# Contents

## Part I Invited Lectures

<b>Studies of Shock Wave Reflections and Interactions (Paul Vieille Lecture) . . . . .</b>	<b>3</b>
B.W. Skews	
<b>Dispelling Misconceptions about Blast Waves (Irvine Israel Glass Lecture) . . . . .</b>	<b>11</b>
Charles Needham	
<b>A Review of the Richtmyer-Meshkov Instability from an Experimental Perspective . . . . .</b>	<b>23</b>
R. Bonazza	
<b>Medical and Biomedical Applications of Shock Waves: The State of the Art and the Near Future . . . . .</b>	<b>29</b>
Achim M. Loske	
<b>Making Shock Waves Pay: The Commercial Aspects of Shock Waves . . . . .</b>	<b>35</b>
K.P.J. Reddy	
<b>Time-Developing 3D-CT Measurement of Shock Waves and Supersonic Density Flow Field . . . . .</b>	<b>39</b>
K. Maeno	
<b>Chemical Kinetics and Reacting Flows . . . . .</b>	<b>47</b>
R.K. Hanson and D.F. Davidson	
<b>Shock-Induced Combustion and Its Applications to Power and Thrust Generation . . . . .</b>	<b>53</b>
M. Brouillette, M. Picard, D. Rancourt, and J.-S. Plante	
<b>The Shock Fitting Technique from Gino Moretti Towards the Future . . . . .</b>	<b>59</b>
Marcello Onofri, Francesco Nasuti, Renato Paciorri, and Aldo Bonfiglioli	

## Part II Nozzle Flow

<b>New Modified Pekkari Model to Analyse the Aeroelastic Stability Behaviour for a Flexible Overexpanded Rocket Nozzle . . . . .</b>	<b>67</b>
N. Bekka, M. Sellam, and A. Chpoun	
<b>Adaptation of the Transpiration Method to Simulate the Fluid–Structure Interaction Phenomena for a Flexible Overexpanded Rocket Nozzle . . . . .</b>	<b>71</b>
N. Bekka, M. Sellam, and A. Chpoun	
<b>Transverse Jet Injection into a Supersonic Nozzle Flow . . . . .</b>	<b>77</b>
V. Emelyanov, K. Volkov, and M. Yakovchuck	

<b>Flow Visualization in Out-of-Round Rocket Nozzles . . . . .</b>	<b>83</b>
C. Génin, S. Jack, and R. Stark	
<b>Effect of the Adiabatic Index on the Shock Reflection in Overexpanded Nozzle Flow . . . . .</b>	<b>89</b>
Emanuele Martelli, Barbara Betti, Francesco Nasuti, and Marcello Onofri	
<b>Mixing Enhancement in Free Jets from Supersonic ESTS Lobed Nozzles . . . . .</b>	<b>95</b>
Albin Varghese, S.K. Karthick, Srisha M.V. Rao, and Gopalan Jagadeesh	
<b>Study of Cluster Linear Plug Nozzle Flow Field in Freestream Flow . . . . .</b>	<b>101</b>
M. Viji, Kiran Chutkey, and S.B. Verma	
<b>Studies in Free Jets from Supersonic ESTS Lobed Nozzles . . . . .</b>	<b>107</b>
Albin Varghese, P. Suriyanarayanan, Srisha M.V. Rao, and Gopalan Jagadeesh	
<b>Unsteadiness of Supersonic Flows in Over-Expanded Nozzles . . . . .</b>	<b>113</b>
A. Piquet, A. Georges-Picot, and A. Hadjadj	
<b>Design of Optimized Two-Dimensional Scramjet Nozzle Contour for Hypersonic Vehicle Using Evolutionary Algorithms . . . . .</b>	<b>119</b>
A. Govinda, Manoj Kumar K. Devaraj, Yogendra Singh, Nimesh Thakor, Venkat Rao Kulkarni, S.N. Omkar, and Gopalan Jagadeesh	
<b>Passive Flow Control in Laval Nozzles Due to Bypass Mass Flow in Narrow Longitudinal Gaps . . . . .</b>	<b>125</b>
