

Contents

Part I Integrated Product and Process Design

Section 1.1 Innovative Design Methods

A Systematic Methodology for Engineered Object Design: The P-To-V Model of Functional Innovation	5
Geoffrey S. Matthews	

Influence of the evolutionary optimization parameters on the optimal topology	15
Tommaso Ingrassia, Antonio Mancuso and Giorgio Paladino	

Design of structural parts for a racing solar car	25
Esteban Betancur, Ricardo Mejía-Gutiérrez, Gilberto Osorio-gómez and Alejandro Arbelaez	

Section 1.2 Integrated Product and Process Design

Some Hints for the Correct Use of the Taguchi Method in Product Design	35
Sergio Rizzuti and Luigi De Napoli	

Neuro-separated meta-model of the scavenging process in 2-Stroke Diesel engine	45
Stéphanie Cagin and Xavier Fischer	

Subassembly identification method based on CAD Data	55
Imen Belhadj, Moez Trigui and Abdelmajid Benamara	

Multi-objective conceptual design: an approach to make cost-efficient the design for manufacturing and assembly in the development of complex products	63
Claudio Favi, Michele Germani and Marco Mandolini	

**Modeling of a three-axes MEMS gyroscope with feedforward
PI quadrature compensation 71**
D. Marano, A. Cammarata, G. Fichera, R. Sinatra and D. Prati

A disassembly Sequence Planning Approach for maintenance 81
Maroua Kheder, Moez Trigui and Nizar Aifaoui

**A comparative Life Cycle Assessment of utility poles manufactured
with different materials and dimensions 91**
Sandro Barone, Filippo Cucinotta and Felice Sfravara

**Prevision of Complex System’s Compliance during
System Lifecycle 101**
J-P. Gitto, M. Bosch-Mauchand, A. Ponchet Durupt, Z. Cherfi
and I. Guivarch

**Framework definition for the design of a mobile
manufacturing system. 111**
Youssef Benama, Thecle Alix and Nicolas Perry

**An automated manufacturing analysis of plastic parts
using faceted surfaces 119**
Jorge Manuel Mercado-Colmenero, José Angel Moya Muriana,
Miguel Angel Rubio- Paramio and Cristina Martín-Doñate

Applying sustainability in product development. 129
Rosana Sanz, José Luis Santolaya and Enrique Lacasa

**Towards a new collaborative framework supporting the design
process of industrial Product Service Systems 139**
Elaheh Maleki, Farouk Belkadi, Yicha Zhang and Alain Bernard

Information model for tracelinks building in early design stages 147
David Ríos-Zapata, Jérôme Pailhès and Ricardo Mejía-Gutiérrez

Section 1.3 Interactive Design

User-centered design of a Virtual Museum system: a case study 157
Loris Barbieri, Fabio Bruno, Fabrizio Mollo and Maurizio Muzzupappa

**An integrated approach to customize the packaging of heritage
artefacts 167**
G. Fatuzzo, G. Sequenzia, S.M. Oliveri, R. Barbagallo and M. Cali

Part II Product Manufacturing and Additive Manufacturing

Section 2.1 Additive Manufacturing

Extraction of features for combined additive manufacturing and machining processes in a remanufacturing context	181
Van Thao Le and Henri Paris Guillaume Mandil	
Comparative Study for the Metrological Characterization of Additive Manufacturing artefacts	191
Charyar Mehdi-Souzani, Antonio Piratelli-Filho and Nabil Anwer	
Flatness, circularity and cylindricity errors in 3D printed models associated to size and position on the working plane	201
Massimo Martorelli, Salvatore Gerbino, Antonio Lanzotti, Stanislaio Patalano and Ferdinando Vitolo	
Optimization of lattice structures for Additive Manufacturing Technologies	213
Gianpaolo Savio, Roberto Meneghello and Gianmaria Concheri	
Standardisation Focus on Process Planning and Operations Management for Additive Manufacturing	223
Jinhua Xiao, Nabil Anwer, Alexandre Durupt, Julien Le Duigou and Benoît Eynard	
Comparison of some approaches to define a CAD model from topological optimization in design for additive manufacturing	233
Pierre-Thomas Doutre, Elodie Morretton, Thanh Hoang Vo, Philippe Marin, Franck Pourroy, Guy Prudhomme and Frederic Vignat	
Review of Shape Deviation Modeling for Additive Manufacturing	241
Zuowei Zhu, Safa Keimasi, Nabil Anwer, Luc Mathieu and Lihong Qiao	
Design for Additive Manufacturing of a non-assembly robotic mechanism	251
F. De Crescenzo and F. Lucchi	
Process parameters influence in additive manufacturing	261
T. Ingrassia, Vincenzo Nigrelli, V. Ricotta and C. Tartamella	
Multi-scale surface characterization in additive manufacturing using CT	271
Yann Quinsat, Claire Lartigue, Christopher A. Brown and Lamine Hattali	

