

Contents

1	Engineering and Technology for Innovation- and Knowledge-Based Economies (iKBEs), Book Objectives, and Overview	1
1.1	Introduction and Book Scope	1
1.1.1	Empirical Investigation Objectives	1
1.1.2	The Book's Main Contributions	2
1.2	Role of Engineering in Innovation- and Knowledge-Based Economies	3
1.3	The Case of Finland	4
1.4	The Case of Singapore	4
1.5	The Case of Qatar	5
1.5.1	Qatar National Vision 2030	5
1.5.2	iKBE Position of Qatar Internationally	6
1.5.3	Drivers of iKBE in Qatar	6
1.6	The Importance of Leadership Skills for iKBE Development	7
1.7	Conclusions	7
	References	7
2	Literature Review of iKBE Competencies and Systemic Modelling	9
2.1	Introduction	9
2.2	Drivers of Focus on Skills Development in Engineering Education	10
2.2.1	Driver 1: Bridging the Gap with Industry Needs	10
2.2.2	Driver 2: The Ever-Evolving Emergences, Roles, and Responsibilities of the Engineering Profession	11
2.2.3	Driver 3: Adapting to Highly Advanced and Complex Working Environment	12
2.2.4	Driver 4: Compliance with the Generic Needs of KBSs and iKBEs	13
2.2.5	Literature Review Methodology	13

2.3	Engineering Education Accreditation Systems and Engineering Competencies	15
2.4	Synthesis of Global Set of Skills	15
2.4.1	Definitions: Skills, Attributes, Competencies, and Others	15
2.4.2	Skills or Competencies	17
2.4.3	Skills Extraction	17
2.5	Global Competency Framework and Model Development	18
2.5.1	The Pyramid of Global Competencies	18
2.5.2	Counting and Quantifying	21
2.5.3	Discussion	21
2.6	Systemic Model of Competency Development	23
2.6.1	Ontological Relations and Mechanics	23
2.6.2	Hypothetical Implications of the Model	24
2.7	Stakeholders and Global Literature Recommendations for Twenty-First-Century Engineering Education for iKBE	26
2.7.1	Engineering Practice and Industry: Academia Linkage	26
2.7.2	Innovation, Design, and Entrepreneurship	26
2.7.3	Pedagogies and Engineering Education Research	27
2.7.4	Curriculum, Training, and Programmes	27
2.7.5	Engineering Talent and Competency Development	28
2.8	The Interrelation Between Twenty-First-Century Engineering Competencies and Leadership Attributes	28
2.9	Conclusions	28
	References	29
3	Leadership: Models, Competencies, and the Emergence of Engineering Leadership	35
3.1	Introduction to Leadership	35
3.2	Effective Leaders	35
3.3	Characteristics and Attributes of Leadership	36
3.3.1	Personality and Interpersonal Traits	36
3.3.2	Motives	36
3.3.3	Cognitive Factors	36
3.4	Leadership Models	37
3.4.1	Transformational Leadership	37
3.4.2	Servant Leadership	38
3.4.3	Ethical Leadership	38
3.4.4	Other Models	39
3.5	Emergence of Leadership in Engineering	39
3.6	Engineering Leadership' Education, Programs, and Training	40
3.6.1	Explicit Academic Programs	41
3.6.2	Non-explicit Academic Programs (Embedded)	41
3.6.3	Corporate Programs on Leadership	41