M. Giglmaier, M. Krüger-Sprengel, J.F. Quaatz, and N.A. Adams	
<b>Part III Hypersonic Flow</b>	
<b>Investigation of Chemical Non-equilibrium Hypersonic Flows in Carbon Dioxide–Nitrogen Atmospheres Using a Coupled Euler–Boundary-Layer Method . . . . .</b>	<b>133</b>
M. Starkloff and Ch. Mundt	
<b>Radiative Heat flux Measurements for Titan Atmospheric Entry Condition in a Superorbital Expansion Tunnel . . . . .</b>	<b>139</b>
H. Porat, R.G. Morgan, and T.J. McIntyre	
<b>Study of Hypersonic Dissociating Flows over Spheres Using the Space-Time CE/SE Method . . . . .</b>	<b>145</b>
H. Saldivar Massimi, H. Shen, and C.Y. Wen	
<b>The Direct Measurement of Skin Friction in Shock Tunnel . . . . .</b>	<b>149</b>
Lv Zhiguo, Li Guojun, Zhao Rongjuan, Jiang Hua, Liu Jichun, Huang Jun, and Liu Shiran	
<b>Effects of Attack Angle on Starting Performance of a Hypersonic Inlet . . . . .</b>	<b>155</b>
Shuaitao Guo, Wenzhi Gao, Enlai Zhang, Zhufei Li, and Jiming Yang	
<b>Optimization of Hypersonic Power Law Derived Waverider Using TLBO . . . . .</b>	<b>161</b>
Yogendra Singh, Manoj Kumar K. Devaraj, S.N. Omkar, and Gopalan Jagadeesh	

<b>Experimental Analysis of Shock Standoff Distance in Hypersonic Flows over Spherical Bodies . . . . .</b>	<b>167</b>
Ruchi Thakur and Gopalan Jagadeesh	
<b>Oscillatory Behaviors of a Hypersonic Inlet with Trips . . . . .</b>	<b>173</b>
Wenzhi Gao, Shuaitao Guo, Zhufei Li, and Jiming Yang	
<b>Aerodynamic Force and Moment Measurement Under Duplicated Hypersonic Flight Conditions in the JF12 Shock Tunnel . . . . .</b>	<b>179</b>
Z. Jiang, Y. Wang, Y. Liu, and C. Yuan	
<b>Part IV Supersonic and Hypersonic Flows with Shocks</b>	
<b>A Method of Detecting Self-Starting Ability of Hypersonic Inlets: A Numerical Investigation . . . . .</b>	<b>185</b>
Zhufei Li and Jiming Yang	
<b>Experimental Investigation on the Self-Starting Characteristics of Hypersonic Inlets . . . . .</b>	<b>191</b>
Xiao Xu, Lianjie Yue, Yinan Jia, and Xinyu Chang	
<b>An Investigation of Type IV Shock Interaction Over a Blunt Body with Forward-Facing Cavity . . . . .</b>	<b>199</b>
F.S. Xiao, Zhufei Li, Yujian Zhu, and Jiming Yang	
<b>Particularities of the Shock Wave Propagation Through the Region of Gas Discharge Plasma . . . . .</b>	<b>205</b>
Tatiana Lapushkina, Alexandr Erofeev, and Sergei Poniaev	
<b>Numerical Research of Supersonic Mixing in Conditions of Localized Pulse-Periodic Energy Supply Upstream of Tandem Shock and Expansion Waves . . . . .</b>	<b>211</b>
E. Pimonov and A. Zheltovodov	
<b>Effect of Differential Sweep on a Three-Dimensional Sidewall-Type Intake at Mach 3.5 . . . . .</b>	<b>217</b>
C. Manisankar and S.B. Verma	
<b>Experimental Study of Dynamic Characteristics of Oblique Shock Trains in Mach 5 Flow . . . . .</b>	<b>223</b>
C.P. Wang, X.A. Tian, and K.M. Cheng	
<b>Aero-Optical Measurement in Shock Wave of Hypersonic Flow Field . . . . .</b>	<b>229</b>
Sangyoon Lee, Man Chul Jeong, In-Seuck Jeung, Hyoung Jin Lee, and Jong Kook Lee	