Testing three techniques to elicit additive manufacturing knowledge 281
Christelle Grandvallet, Franck Pourroy, Guy Prudhomme
and Frédéric Vignat

**Topological Optimization in Concept Design: starting approach
and a validation case study** 289
Michele Bici, Giovanni B. Broggiato and Francesca Campana

Section 2.2 Advanced Manufacturing

**Simulation of Laser-Sensor Digitizing for On-Machine
Part Inspection** 303
Nguyen Duy Minh Phan, Yann Quinsat and Claire Lartigue

**Tool/Material Interferences Sensibility to Process
and Tool Parameters in Vibration-Assisted Drilling.** 313
Vivien Bonnot, Yann Landon and Stéphane Segonds

**Implementation of a new method for robotic repair operations
on composite structures** 321
Elodie Paquet, Sébastien Garnier, Mathieu Ritou, Benoît Furet
and Vincent Desfontaines

CAD-CAM integration for 3D Hybrid Manufacturing. 329
Gianni Caligiana, Daniela Francia and Alfredo Liverani

Section 2.3 Experimental Methods in Product Development

**Mechanical steering gear internal friction: effects on the drive feel
and development of an analytic experimental model
for its prediction** 341
Giovanni Gritti, Franco Peverada, Stefano Orlandi, Marco Gadola,
Stefano Uberti, Daniel Chindamo, Matteo Romano
and Andrea Olivi

**Design of an electric tool for underwater archaeological restoration
based on a user centred approach** 353
Loris Barbieri, Fabio Bruno, Luigi De Napoli, Alessandro Gallo
and Maurizio Muzzupappa

Analysis and comparison of Smart City initiatives 363
Aranzazu Fernández-Vázquez and Ignacio López-Forniés

**Involving Autism Spectrum Disorder (ASD) affected people
in design** 373
Stefano Filippi and Daniela Barattin

Part III Engineering Methods in Medicine

Patient-specific 3D modelling of heart and cardiac structures workflow: an overview of methodologies	387
Monica Carfagni and Francesca Uccheddu	
A new method to capture the jaw movement	397
Lander Barrenetxea, Eneko Solaberrieta, Mikel Iturrate and Jokin Gorozika	
Computer Aided Engineering of Auxiliary Elements for Enhanced Orthodontic Appliances	405
Roberto Savignano, Sandro Barone, Alessandro Paoli and Armando Viviano Razionale	
Finite Element Analysis of TMJ Disks Stress Level due to Orthodontic Eruption Guidance Appliances	415
Paolo Neri, Sandro Barone, Alessandro Paoli and Armando Razionale	
TPMS for interactive modelling of trabecular scaffolds for Bone Tissue Engineering	425
M. Fantini, M. Curto and F. De Crescenzo	
Mechanical and Geometrical Properties Assessment of Thermoplastic Materials for Biomedical Application	437
Sandro Barone, Alessandro Paoli, Paolo Neri, Armando Viviano Razionale and Michele Giannese	
The design of a knee prosthesis by Finite Element Analysis	447
Saúl Íñiguez-Macedo, Fátima Somovilla-Gómez, Rubén Lostado-Lorza, Marina Corral-Bobadilla, María Ángeles Martínez-Calvo and Félix Sanz-Adán	
Design and Rapid Manufacturing of a customized foot orthosis: a first methodological study	457
M. Fantini, F. De Crescenzo, L. Brognara and N. Baldini	
Influence of the metaphysis positioning in a new reverse shoulder prosthesis	469
T. Ingrassia, L. Nalbone, Vincenzo Nigrelli, D. Pisciotta and V. Ricotta	
Digital human models for gait analysis: experimental validation of static force analysis tools under dynamic conditions	479
T. Caporaso, G. Di Gironimo, A. Tarallo, G. De Martino, M. Di Ludovico and A. Lanzotti	