3.7	Design Projects and Leadership	42
3.7.1	Design Projects as a Vehicle for Leadership Training.	42
3.7.2	Leadership Attributes for Design Projects Success	42
3.8	Conclusions	43
	References.	43
4	On Industry—Academia Collaboration for iKBE.	47
4.1	Introduction	47
4.2	The Triple-Helix Model of Stanford.	47
4.3	The Industry—University Cooperative Research Centre (I/UCRC)	48
4.4	Framework 3: The University—Business Cooperation (UBC) . .	49
4.4.1	Main Findings of the UBC	50
4.4.2	The UBC Ecosystem.	50
4.5	The TIKAT Framework, an Adoption of UBC for Engineering Schools and Colleges	52
4.5.1	Pillar 1—Strategies: Top Strategies for the Implementation UBC/TIKAT Ecosystem in Engineering Schools	53
4.5.2	Pillar 2—Structure and Approaches: Top Structures and Approaches for the Implementation of UBC/TIKAT Ecosystem in Engineering Schools	54
4.5.3	Pillar 3—Operational Activities: Top Operational Activities for the Implementation of the UBC Ecosystem.	54
4.5.4	Pillar 4—Framework: Top Framework Elements for the Implementation of the UBC Ecosystem.	55
4.6	Industry Advisory Boards (IAB) for Engineering Schools: An Advanced Industry Advisory and Strategic Partnership (IASP) Model.	55
4.6.1	IASP Board Vision	55
4.6.2	IASP Board Mission	56
4.6.3	IASP Board Strategic Objectives.	56
4.6.4	IASP Board Strategic Partnership Areas of Focus.	56
4.6.5	IASP Board Structure and Process of Development	57
4.6.6	IASP Funds.	57
4.6.7	IASP Steering Board Membership.	57
4.6.8	IASP Implementation Board	58
4.7	Conclusions	58
	References.	59

5	On the Response for iKBE Development: Excellence in Technology' Innovation, Entrepreneurship, & Engineering/Education (TIEE), and a Proposed Structure.	61
5.1	Innovation, Design, and Technology Entrepreneurship for iKBE.	61
5.1.1	Global Trends	61
5.1.2	Local Perspectives.	62
5.1.3	Design as a Vehicle for Twenty-First-Century Competencies Development.	63
5.2	The Technology, Innovation, and Entrepreneurship Driving Force Triangle	64
5.2.1	Government.	64
5.2.2	Industry	65
5.2.3	Academia	66
5.3	Incepting Disruptive Transformations in a College of Engineering for a iKBE: The TIEE Concept	66
5.3.1	International Benchmarking.	66
5.3.2	Brief Description TIEE Structure.	68
5.4	Conclusions	71
	References.	71
6	Methodology, Tools, and Systemic Framework for iKBE Competencies Investigation.	73
6.1	Overview of Methodologies, Target Stakeholders, and Phases of the Study	73
6.2	Methodologies: Qualitative Approach.	74
6.2.1	Aims of Interviews	74
6.2.2	Invitations and Appointments	75
6.2.3	Interview Procedures	75
6.2.4	Demographics of Qualitative Data.	75
6.2.5	Interview Questions/Protocols	76
6.2.6	Methodology of Analysis	76
6.3	Methodologies: Quantitative Approach.	77
6.3.1	Piloting of Surveys	78
6.3.2	Invitations and Surveys for Data Collection Procedure	78
6.3.3	Instrument Description	78
6.3.4	Reliability and Validity of the Survey.	78
6.3.5	Methodology of Analysis	79
6.3.6	Demographics of Quantitative Data.	79
6.4	Systemic Framework for Engineering Competencies Investigation and Implementation	81
6.4.1	Temporal Gap Identification System	81
6.4.2	Situational Gap Identification System	82