<b>Super-/Hypersonic Aero-Optical Effects Induced by External Jet Cooling . . . . .</b>	<b>233</b>
Sangyoon Lee, Hee Yoon, In-Seuck Jeung, Hyoung Jin Lee, and Jong Kook Lee	
<b>Thermal Analysis of Scramjet Combustor Panel with Active Cooling Using Cellular Materials . . . . .</b>	<b>239</b>
Ragini Mukherjee, N.K. Gopinath, V. Vignesh, Anupam Purwar, and D. Roy Mahapatra	
<b>A Methodology for Coupled Thermal-Structural Analysis and Structural Design of Scramjet Combustor . . . . .</b>	<b>245</b>
Anupam Purwar, D. Roy Mahapatra, Nimesh Thakor, K.S. Priyamvada, and Ragini Mukherjee	

<b>Thermomechanical Deformation Behavior of a Hypersonic Waverider Using Finite Element Method . . . . .</b>	<b>251</b>
N.K. Gopinath, V. Vignesh, Yogendra Singh, Manoj Kumar K. Devaraj, and D. Roy Mahapatra	
<b>Effect of Mach Number on Shock Oscillations in Supersonic Diffusers . . . . .</b>	<b>257</b>
S. Manoj Prabakar, Chimakurthy Srikanth, and T.M. Muruganandam	
<b>Turbulence Compressibility Effects for Supersonic and Hypersonic Separated Flows . . . . .</b>	<b>263</b>
S. Seror and L. Kosarev	
<b>Imaging of the Conical Kelvin-Helmholtz Instability . . . . .</b>	<b>269</b>
R.T. Paton and B.W. Skews	
<b>Shock Standoff Distance over Spheres in Unsteady Flows . . . . .</b>	<b>275</b>
T. Kikuchi, Kazuyoshi Takayama, Dan Igra, and J. Falcovitz	
<b>Part V Supersonic Jets</b>	
<b>The Formation of Mach Waves from Supersonic Jets with Outer Co-flowing . . . . .</b>	<b>281</b>
H. Oertel sen., F. Seiler, and J. Srulijes	
<b>The Limits of Mach Wave Emission from Supersonic Jets . . . . .</b>	<b>287</b>
H. Oertel sen., F. Seiler, and J. Srulijes	
<b>Overexpanded Jet Flow Theoretical Analysis in the Vicinity of the Nozzle Lip . . . . .</b>	<b>293</b>
M.V. Silnikov, M.V. Chernyshov, and V.N. Uskov	
<b>Design and Validation of an Uncooled Pitot Probe for Hot, Supersonic Flow Investigations . . . . .</b>	<b>299</b>
Felix J. Förster, Nils C. Dröske, Jens von Wolfersdorf, and Bernhard Weigand	
<b>Large Eddy Simulation of a Supersonic Underexpanded Square Jet . . . . .</b>	<b>305</b>
Huanhao Zhang and Zhihua Chen	
<b>Part VI Chemical Kinetics and Chemical Reacting Flows</b>	
<b>Species Time-History Measurements During Jet Fuel Pyrolysis . . . . .</b>	<b>309</b>
D.F. Davidson, A. Tulgestke, Y. Zhu, S. Wang, and R.K. Hanson	
<b>Rapid Chemiluminescent Imaging Behind Reflected Shock Waves . . . . .</b>	<b>313</b>
D.F. Davidson, A. Tulgestke, C. Strand, M.F. Campbell, V.A. Troutman, V.A. Miller, and R.K. Hanson	
<b>Shock Tube Experimental and Theoretical Study on the Thermal Decomposition of 2-Phenylethanol . . . . .</b>	<b>317</b>
M. Kiran Singh, K.P.J. Reddy, and E. Arunan	
<b>Soot Formation During Pyrolysis and Oxidation of Aliphatic and Aromatic Hydrocarbons in Shock Waves: Experiments and Detailed Kinetic Modeling . . . . .</b>	<b>321</b>
G.L. Agafonov, I.V. Bilera, Y.A. Kolbanovsky, V.N. Smirnov, A.M. Tereza, and P.A. Vlasov	
<b>3-Carene Oxidation Mechanism . . . . .</b>	<b>327</b>