Using the Finite Element Method to Determine the Influence of Age, Height and Weight on the Vertebrae and Ligaments of the Human Spine 489
Fátima Somovilla-Gómez, Rubén Lostado-Lorza, Saúl Íñiguez-Macedo,
Marina Corral-Bobadilla, María Ángeles Martínez-Calvo
and Daniel Tobalina-Baldeon

Part IV Nautical, Aeronautics and Aerospace Design and Modelling

Numerical modelling of the cold expansion process in mechanical stacked assemblies. 501
Victor Achard, Alain Daidie, Manuel Paredes and Clément Chirol

A preliminary method for the numerical prediction of the behavior of air bubbles in the design of Air Cavity Ships. 509
Filippo Cucinotta, Vincenzo Nigrelli and Felice Sfravara

Stiffness and slip laws for threaded fasteners subjected to a transversal load 517
Rémi Thanwerdas, Emmanuel Rodriguez and Alain Daidie

Refitting of an eco-friendly sailing yacht: numerical prediction and experimental validation 527
A. Mancuso, G. Pitarresi, G.B. Trinca and D. Tumino

Geometric Parameterization Strategies for shape Optimization Using RBF Mesh Morphing 537
Ubaldo Cella, Corrado Groth and Marco Evangelos Biancolini

Sail Plan Parametric CAD Model for an A-Class Catamaran Numerical Optimization Procedure Using Open Source Tools 547
Ubaldo Cella, Filippo Cucinotta and Felice Sfravara

A reverse engineering approach to measure the deformations of a sailing yacht. 555
Francesco Di Paola, Tommaso Ingrassia, Mauro Lo Brutto
and Antonio Mancuso

A novel design of cubic stiffness for a Nonlinear Energy Sink (NES) based on conical spring 565
Donghai Qiu, Sébastien Seguy and Manuel Paredes

Design of the stabilization control system of a high-speed craft 575
Antonio Giallanza, Luigi Cannizzaro, Mario Porretto
and Giuseppe Marannano

Dynamic spinnaker performance through digital photogrammetry, numerical analysis and experimental tests.	585
Michele Cali, Domenico Speranza and Massimo Martorelli	

GA multi-objective and experimental optimization for a tail-sitter small UAV.	597
Luca Piancastelli, Leonardo Frizziero and Marco Cremonini	

Part V Computer Aided Design and Virtual Simulation

Section 5.1 Simulation and Virtual Approaches

An integrated approach to design an innovative motorcycle rear suspension with eccentric mechanism	611
R. Barbagallo, G. Sequenzia, A. Cammarata and S.M. Oliveri	

Design of Active Noise Control Systems for Pulse Noise	621
Alessandro Lapini, Massimiliano Biagini, Francesco Borchì, Monica Carfagni and Fabrizio Argenti	

Disassembly Process Simulation in Virtual Reality Environment	631
Peter Mitrouchev, Cheng-gang Wang and Jing-tao Chen	

Development of a methodology for performance analysis and synthesis of control strategies of multi-robot pick & place applications	639
Gaël Humbert, Minh Tu Pham, Xavier Brun, Mady Guillemot and Didier Noterman	

3D modelling of the mechanical actions of cutting: application to milling	647
Wadii Yousfi, Olivier Cahuc, Raynald Laheurte, Philippe Darnis and Madalina Calamaz	

