Requirements for Ignition Systems

Challenges to the Ignition System of Future Gasoline Engines – An Application Oriented Systems Comparison	3
Martin Schenk, Franz Xaver Schauer, Christina Sauer, Gerhard Weber, Joachim Hahn and Christian Schwarz	

Extension of Operating Window for Modern Combustion Systems by High Performance Ignition	26
Martin Brandt, Alexander Hettinger, Andreas Schneider, Hartwig Senftleben and Tim Skowronek	

Demonstration of Improved Dilution Tolerance Using a Production-Intent Compact Nanosecond Pulse Ignition System	52
Daniel Singleton, Jason M. Sanders, Mark A. Thomas, Magnus Sjöberg, Jr., James Sevik, Michael Pamminger and Thomas Wallner	

Operating Conditions/Flammability

Study of Ignitability in Strong Flow Field	69
Kotaro Suzuki, Kazuhiro Uehara, Eiji Murase and Shinichiro Nogawa	

Simulation of Ignition

Simulating Extreme Lean Gasoline Combustion – Flow Effects on Ignition	87
B. Morcinkowski, P. Hoppe, F. Hoppe, M. Mally, P. Adomeit, T. Uhlmann, M. Thewes, J. Scharf and H. Baumgarten	

New Ignition Systems 1

High Energy Multipole Distribution Spark Ignition System	109
Ming Zheng, Shui Yu and Jimi Tjong	

Development of Homogeneous Charged Multi-point Ignition Engine	131
Katsuaki Minami	
Development of an Ignition Coil Integrated System to Monitor the Spark Plugs Wear.	140
Filipa Fernandes, Marco Lönarz and Peter Weyand	
Components	
Fatigue Life Simulation and Analysis of an Ignition Coil	155
Ravish Masti, Pedro Carreira, Chandrashekhara SM and Ravi Kumar	
Visualization of Ignition Processes	
Calorimetry and Atomic Oxygen Laser-Induced Fluorescence of Pulsed Nanosecond Discharges at Above-Atmospheric Pressures	169
Benjamin Wolk and Isaac Ekoto	
Comparing Visualization of Inflammation at Transient Load Steps Comparing Ignition Systems	190
Olaf Toedter, Alexander Heinz, Christian Disch, Thomas Koch and Stefan Seefeldt	
Spark Control for Ion Current Sensing	204
Tycho Weißgerber and Gregor Kortendiek	
Combustion Processes	
Ignition System Development for High Speed High Load Lean Boosted Engines	217
D.J. Corrigan, E. Pascolini, D. Zecchetti and F. Titus	
New Ignition Systems 2	
Effects of Microwave-Enhanced Plasma on Laser Ignition	245
Jun Hayashi, Chen Liu, Fumiteru Akamatsu, Atsushi Nishiyama, Ahsa Moon and Yuji Ikeda	
Pulse Train Ignition with Passively Q-Switched Laser Spark Plugs Under Engine-like Conditions	254
Sebastian Lorenz, Mark Bärwinkel, Wolfgang Mühlbauer and Dieter Brüggemann	
Advanced Plasma Ignition (API): A Simple Corona and Spark Ignition System	260
Paulus Krüger and Barend Visser	

Alternative Ignition Systems

Analytical and Experimental Optimization of the Advanced Corona Ignition System	267
John Burrows and Kristapher Mixell	

Comparative Optical and Thermodynamic Investigations of High Frequency Corona- and Spark-Ignition on a CV Natural Gas Research Engine Operated with Charge Dilution by Exhaust Gas Recirculation	293
Fabian Marko, Gerhard König, Tobias Schöffler, Steffen Bohne and Friedrich Dinkelacker	

Potential of Advanced Corona Ignition System (ACIS) for Future Engine Applications	315
Cherian A. Idicheria and Paul M. Najt	

Ignition Systems for Gasoline Engines

3rd International Conference, November 3-4, 2016,

Berlin, Germany

Günther, M.; Sens, M. (Eds.)

2017, VII, 331 p. 254 illus., Softcover

ISBN: 978-3-319-45503-7