N. Sharath, K.P.J. Reddy, P.K. Barhai, and E. Arunan	
<b>Shock Tube Ignition Delay Studies of Dicyclopentadiene . . . . .</b>	<b>333</b>
Kunal V. Dhoke, K.P.J. Reddy, and E. Arunan	

<b>Model Order Reduction for Reacting Flows: Laminar Gaussian Flame Applications . . . . .</b>	<b>337</b>
Van Bo Nguyen, H.-S. Dou, K. Willcox, and Boo-Cheong Khoo	
<b>Numerical Simulation of the Flow with Chemical Reactions Around a Wedge . . . . .</b>	<b>345</b>
Georgy Shoen and Yevgeny A. Bondar	
<b>Computations of a Shock Layer Flow Field with Global and Detailed Chemistry Models . . . . .</b>	<b>351</b>
Marie-Claude Druguet, Arnaud Bultel, Julien Annaloro, and Pierre Omaly	
<b>On a Relaxation Zone Structure for Shock Waves Forming in Non-equilibrium Air Flows . . . . .</b>	<b>357</b>
O. Kunova and E. Nagnibeda	
<b>Investigation of Non-catalytic Reaction of Shock-Heated Nitrogen Gas with Powder SiO<sub>2</sub> . . . . .</b>	<b>361</b>
Jayaram Vishakantaiah, Ranjith Ravichandran, H.K.T. Kumara, K. Subba Rao, and K.P.J. Reddy	
<b>Part VII Detonation, Combustion and Ignition</b>	
<b>On the Deflagration-to-Detonation Transition in Narrow Tube with Varying Prechamber-Initiator . . . . .</b>	<b>369</b>
S. Golovastov, G. Bivol, and V. Golub	
<b>Experimental Research on Deflagration-to-Detonation Transition (DDT) in an S-Shaped Tube . . . . .</b>	<b>375</b>
Li Lei, Teo Chiang Juay, Li Jiun-Ming, Po-Shiung Chang, and Boo-Cheong Khoo	
<b>DDT Triggered by SWBLI: Numerical and Experimental Research . . . . .</b>	<b>381</b>
E. Dzieminska, A.K. Hayashi, T. Machida, and J. Misawa	
<b>Flame Acceleration and DDT in a Torus Geometry . . . . .</b>	<b>385</b>
M. Kuznetsov, J. Yanez, and J. Grune	
<b>Unconfined Hybrid Detonation in Gas-Particle Flow . . . . .</b>	<b>391</b>
F. Zhang, A. Yoshinaka, and R.C. Ripley	
<b>Numerical Simulation of Combustion Process for Two-Phase Fuel Flows Related to Pulse Detonation Engines . . . . .</b>	<b>397</b>
Van Bo Nguyen, Li Jiun-Ming, Teo Chiang Juay, and Boo-Cheong Khoo	
<b>Simulation of Laser-Induced Detonation in Particulate Systems with Applications to Pulse Detonation Engines . . . . .</b>	<b>405</b>
P. Bulat and K. Volkov	
<b>Criterion for Detonation Transition in Liquid-Fuel Pulse Detonation Engines . . . . .</b>	<b>411</b>
J. Li, C.J. Teo, L. Li, P.H. Chang, and Boo-Cheong Khoo	
<b>Numerical Simulation of Reactive Gas Mixes Flows in the Detonation Engines . . . . .</b>	<b>415</b>
S.N. Martyushov	

<b>Stabilization of Detonation Combustion of a Supersonic Flow due to Using the Special Form Plane Channel . . . . .</b>	<b>419</b>
V.A. Levin and T.A. Zhuravskaya	
<b>Role of Wall Temperature on Shock Train in a Rectangular Isolator . . . . .</b>	<b>425</b>
Lianjie Yue, Hongbo Lu, Yabin Xiao, Lihong Chen, and Xinyu Chang	
<b>The Correlation Between Detonation Cell Size and Ignition Delay Time . . . . .</b>	<b>431</b>
Y.F. Liu, W. Zhang, and Z. Jiang	
<b>An Investigation of the Prompt Oblique Detonation Wave Induced by a Finite-Length Wedge . . . . .</b>	<b>435</b>
