

Contents

1	Introduction	1
1.1	Context and Motivation	1
1.2	Outline of the Book	6
	References.	7
2	Related Work	15
2.1	Petri Nets and Interpreted Petri Nets.	15
2.2	Computational Complexity of Algorithms	27
	References.	28
3	Perfect Graphs and Comparability Graphs	31
3.1	Preliminaries.	31
3.2	Perfect Graphs	36
3.3	Comparability Graphs.	38
3.4	Recognition and Coloring of Comparability Graphs.	42
3.4.1	Recognition of Comparability Graphs	42
3.4.2	Coloring of Comparability Graphs	45
	References.	47
4	Hypergraphs and Exact Transversals	49
4.1	Main Definitions and Properties of Hypergraphs	49
4.2	Properties of C-Exact Hypergraphs.	52
4.3	Algorithms Related to C-Exact Hypergraphs	53
	References.	56
5	Analysis of Concurrent Control Systems	59
5.1	State Equation and Place Invariants	59
5.2	Concurrency Analysis.	64
5.3	Sequentiality Analysis.	69
5.4	Properties of Concurrency and Sequentiality Hypergraphs	72
	References.	74

6	Decomposition of Concurrent Control Systems	77
6.1	SM-Decomposition Based on Place Invariants	78
6.1.1	The Idea of Method	78
6.1.2	Examples.	80
6.2	SM-Decomposition Based on Graph Theory.	85
6.2.1	The Idea of Method	85
6.2.2	Examples.	87
6.3	SM-Decomposition Based on Hypergraph Theory	90
6.3.1	The Idea of Method	90
6.3.2	Examples.	91
	References.	97
7	Prototyping of Concurrent Control Systems	99
7.1	Prototyping Flow of the Concurrent Systems	99
7.1.1	Specification by an Interpreted Petri Net.	99
7.1.2	Decomposition of the System	100
7.1.3	Modeling of the Decomposed Modules.	102
7.1.4	Verification of the System.	102
7.1.5	Implementation of the System.	103
7.2	Prototyping of Integrated Concurrent Control Systems.	103
7.2.1	Specification by an Interpreted Petri Net.	104
7.2.2	Decomposition and Synchronization of the System.	107
7.2.3	Modeling of the Decomposed Modules as FSMs	109
7.2.4	Verification of the System (Software Simulation)	112
7.2.5	Implementation of the System.	113
	References.	113
8	Modelling of Concurrent Systems in Hardware Languages	117
8.1	Traditional Modelling of Concurrent Systems in Hardware Description Languages	117
8.1.1	The Basic Assumptions.	118
8.1.2	Description of Transitions, Places, Outputs	118
8.1.3	Description of Concurrency.	120
8.1.4	Description of Conflicts	122
8.1.5	Examples.	124
8.2	Modelling of Concurrent Systems as a Composition of Sequential Automata	128
8.2.1	Description of an FSM in Verilog.	128
8.2.2	Examples.	131
	References.	136
9	Implementation of Concurrent Control Systems in FPGA	139
9.1	Introduction to the Programmable Devices	139
9.2	Field Programmable Gate Arrays	141
9.3	Implementation of Concurrent Controllers in FPGA.	145

- 9.4 Partial Reconfiguration of Concurrent Controllers. 146
 - 9.4.1 The Idea of Partial Reconfiguration of an FPGA 147
 - 9.4.2 Partial Reconfiguration of Concurrent Systems 148
 - 9.4.3 Static Partial Reconfiguration 149
 - 9.4.4 Dynamic Partial Reconfiguration. 154
- References. 164
- 10 Conclusions 167**
- Index 171**

Prototyping of Concurrent Control Systems
Implemented in FPGA Devices

Wiśniewski, R.

2017, XI, 173 p. 90 illus., 26 illus. in color., Hardcover

ISBN: 978-3-319-45810-6