Engineering methods and tools enabling reconfigurable and adaptive robotic deburring	655
Giovanni Berselli, Michele Gadaleta, Andrea Genovesi, Marcello Pellicciari, Margherita Peruzzini and Roberto Razzoli	

Tolerances and uncertainties effects on interference fit of automotive steel wheels	665
Stefano Tornincasa, Elvio Bonisoli and Marco Brino	

An effective model for the sliding contact forces in a multibody environment.	675
Michele Cali, Salvatore Massimo Oliveri, Gaetano Sequenzia and Gabriele Fatuzzo	

Systems engineering and hydroacoustic modelling applied in simulation of hydraulic components	687
Arnaud Maillard, Eric Noppe, Benoît Eynard and Xavier Carniel	
Linde's ice-making machine. An example of industrial archeology study	697
Belén Pérez Delgado, José R. Andrés Díaz, María L. García Ceballos and Miguel A. Contreras López	
Solder Joint Reliability: Thermo-mechanical analysis on Power Flat Packages	709
Alessandro Sitta, Michele Calabretta, Marco Renna and Daniela Cavallaro	
Section 5.2 Virtual and Augmented Reality	
Virtual reality to assess visual impact in wind energy projects	719
Piedad Eliana Lizcano, Cristina Manchado, Valentin Gomez-Jauregui and César Otero	
Visual Aided Assembly of Scale Models with AR	727
Alessandro Ceruti, Leonardo Frizziero and Alfredo Liverani	
Section 5.3 Geometric Modelling and Analysis	
Design and analysis of a spiral bevel gear	739
Charly Lagresle, Jean-Pierre de Vaujany and Michèle Guingand	
Three-dimensional face analysis via new geometrical descriptors	747
Federica Marcolin, Maria Grazia Violante, Sandro Moos, Enrico Vezzetti, Stefano Tornincasa, Nicole Dagnes and Domenico Speranza	
Agustin de Betancourt's plunger lock: Approach to its geometric modeling with Autodesk Inventor Professional	757
José Ignacio Rojas-Sola and Eduardo De La Morena-De La Fuente	
Designing a Stirling engine prototype	767
Fernando Fadon, Enrique Ceron, Delfin Silio and Laida Fadon	
Design and analysis of tissue engineering scaffolds based on open porous non-stochastic cells	777
R. Ambu and A.E. Morabito	
Geometric Shape Optimization of Organic Solar Cells for Efficiency Enhancement by Neural Networks	789
Grazia Lo Sciuto, Giacomo Capizzi, Salvatore Coco and Raphael Shikler	

Section 5.4 Reverse Engineering

A survey of methods to detect and represent the human symmetry line from 3D scanned human back	799
Nicola Cappetti and Alessandro Naddeo	
Semiautomatic Surface Reconstruction in Forging Dies	811
Rikardo Minguez, Olatz Etxaniz, Agustin Arias, Nestor Goikoetxea and Inaki Zuazo	
A RGB-D based instant body-scanning solution for compact box installation	819
Rocco Furferi, Lapo Governi, Francesca Uccheddu and Yary Volpe	
Machine Learning Techniques to address classification issues in Reverse Engineering	829
Jonathan Dekhtiar, Alexandre Durupt, Dimitris Kiritsis, Matthieu Bricogne, Harvey Rowson and Benoit Eynard	
Recent strategies for 3D reconstruction using Reverse Engineering: a bird's eye view	841
Francesco Buonamici, Monica Carfagni and Yary Volpe	

Section 5.5 Product Data Exchange and Management

Data aggregation architecture “Smart-Hub” for heterogeneous systems in industrial environment	853
Ahmed Ahmed, Lionel Roucoules, Rémy Gaudy and Bertrand Larat	
Preparation of CAD model for collaborative design meetings: proposition of a CAD add-on	861
Ahmad Al Khatib, Damien Fleche, Morad Mahdjoub, Jean-Bernard Bluntzer and Jean-Claude Sagot	
Applying PLM approach for supporting collaborations in medical sector: case of prosthesis implantation	871
Thanh-Nghi Ngo, Farouk Belkadi and Alain Bernard	