Yan Liu and Jianping Wang	
<b>Formation of 3D Detonation in Supersonic Flows by Solid Walls of Special Shape . . . . .</b>	<b>441</b>
V.A. Levin, I.S. Manuylovich, and V.V. Markov	
<b>Cellular and Spin Detonation in 3D Channels . . . . .</b>	<b>447</b>
V.A. Levin, I.S. Manuylovich, and V.V. Markov	
<b>Galloping Detonation in a Fuel Mixture Jet . . . . .</b>	<b>453</b>
V.A. Levin, I.S. Manuylovich, and V.V. Markov	
<b>Propagation of Out Warding Flame for Combustible Gas in Cylindrical Confinement . . . . .</b>	<b>457</b>
Wenhu Han and Wenjun Kong	
<b>Investigation on PIV and PLIF Laser Diagnostics in Turbulent Combustion Field . . . . .</b>	<b>461</b>
Long Zhang, Furong Yang, Tie Su, Shuang Chen, Jianjun Yang, and Yungang Wu	
<b>Modeling of Aerobic Combustion . . . . .</b>	<b>467</b>
T. Hartmann, E. Rottenkolber, and A. Boimel	
<b>Investigations of Equivalence Ratio on Operational Liquid-Fuel Pulse Detonation Engines . . . . .</b>	<b>473</b>
J. Li, C.J. Teo, L. Li, K.S. Lim, and Boo-Cheong Khoo	
<b>Detonation of Mechanoactivated Mixture of Ammonium Perchlorate with Aluminum . . . . .</b>	<b>479</b>
Alexander Dolgoborodov, Vladimir Kirilenko, Michael Brazhnikov Arseny Shevchenko, and Victor Teselkin	
<b>Detonation Transition in Relatively Short Tubes . . . . .</b>	<b>481</b>
M. Kuznetsov, A. Lelyakin, V. Alekseev, and I. Matsukov	
<b>Propagation of a Pressure-Dependent Detonation with Different Acoustic Impedance Confinements . . . . .</b>	<b>487</b>
Jianling Li, Xiaocheng Mi, and Andrew J. Higgins	
<b>Kerosene Ignition and Combustion: An Experimental Study . . . . .</b>	<b>493</b>
Alexander Burcat, Erna Olchansky, Ulla Steil, and Marina Braun-Unkhoff	

<b>On Influence of Carbon Tetrachloride on Combustible Mixtures Ignition at Various Temperature Ranges . . . . .</b>	<b>501</b>
A. Drakon and A. Eremin	
<b>Temperature Measurements in the Combustion Zone Behind the Reflected Shock Waves . . . . .</b>	<b>507</b>
A. Drakon, A. Eremin, E. Gurentsov, and E. Mikheyeva	
<b>On the Initiation of Combustion by Means of Supersonic High-Enthalpy Jet . . . . .</b>	<b>511</b>
S.S. Katsnelson, G.A. Pozdnyakov, and D.A. Aleksandrovsky	
<b>A Test of Ignition Behaviors Induced by a Smoothly Convergent Cylindrical Shock . . . . .</b>	<b>519</b>
Yang Jianting, Yujian Zhu, and Jiming Yang	
<b>Part VIII Propulsion</b>	
<b>Nonstationary Interaction of Incoming Flow with Ablative Jet in Supersonic Laser Propulsion . . . . .</b>	<b>527</b>
A.A. Schmidt and Yu. A. Rezunkov	
<b>Axisymmetric Compressible Flow for the Resistojet Thruster Module . . . . .</b>	<b>531</b>
S.M. Chang	
<b>Secondary Injectant Gas Thermodynamic Properties Effects on Fluidic Thrust Vectoring Performances of a Supersonic Nozzle . . . . .</b>	<b>539</b>
A. Chpoun, M. Sellam, V. Zmijanovic, and L. Leger	
<b>Part IX Shock Wave Reflection and Interaction</b>	
<b>Three-Dimensional Bow-Shock Interactions Between High-Speed Slender Bodies at Incidence . . . . .</b>	<b>547</b>
