Contents

1 Introduction to Optical Network 1
1.1 Introduction 1
1.1.1 Synchronous Optical Networking/Synchronous Digital Hierarchy 2
1.2 Optical Network Architecture 4
1.2.1 Broadcast-and-Select Optical Networks 4
1.2.2 Wavelength-Routed Optical Networks 5
1.3 Principles of Optical Fiber 7
1.3.1 Linear Impairments 9
1.3.2 Non-linear Impairments 10
1.4 Wavelength Division Multiplexing 10
1.5 Basic Components of WDM Optical Networks 11
1.6 Current Research Issues and Challenges 14
1.7 Organization of the Book 15
References 16

2 Literature Survey 17
2.1 Introduction 17
2.2 Lightpath Establishment 17
2.2.1 Static Lightpath Establishment 18
2.2.2 Dynamic Lightpath Establishment 18
2.3 Routing 19
2.3.1 Fixed Routing 19
2.3.2 Fixed Alternate Routing 20
2.3.3 Least Congested Routing 20
2.3.4 Adaptive Routing 20
2.4 Wavelength Assignment 22
2.4.1 First Fit 22
2.4.2 Least Used 23
2.4.3 Most Used 23
2.4.4 Random Wavelength Assignment 23

2.5 Traffic Grooming 25
2.5.1 Single-hop Traffic Grooming 25
2.5.2 Multi-hop Traffic Grooming 28
2.6 Fault Management 28
2.6.1 Protection 29
2.6.2 Restoration 31
2.7 Conclusion 31
References 31

3 Performance Analysis of Major Conventional Routing and Wavelength Assignment Approaches 35
3.1 Introduction 35
3.2 Model and Assumptions 35
3.3 Performance Analysis 36
3.3.1 Routing 38
3.3.2 Wavelength Assignment 41
3.4 Conclusion 42
References 43

4 End-to-End Traffic Grooming 45
4.1 Introduction 45
4.2 Model and Assumptions 46
4.3 Node Architecture 46
4.4 End-to-End Traffic Grooming 48
4.5 Performance Analysis 48
4.6 Conclusion 50
References 50

5 Priority-Based Routing and Wavelength Assignment Scheme 51
5.1 Introduction 51
5.2 Model and Assumptions 52
5.3 Priority-Based Routing and Wavelength Assignment Scheme 52
5.3.1 Priority Order Estimation 54
5.3.2 RWA Approach 56
5.4 Performance Analysis 57
5.4.1 Blocking Case 58
5.4.2 Non-blocking Case 61
5.5 Conclusion 62
References 63

6 Priority-Based Dispersion-Reduced Wavelength Assignment Scheme 65
6.1 Introduction 65
6.2 Model and Assumptions 66
6.3 System Description 68

6.4 Priority-Based Dispersion-Reduced Wavelength Assignment Scheme . . . 69
6.5 Performance Analysis . . . 71
6.5.1 Non-blocking Case . . . 75
6.5.2 Blocking Case . . . 77
6.5.3 Q-Factor Analysis . . . 78
6.6 Conclusion . . . 82
References . . . 83

7 A Reliable Fault Resilience Scheme . . . 85
7.1 Introduction . . . 85
7.2 Model and Assumptions . . . 87
7.3 Fault Detection Network Architecture . . . 87
7.3.1 Link and Amplifier Fault Detection . . . 87
7.3.2 Node Fault Detection . . . 90
7.4 Reliable Fault Resilience Scheme . . . 90
7.5 Performance Analysis . . . 94
7.5.1 Reliability Measurement . . . 95
7.5.2 Blocking Probability . . . 97
7.6 Conclusion . . . 98
References . . . 99

8 Limitations of Conventional WDM Optical Networks and Elastic Optical Networks for Possible Solutions . . . 101
8.1 Introduction . . . 101
8.2 Concept of Elastic Optical Networks . . . 102
8.3 Elastic Network Architecture . . . 104
8.3.1 Bandwidth-Variable Transponder . . . 104
8.3.2 Bandwidth-Variable Cross-Connect . . . 106
8.4 Node Architectures . . . 108
8.4.1 Broadcast-and-Select . . . 108
8.4.2 Spectrum Routing . . . 109
8.4.3 Switch and Select with Dynamic Functionality . . . 110
8.4.4 Architecture on Demand . . . 110
8.4.5 Comparing Node Architectures . . . 112
8.5 Conclusion . . . 113
References . . . 113

Routing and Wavelength Assignment for WDM-based Optical Networks
Quality-of-Service and Fault Resilience
Chatterjee, B.C.; Sarma, N.; Sahu, P.P.; Oki, E.
2017, XV, 115 p. 77 illus., 2 illus. in color., Hardcover
ISBN: 978-3-319-46202-8