Section 5.6 Surveying, Mapping and GIS Techniques

3D Coastal Monitoring from very dense UAV-Based Photogrammetric Point Clouds	881
Fernando J. Aguilar, Ismael Fernández, Juan A. Casanova, Francisco J. Ramos, Manuel A. Aguilar, José L. Blanco and José C. Moreno	

Section 5.7 Building Information Modelling

BiMov: BIM-Based Indoor Path Planning 891
Ahmed Hamieh, Dominique Deneux and Christian Tahon

Part VI Education and Representation Techniques

Section 6.1 Teaching Engineering Drawing

**Best practices in teaching technical drawing: experiences
of collaboration in three Italian Universities** 905
Domenico Speranza, Gabriele Baronio, Barbara Motyl, Stefano Filippi
and Valerio Villa

**Gamification in a Graphical Engineering course - Learning
by playing** 915
Valentín Gómez-Jáuregui, Cristina Manchado and César Otero

**Reliable low-cost alternative for modeling and rendering 3D Objects
in Engineering Graphics Education** 923
J. Santamaría-Peña, M. A. Benito-Martín, F. Sanz-Adán, D. Arancón
and M. A. Martinez-Calvo

Section 6.2 Teaching Product Design and Drawing History

**How to teach interdisciplinary: case study for Product Design
in Assistive Technology** 933
G. Thomnn, Fabio Morais and Christine Werba

**Learning engineering drawing and design through the study
of machinery and tools from Malaga’s industrial heritage** 941
M. Carmen Ladrón de Guevara Muñoz, Francisco Montes Tubio,
E. Beatriz Blázquez Parra and Francisca Castillo Rueda

**Developing students’ skills through real projects
and service learning methodology** 951
Anna Biedermann, Natalia Muñoz López and Ana Serrano Tierz

Integration of marketing activities in the mechanical design process . . . 961
Cristina Martin-Doñate, Fermín Lucena-Muñoz
and Javier Gallego-Alvarez

Section 6.3 Representation Techniques

**Geometric locus associated with thriedra axonometric projections.
Intrinsic curve associated with the ellipse generated** 973
Pedro Gonzaga, Faustino Gimena, Lázaro Gimena and Mikel Goñi

Pohlke Theorem: Demonstration and Graphical Solution 981
Faustino Gimena, Lázaro Gimena, Mikel Goñi and Pedro Gonzaga

Part VII Geometric Product Specification and Tolerancing

Section 7.1 Geometric Product Specification and Tolerancing

ISO Tolerancing of hyperstatic mechanical systems with deformation control 993
Oussama Rouetbi, Laurent Pierre, Bernard Anselmetti and Henri Denoix

How to trace the significant information in tolerance analysis with polytopes 1003
Vincent Delos, Denis Teissandier and Santiago Arroyave-Tobón

Integrated design method for optimal tolerance stack evaluation for top class automotive chassis 1013
Davide Panari, Cristina Renzi, Alberto Vergnano, Enrico Bonazzi and Francesco Leali

Development of virtual metrology laboratory based on skin model shape simulation 1023
Xingyu Yan, Alex Ballu, Antoine Blanchard, Serge Mouton and Halidou Niandou

Product model for Dimensioning, Tolerancing and Inspection 1033
L. Di Angelo, P. Di Stefano and A.E. Morabito

Section 7.2 Geometric and Functional Characterization of Products

Segmentation of secondary features from high-density acquired surfaces 1043
L. Di Angelo, P. Di Stefano and A.E. Morabito

Comparison of mode decomposition methods tested on simulated surfaces 1053
Alex Ballu, Rui Gomes, Pedro Mimoso, Claudia Cristovao and Nuno Correia

Analysis of deformations induced by manufacturing processes of fine porcelain whiteware. 1063
Luca Puggelli, Yary Volpe and Stefano Giurgola

