

Contents

1	Introduction	1
	Bibliography	3
2	The Main Issues	5
2.1	<i>Time</i> and <i>Space</i> in Everyday Life.	6
2.2	Dialectics of <i>Time</i> and Dialectics of <i>Space</i>	6
2.3	The Lack of Theory	7
2.4	The Problem Situation	8
	Bibliography	8
3	The Failure of Dialectics	9
3.1	Confusion Between <i>Time</i> and <i>Event</i>	10
3.2	Terminological Confusion.	12
3.3	Truisms and Pleonasms	12
3.4	Adjunction of Exotic Concepts.	13
	3.4.1 The Concept	13
	3.4.2 Concept and Exo-Concept.	13
	3.4.3 Conception and Artifact.	14
3.5	The Dichotomy Between <i>Time</i> and <i>Space</i>	15
3.6	Metaphors with <i>Time</i> and <i>Space</i>	16
	3.6.1 The Dynamics of <i>Time</i>	16
	3.6.2 The Action of <i>Time</i>	17
	3.6.3 The <i>Arrow of Time</i>	19
	3.6.4 Metaphors of <i>Space</i>	19
3.7	Sensitive Topics	19
	Bibliography	21
4	Reality, Concepts, and Models	23
4.1	Reality and Mathematics.	23
	4.1.1 Naturalia	23
	4.1.2 Mathematical Artefacts	24

4.2	The Origin of Mathematics	24
4.3	The Association of Nature and Culture	25
4.4	Mathematical Modeling of Reality	26
4.4.1	Arithmetical Modeling	26
4.4.2	Geometrical Modeling	27
4.4.3	Statistical Modeling	28
4.4.4	The Rest of the Universe	28
4.4.5	<i>Diachrony</i> of Physical Laws	29
4.5	Field Effects	30
4.5.1	<i>Primary Field Effects</i> (PFE)	31
4.5.2	<i>Technical Field Effects</i> (TFE)	31
4.5.3	The <i>Field Model Effect</i> (FME)	32
	Bibliography	34
5	Origins of Time and Origins of Space	35
5.1	Discoveries or Inventions?	35
5.2	Parietal Iconography	37
5.3	Precursors of <i>Temporality</i> and <i>Spatiality</i>	39
5.4	The Sign in Africa	40
5.4.1	The Dogon	41
5.4.2	The Luba	42
5.5	The Mayan Empire	43
5.6	India	44
5.7	Greece	45
5.8	Rome and Roman Times	48
5.8.1	Time Precursors	48
5.8.2	Space Precursors	51
5.8.3	Composite Precursors	55
5.9	China	57
5.9.1	Time	58
5.9.2	Space	58
5.10	Sun Worship	59
5.10.1	The Nebra Sky Disk	59
5.10.2	The Trundholm Sun Chariot	60
5.10.3	Sun Worship in Egypt	61
5.11	The Symbol of Spread Wings	61
5.11.1	Shamanism	61
5.11.2	Bactria	61
5.11.3	Gandhara	61
5.11.4	Greece	62
5.11.5	Luristan	62
5.11.6	Venice	62
5.11.7	The Roman Empire	62
5.11.8	Christianity	62

5.12	The Winged Sun.	63
5.12.1	Phoenicia.	65
5.12.2	Mitanni	65
5.12.3	The Hittite Empire.	65
5.12.4	Assyria	68
5.12.5	Persia.	68
5.12.6	Mesopotomia.	69
5.12.7	Nowadays	69
5.13	Proto-Temporality in Egypt	69
5.14	Proto-Spatiality in Tuareg Culture	71
5.15	Proto-Temporality in the Hittite Empire	72
5.16	Proto-Temporality in Mesopotamia.	73
	Bibliography	76
6	Definitions and Nature of Time	79
6.1	Defining the <i>Units of Time</i>	80
6.1.1	Definition of the <i>Day</i>	80
6.1.2	Definition of the <i>Hour</i>	81
6.1.3	Definition of the <i>Year</i>	82
6.1.4	Definition of the <i>Second</i>	83
6.1.5	Reality and Concepts.	84
6.1.6	The Substitution Rule	85
6.2	The State of a System.	85
6.2.1	Transtability.	86
6.2.2	Speed and Rate of Transtability.	87
6.2.3	Radio-Dating	88
6.2.4	Thermoluminescence	89
6.2.5	Entomological Dating	90
6.3	Definitions of <i>Time</i>	90
6.3.1	Definition of <i>Time</i> via the Earth/Sun Configuration.	91
6.3.2	With a Conventional Clock	92
6.3.3	With a Cesium Clock	92
6.3.4	General Definition	93
6.4	Phenomenology of <i>Time</i>	93
6.4.1	<i>Time</i> Cannot Be Detected	93
6.4.2	<i>Time</i> Is Powerless	94
6.4.3	<i>Time</i> Has No Source	94
6.5	The Etiology of <i>Aging</i>	94
6.5.1	The Aging of a Population of “N ₀ ” Bacteria.	96
6.5.2	The Aging of Cells	97
6.5.3	The Etiology of <i>Aging</i>	98
6.6	Physical Properties of <i>Time</i>	101
6.7	The Nature of <i>Time</i>	102
6.7.1	The Association of <i>Time</i> and Physical State	102

