous Half-Plane Swept by Elastic Waves.	287
References.	288
Index	291

Seismic Wave Propagation in Non-Homogeneous Elastic
Media by Boundary Elements

Manolis, G.D.; Dineva, P.S.; Rangelov, T.V.; Wuttke, F.

2017, XVI, 294 p. 95 illus., Hardcover