6.4.3	Temporal Control System	83
6.4.4	Closed-Loop Processing System	84
6.5	Conclusions	86
7	Empirical National Case Study: Current and Future Engineering Skills Needs, and Engineering Education Systems Necessities in Qatar.	87
7.1	Introduction	87
7.2	Analysis of Engineering Skills and Competencies	88
7.3	Stakeholders Qualitative Feedback: Current Skills and Competencies Needs	88
7.4	Skills Importance Currently	89
7.4.1	Industry Versus Faculty.	89
7.4.2	Industry Versus Students.	91
7.4.3	Faculty Versus Students	92
7.5	Skills Satisfaction	92
7.5.1	Industry Versus Faculty.	92
7.5.2	Industry Versus Students.	92
7.5.3	Faculty Versus Students	95
7.6	Skills Importance in the Future.	95
7.6.1	Industry Versus Faculty.	95
7.6.2	Industry Versus Students.	96
7.6.3	Faculty Versus Students	99
7.7	Stakeholders Perceptual Gaps in Skills	99
7.7.1	Situational Gap: Importance Currently and Satisfaction Level	99
7.7.2	Temporal Gap: Importance Currently and Importance in the Future.	101
7.8	Change in Skills in 2022 and 2030	102
7.8.1	Stakeholders Quantitative Perspectives	102
7.8.2	Stakeholders Qualitative Perspectives	102
7.9	Comparative Students Perceptions	103
7.9.1	Males Versus Females.	103
7.9.2	Nationals Versus Non-nationals.	104
7.9.3	Ranks of Skills	105
7.10	Gap Analysis and Critical Discussion.	106
7.10.1	Current Most Important Skills for the Engineering Workplace in Qatar	106
7.10.2	Communalities Among Groups	108
7.10.3	Differences Among Groups	109
7.10.4	Current Most Gaps in Skills of Fresh Graduates	109
7.10.5	Future Trends of Skills Demands in Qatar	110

7.11	Qualitative Feedback: Challenges and Barriers	112
7.11.1	Challenges in Joining the Workplace for Fresh Graduates	112
7.11.2	Barriers from Preparing Students with the Desired Skills	113
7.12	Academic Perspectives on Enhancing Graduates' Readiness for Industry Employment	114
7.13	Learning and Teaching Styles for Practice Readiness: Students/Junior Engineers Perspectives	114
7.13.1	Students Perceptions: Males, Females, Nationals, and Non-nationals	115
7.13.2	Senior Students Versus Junior Engineers	115
7.13.3	Internship	115
7.13.4	Skills and Competencies Gained from Specific Courses and Practical Training: Qualitative Feedback	116
7.13.5	Discussion on Curriculum for Better Workplace Readiness	117
7.14	Academia–Industry Collaboration	117
7.14.1	Importance of Academia–Industry Linkage	117
7.14.2	Means of Collaborations	118
7.14.3	Barriers of Industry–Academia Collaboration	119
7.15	Qualitative Perspectives on Industry–Academia Linkage	120
7.16	Towards 2030: Systemic Framework Mapping of Project Findings and Proposed National Roadmap	121
7.16.1	Temporal Gap Identification System: Current–Future	121
7.16.2	Situational Gaps Identification System: Academia–Engineering Graduates–Industry	121
7.16.3	Temporal Strategic Control System: Current–Tactical–and Strategic	126
7.16.4	Closed-Loop System: Input–Process–Output	127
7.17	Conclusions	128
8	Highlights of Foundational Principles of Engineering & Technology Innovation and Talent Transformation for iKBEs Development	129
8.1	The Engineer of iKBE: Aspects of Aspirational Engineering Education System	129
8.2	The TIEE Concept: An Implementation Arm for iKBE Engineering Education Systems	131
8.3	Needs of Investigations on the Competencies in Higher Levels of the Pyramid	132
8.4	Beyond the Sole of Academia on the Road to 2030: The Technology, Innovation, and Entrepreneurship Triangle	133
8.5	Conclusions	134

Appendix A: Engineering Education Accreditation Criteria	135
Appendix B: Generic Definitions for Set of Mutual 22 Skills	141
Appendix C: Research Methodologies in the Literature	147
Appendix D: Targeted Groups Survey Design	149
Appendix E: Engineering Skills and Competency Analysis Between Junior Engineers and Senior Students	151
Appendix F: Engineering Skills and Competencies Between Faculty Members and Industry	159
Appendix G: Engineering Skills and Competencies Analysis Between Senior Students and Industry	165
Appendix H: Engineering Skills and Competencies Analysis Between Males and Females	173
Appendix I: Engineering Skills and Competencies Analysis Between Nationals and Non-nationals	179
Appendix J: Twenty-First-Century Skills Situational Gaps for SEM Design Project	185
Appendix K: Instruments	189