S.J. Hooseria and B.W. Skews	
<b>Flow Behind Mach Reflection and the Neumann Paradox . . . . .</b>	<b>553</b>
A. Sakurai	
<b>The Mach Reflection of a Converging Cylindrical Shock Wave Segment Encountering a Straight Wedge . . . . .</b>	<b>559</b>
B.J. Gray and B.W. Skews	
<b>Reflection of Cylindrical Converging Shock Wave Over Wedge . . . . .</b>	<b>563</b>
Zhigang Zhai, Fu Zhang, and Xisheng Luo	
<b>Numerical Study of the Interaction Process Between a Planar Shock Wave and a Square Cavity Filled with Different Gases . . . . .</b>	<b>569</b>
Dan Igra and Ozer Igra	
<b>Flow Phenomena of An Expansion Wave Entering a Cylindrical Cavity . . . . .</b>	<b>575</b>
M.S. Whalley, B.W. Skews, and R.T. Paton	
<b>Investigation of an Expansion Fan/Shock Wave Interaction Between Low Aspect Ratio Wedges . . . . .</b>	<b>581</b>
L. Nel and B.W. Skews	

<b>Studying Shock Wave Reflections over Double Cylindrical Concave Wedge Reflectors . . . . .</b>	<b>587</b>
Vineet Soni, Meital Geva, O. Ram, Abdellah Hadjadj, Arnab Chaudhuri, Oren Sadot, and Gabi Ben-Dor	
<b>High Resolution Experimental Investigation of the Reflection Over a Convex-Concave Cylindrical Model . . . . .</b>	<b>593</b>
Meital Geva, O. Ram, S. Sadot, and Gabi Ben-Dor	
<b>Characteristic Properties of the Formation of Shock Wave Reflection Configurations in Unsteady Flows . . . . .</b>	<b>599</b>
I.V. Krassovskaya and M.K. Berezkina	
<b>Analytical Approach to the Problem of Three-Dimensional Steady Shock Wave Interactions . . . . .</b>	<b>605</b>
Chun Wang, Gaoxiang Xiang, Z. Jiang, and Yang Yang	
<b>The Effect of Acoustic Impedance of Reflecting Surface on Oblique Shock Reflection . . . . .</b>	<b>609</b>
S. Kobayashi and T. Adachi	
<b>Experimental Investigation of Normal Shock Wave-Counter Flow Interactions . . . . .</b>	<b>615</b>
T. Tamba, N.M. Tuan, A. Iwakawa, and A. Sasoh	
<b>Shock Wave Reflection Over Roughened Wedges . . . . .</b>	<b>621</b>
Dan Igra, Kazuyoshi Takayama, and Ozer Igra	
<b>Surface Oxidation Study of <math>\text{ZrB}_2</math>-SiC Composite for Re-entry Applications Using Free Piston-Driven Shock Tube . . . . .</b>	<b>627</b>
Jayaram Vishakantaiah, T. Venkateswaran, C. Venkateswaran, M.R. Ajith, Suraj Natarajan, and K.P.J. Reddy	
<b>Shock Wave Reflections Over Newtonian and Non-Newtonian Wedges: Experimental Investigation . . . . .</b>	<b>631</b>
H. Jeon, N. Amen, and V. Eliasson	
<b>Ground Effect of Transonic and Supersonic Projectiles: Influence of Mach Number and Ground Clearance . . . . .</b>	<b>635</b>
C. Sheridan, J. Young, Herald Kleine, Koju Hiraki, and Satoshi Nonaka	
<b>The Influence of Concave Wedge Tips on Shock Reflection Patterns . . . . .</b>	<b>641</b>
Harald Kleine, Federico Alzamori Previtali, and Evgeny Timofeev	
<b>Shock Tunnel Studies on Shock-Shock Interaction . . . . .</b>	<b>647</b>
Abhishek Khatta and Gopalan Jagadeesh	
<b>A Study on Unsteady Shear Layer-Shock Interaction in a Vacuum Ejector-Diffuser System . . . . .</b>	<b>653</b>