Characterization of a Composite Material Reinforced with Vulcanized Rubber 1073
D. Tobalina, F. Sanz-Adan, R. Lostado-Lorza, M. Martínez-Calvo, J. Santamaría-Peña, I. Sanz-Peña and F. Somovilla-Gómez

Definition of geometry and graphics applications on existing cosmetic packaging	1083
Anna Maria Biedermann, Aranzazu Fernández-Vázquez and Maria Elipe	

Part VIII Innovative Design

Section 8.1 Knowledge Based Engineering

A design methodology to predict the product energy efficiency through a configuration tool.	1097
Paolo Cicconi, Michele Germani, Daniele Landi and Anna Costanza Russo	

Design knowledge formalization to shorten the time to generate offers for Engineer To Order products	1107
Roberto Raffaeli, Andrea Savoretti and Michele Germani	

Customer/Supplier Relationship: reducing Uncertainties in Commercial Offers thanks to Readiness, Risk and Confidence Considerations.	1115
A. Sylla, E. Vareilles, M. Aldanondo, T. Coudert, L. Geneste and K. Kirytopoulos	

Collaborative Design and Supervision Processes Meta-Model for Rationale Capitalization	1123
Widad Es-Soufi, Esma Yahia and Lionel Roucoules	

Design Archetype of Gears for Knowledge Based Engineering	1131
Mariele Peroni, Alberto Vergnano, Francesco Leali and Andrea Brentegani	

The Role of Knowledge Based Engineering in Product Configuration	1141
Giorgio Colombo, Francesco Furini and Marco Rossoni	

Section 8.2 Industrial Design and Ergonomics

Safety of Manufacturing Equipment: Methodology Based on a Work Situation Model and Need Functional Analysis	1151
Mahenina Remiel Feno, Patrick Martin, Bruno Daille-Lefevre, Alain Etienne, Jacques Marsot and Ali Siadat	

Identifying sequence maps or locus to represent the genetic structure or genome standard of styling DNA in automotive design.	1159
Shahriman Zainal Abidin, Azlan Othman, Zafruddin Shamsuddin, Zaidi Samsudin, Halim Hassan and Wan Asri Wan Mohamed	

Generating a user manual in the early design phase to guide the design activities.	1167
Xiaoguang Sun, Rémy Houssin, Jean Renaud and Mickaël Gardoni	
Robust Ergonomic Optimization of Car Packaging in Virtual Environment	1177
Antonio Lanzotti, Amalia Vanacore and Chiara Percuoco	
Human-centred design of ergonomic workstations on interactive digital mock-ups	1187
Margherita Peruzzini, Stefano Carassai, Marcello Pellicciari and Angelo Oreste Andrisano	
Ergonomic-driven redesign of existing work cells: the “Oerlikon Friction System” case	1197
Alessandro Naddeo, Mariarosaria Vallone, Nicola Cappetti, Rosaria Califano and Fiorentino Di Napoli	
Section 8.3 Image Processing and Analysis	
Error control in UAV image acquisitions for 3D reconstruction of extensive architectures	1211
Michele Calì, Salvatore Massimo Oliveri, Gabriele Fatuzzo and Gaetano Sequenzia	
Accurate 3D reconstruction of a rubber membrane inflated during a Bulge Test to evaluate anisotropy	1221
Michele Calì and Fabio Lo Savio	
B-Scan image analysis for position and shape defect definition in plates	1233
Donatella Cerniglia, Tommaso Ingrassia, Vincenzo Nigrelli and Michele Scafidi	
Author Index	1241

Advances on Mechanics, Design Engineering and
Manufacturing

Proceedings of the International Joint Conference on
Mechanics, Design Engineering & Advanced
Manufacturing (JCM 2016), 14-16 September, 2016,
Catania, Italy

Eynard, B.; Nigrelli, V.; Oliveri, S.M.; Peris-Fajarnes, G.;
Rizzuti, S. (Eds.)

2017, XXIII, 1245 p. 710 illus., 350 illus. in color. In 2
volumes, not available separately., Softcover

ISBN: 978-3-319-45780-2