6.7.2	The Nature of the Concept of <i>Time</i>	102
6.7.3	The Role of <i>Time</i>	103
	Bibliography	105
7	Definition and Nature of <i>Space</i>	107
7.1	The Conceptualization of <i>Space</i>	107
7.2	Length, Distance, <i>Meter</i> , and Metric System	109
7.2.1	Length	110
7.2.2	Distance	110
7.2.3	The Birth of the <i>Meter</i>	110
7.2.4	The Metric System	111
7.2.5	Definitions of the <i>Meter</i>	112
7.3	Space	114
7.3.1	Physical Space	115
7.3.2	<i>Empty Space (Vacuum)</i> and the <i>Induction Rule</i>	116
7.3.3	Are <i>Time</i> and <i>Space</i> Measurable?	119
	Bibliography	120
8	Mathematical Properties of <i>Time</i> and <i>Space</i>	121
8.1	Representations of <i>Time</i> and <i>Space</i>	121
8.1.1	The <i>Time-Space</i> Dichotomy	122
8.1.2	Speed	123
8.2	<i>Time</i> , <i>Space</i> , and Chance	123
8.2.1	Phenomenology of Chance	124
8.2.2	Stochastic <i>Time</i>	125
8.2.3	Stochastic <i>Space</i>	125
8.3	<i>Time</i> , <i>Space</i> , and Relativity	126
8.3.1	Special Relativity	126
8.3.2	General Relativity	128
8.4	Experiments on <i>Time</i> and <i>Space</i>	129
8.4.1	Action of Gravity on a Clock	129
8.4.2	Poincaré Resonances	130
8.4.3	Five Attempts with Special Relativity	130
8.4.4	Three Attempts with General Relativity	132
8.5	<i>Quantum Time</i> and <i>Quantum Space</i>	134
8.5.1	The State of a Quantum System	135
8.5.2	Definition and Nature of <i>Quantum Time</i>	135
8.5.3	Quantum Space	136
8.6	The Polymorphism of <i>Time</i> and <i>Space</i>	137
8.6.1	Mathematical Properties of <i>Time</i> and <i>Space</i>	137
8.6.2	The CPT Theorem	138
8.7	General Properties of <i>Time</i> and <i>Space</i>	138
	Bibliography	139

9	Historical Overview of <i>Time</i> and <i>Space</i>	141
9.1	The Conceptualization of <i>Time</i>	141
9.1.1	Observation	141
9.1.2	Repetition	142
9.1.3	Designation	143
9.1.4	The Concept of <i>Time</i>	144
9.2	The Conceptualization of <i>Space</i>	144
9.2.1	Observation	144
9.2.2	Representation	145
9.2.3	Designation	145
9.2.4	The Concept of <i>Space</i>	145
9.3	Evolution of the Concepts of <i>Time</i> and <i>Space</i>	145
9.3.1	The Prototypal Era	145
9.3.2	The Typal Era	146
9.3.3	The Archetypal Era	147
9.4	Complexification of the Concepts of <i>Time</i> and <i>Space</i>	148
9.4.1	Archetype or Prototype?	148
9.4.2	The Complexification of Concepts	148
9.4.3	Prospects	149
	Bibliography	149
10	First Consequences of Non-existence	151
10.1	A Heterodox Methodology	152
10.1.1	Elements of the Theory	152
10.1.2	Main Steps in This Theorization	153
10.2	Some Consequences of Non-existence	154
10.2.1	In Representations	154
10.2.2	The <i>Beginning</i> of an Event	155
10.2.3	Prediction	158
10.2.4	Demography and <i>Age</i>	159
10.2.5	The Logic of <i>Time</i> and <i>Space</i>	159
10.2.6	Achrony and Atopy	160
10.2.7	Diachrony of <i>Fundamental Constants</i>	161
10.2.8	Toward New Reference Parameters	163
10.3	Critical Review of Theorizations	164
10.3.1	Obvious Weaknesses	164
10.3.2	Novel Approaches	165
	Bibliography	165
11	Conclusion	167
12	Specific Glossary	169

The Invention of Time and Space

Origins, Definitions, Nature, Properties

Dassonville, P.F.

2017, XVII, 176 p. 46 illus., 3 illus. in color., Hardcover

ISBN: 978-3-319-46039-0