R. Arun Kumar and G. Rajesh	
<b>The Compressible Shear Layer of a Mach Reflection . . . . .</b>	<b>659</b>
R.E. Hall, B.W. Skews, and R.T. Paton	
<b>Experimental Study of Mach Reflection in Cellular Detonation of <math>\text{C}_2\text{H}_2</math>-<math>\text{O}_2</math>-8.17Ar . . . . .</b>	<b>665</b>
Jie Liu and DU Zhong-hua	

<b>The Existence of a Consistent Stationary Mach Reflection in Shock Tube Flows . . . . .</b>	<b>671</b>
Kazuyoshi Takayama and Gabi Ben-Dor	
<b>Analysis of Wide-Driver Shock Tube Flow with Sharp Area Transition . . . . .</b>	<b>675</b>
J. Falcovitz, Dan Igra, and Ozer Igra	
<b>Shock Waves Initiated by Optical Pulsing Discharge in the Supersonic Air Flow . . . . .</b>	<b>681</b>
Tatiana Bobarykina, Vladimir Chirkashenko, and Vladimir Yakovlev	
<b>Part X Shock Wave Interaction with Obstacles and Porous Media</b>	
<b>Stationary Regular Reflection: Viscous and Rarefaction Effects . . . . .</b>	<b>685</b>
Georgy Shoen, A.A. Kokhanchik, M. Yu. Timokhin, and Yevgeny A. Bondar	
<b>Simplified Models of Shock Waves Interaction with Rigid and Flexible Obstacles . . . . .</b>	<b>691</b>
V.R. Feldgun, Y.S. Karinski, and D.Z. Yankelevsky	
<b>Blast Wave Impact on a Parallelepiped Headed with a Semicylindrical Model Drilled with a Rectangular Cavity . . . . .</b>	<b>697</b>
R. Tosello, L. Biamino, D. Leriche, C. Mariani, G. Jourdan, J.-C. Loraud, and L. Houas	
<b>A Comparison of Numerical and Experimental Results of Passive Shock Wave Mitigation Using Obstacles in Two-Dimensional Channels . . . . .</b>	<b>703</b>
Q. Wan, M. Nguyen, and V. Eliasson	
<b>Mitigation of Weak Shock Waves: Its Applications to Design of Automobile Engine Silencers and Mufflers . . . . .</b>	<b>709</b>
Noriaki Sekine and Kazuyoshi Takayama	
<b>A New Method to Assess Mitigation Efficiency of a Protective Barrier Against the Effects of a Vapor Cloud Explosion . . . . .</b>	<b>715</b>
S. Trélat, E. Vyazmina, A. Beccantini, S. Jallais, and J. Daubech	
<b>Numerical and Experimental Analysis of the Effect of Different Shapes of Rigid Barriers on Blast Wave Propagation . . . . .</b>	<b>721</b>
R. Hajek and M. Foglar	
<b>Study on the Effects of Granular Particles on High Speed Gas Flow using DSMC Method . . . . .</b>	<b>725</b>
Arun Kumar Chinnappan, G. Malaikannan, and Rakesh Kumar	
<b>Model of Shock Wave Action on Porous Materials and Mixtures . . . . .</b>	<b>731</b>
S.A. Kinelovskii and K.K. Maevskii	
<b>The Collapsing Mechanism of Aluminum Foams . . . . .</b>	<b>737</b>
Oren Sadot, I. Anteby, S. Gruntman, O. Ram, and Gabi Ben-Dor	
<b>Part XI Shock Wave Interaction with Granular and Dusty Media</b>	
<b>Study on the Jet Formation During Dispersal of Solid Particles by Shock and Blast Waves . . . . .</b>	<b>745</b>
V. Rodriguez, R. Saurel, G. Jourdan, and L. Houas	
<b>Response of Embedded Pipeline to Surface Blast Loading . . . . .</b>	<b>749</b>
P. Vivek, T.G. Sitharam, Gopalan Jagadeesh, and K.P.J. Reddy
