

Contents

1	Introductory Remarks	1
1.1	Noncommutativity, Fuzziness and Matrices	1
1.2	Noncommutativity in Quantum Mechanics	3
1.3	Matrix Yang-Mills Theories	5
1.4	Noncommutative Scalar Field Theory	8
	References	12
2	The Noncommutative Moyal-Weyl Spaces \mathbf{R}_θ^d	19
2.1	Heisenberg Algebra and Coherent States	19
2.1.1	Representations of the Heisenberg-Weyl Algebra	19
2.1.2	Coherent States	21
2.1.3	Symbols	25
2.1.4	Weyl Symbol and Star Products	30
2.2	Noncommutativity from a Strong Magnetic Field	36
2.3	Noncommutative Moyal-Weyl Spacetimes	41
2.3.1	Algebra, Weyl Map, Derivation and Integral/Trace	41
2.3.2	Star Product and Scalar Action	46
2.3.3	The Langmann-Szabo-Zarembo Models	47
2.3.4	Duality Transformations and Matrix Regularization	52
2.3.5	The Grosse-Wulkenhaar Model	55
2.3.6	A Sphere Basis	58
2.4	Other Spaces	59
2.4.1	The Noncommutative/Fuzzy Torus	59
2.4.2	The Fuzzy Disc of Lizzi-Vitale-Zampini	68
	References	70
3	The Fuzzy Sphere	73
3.1	Quantization of \mathbf{S}^2	73
3.1.1	The Algebra $C^\infty(\mathbf{S}^2)$ and the Coadjoint Orbit $SU(2)/U(1)$	73
3.1.2	The Symplectic Form $d \cos \theta \wedge d\phi$	75
3.1.3	Quantization of the Symplectic Form on \mathbf{S}^2	77

3.2	Coherent States and Star Product on Fuzzy S_N^2	80
3.3	The Flattening Limit of R_θ^2	88
3.3.1	Fuzzy Stereographic Projection	88
3.3.2	Coherent States and Planar Limit	91
3.3.3	Technical Digression	94
3.4	The Fuzzy Sphere: A Summary	96
3.5	Fuzzy Fields and Actions	103
3.5.1	Scalar Action on S_N^2	103
3.5.2	Extension to $S_N^2 \times S_N^2$	103
3.6	Introducing Fuzzy CP^2	106
3.7	Fuzzy Fermions	108
3.7.1	Continuum Dirac Operators	109
3.7.2	Fuzzy Dirac Operators	112
	References	117
4	Quantum Noncommutative Phi-Four	119
4.1	The UV-IR Mixing	119
4.2	The Stripe Phase	123
4.2.1	The Disordered Phase	123
4.2.2	The Ordered Phase	129
4.2.3	The Phase Structure: A Lifshitz Triple Point	132
4.2.4	Stripes in 2 Dimension	137
4.3	The Self-Dual Noncommutative Phi-Four	149
4.3.1	Integrability and Exact Solution	149
4.3.2	Nonperturbative UV-IR Mixing	161
4.4	Noncommutative Phi-Four on the Fuzzy Sphere	163
4.4.1	Action and Limits	163
4.4.2	The Effective Action and The 2-Point Function	164
4.4.3	The 4-Point Function and Normal Ordering	167
4.4.4	The Phase Structure and Effective Potential	169
4.4.5	Fuzzy $S^2 \times S^2$ and Planar Limit: First Look	172
4.4.6	More Scalar Actions on Moyal-Weyl Plane and Fuzzy Sphere	176
4.5	Monte Carlo Simulations	185
4.5.1	Fuzzy Sphere: Algorithms and Phase Diagram	185
4.5.2	Fuzzy Torus: Dispersion Relations	190
4.6	Initiation to the Wilson Renormalization Group	191
4.6.1	The Wilson-Fisher Fixed Point in NC Φ^4	191
4.6.2	The Noncommutative $O(N)$ Wilson-Fisher Fixed Point	203
4.6.3	The Matrix Fixed Point	203
	References	204
5	The Multitrace Approach	207
5.1	Phase Structure of Fuzzy and Noncommutative Φ^4	207
5.2	Noncommutative Phi-Four Revisited	209

5.2.1	The Moyal-Weyl Plane $\mathbf{R}_{\theta,\Omega}^2$	209
5.2.2	The Fuzzy Sphere $\mathbf{S}_{N,\Omega}^2$	211
5.3	Multitrace Approach on the Fuzzy Sphere	213
5.4	The Real Quartic Multitrace Matrix Model on $\mathbf{R}_{\theta,\Omega}^2$ and $\mathbf{S}_{N,\Omega}^2$	221
5.4.1	Setup	221
5.4.2	The Effective Matrix Action	226
5.5	Matrix Model Solution	236
5.5.1	Scaling	236
5.5.2	Saddle Point Equation	239
5.6	The Real Quartic Matrix Model	242
5.6.1	Free Theory	243
5.6.2	The Symmetric One-Cut (Disordered) Phase	243
5.6.3	The Two-Cut (Non-uniform-Ordered) Phase	246
5.6.4	The Asymmetric One-Cut (Uniform-Ordered) Phase	249
5.7	Multicut Solutions of the Multitrace Matrix Model	250
5.7.1	The One-Cut Phase	250
5.7.2	The Two-Cut Phase	254
5.7.3	The Triple Point	255
5.8	The Planar Theory	260
5.8.1	The Wigner Semicircle Law	260
5.8.2	Introducing Fuzzy Projective Spaces	264
5.8.3	Fuzzy Tori Revisited	266
5.9	The Non-perturbative Effective Potential Approach	269
	References	273
6	Noncommutative Gauge Theory	277
6.1	Gauge Theory on Moyal-Weyl Spaces	277
6.2	Renormalized Perturbation Theory	279
6.2.1	The Effective Action and Feynman Rules	279
6.2.2	Vacuum Polarization	283
6.2.3	The UV-IR Mixing and The Beta Function	286
6.3	Quantum Stability	289
6.3.1	Effective Potential	289
6.3.2	Impact of Supersymmetry	291
6.4	Initiation to Noncommutative Gauge Theory on the Fuzzy Sphere	294
6.5	Gauge Theory on The Noncommutative Torus	299
6.5.1	The Noncommutative Torus T_θ^d Revisited	299
6.5.2	$U(N)$ Gauge Theory on T_θ^d	301
6.5.3	The Weyl-'t Hooft Solution	302
6.5.4	$SL(d, \mathbb{Z})$ Symmetry	305
6.5.5	Morita Equivalence	307
	References	312
