Part I The Track

1	The Product Development System	3
1.1	Introduction	3
1.2	The Product Development Process Particularities	8
1.2.1	Uncertainty	9
1.2.2	People-Based	9
1.2.3	Ambiguity	9
1.2.4	Non-linearity	10
1.2.5	Complexity	10
1.3	Product Development Performance Drivers	11
1.3.1	External Environment	11
1.3.2	Internal Environment	12
1.3.3	Project Environment	13
1.3.4	Resources	13
1.4	Product Development Metrics	14
1.5	A Practical View	16
	References	17
2	Integrated Product Design and Development	19
2.1	Introduction	19
2.2	Sequential Product Design and Integrated Product Design	20
2.3	Serial Product Development	21
2.4	Integrated Product Development: A Rescue Movement	23
2.5	Integrated Product Development Teams	26
2.6	Integrated Product Development Tools	28
2.6.1	Design by Features (DbF)—as a Potential IPD Design Tool	28
2.6.2	Knowledge Based Engineering (KBE)—a Truly IPD Design Tool	29
2.6.3	Design for Excellence (DFX)	32
2.6.4	Integrative Design Variables (IDV)	36

2.7	A Practical View	39
	References	40
3	Lean Thinking	43
3.1	Introduction	43
3.2	Lean Manufacturing	45
3.2.1	Just-in-Time	46
3.2.2	Jidoka	47
3.3	Lean Product Development	48
3.4	Key Aspects from the Lean Product Development System	50
3.5	A Practical View	51
	References	53
 Part II The Wheel Hub		
4	Value on Product Development	57
4.1	Introduction	57
4.2	“Value” and Project Management	58
4.3	“Value” and Value Engineering	60
4.4	“Value” and Lean Product Development	61
4.5	Value Through the Value Chain	64
4.6	A Practical View	66
	References	69
5	Waste in Product Development	71
5.1	Introduction	71
5.2	Overproduction.	76
5.2.1	Unnecessary Processes	77
5.2.2	Unsynchronized Processes	77
5.3	Waiting	77
5.3.1	Scheduled Waiting	78
5.3.2	Unscheduled Waiting	78
5.4	Transportation.	79
5.4.1	Change of Ownership.	79
5.4.2	Structural Barriers	79
5.4.3	Knowledge Barriers	79
5.4.4	Continuity Barriers	80
5.5	Over Processing	80
5.5.1	Over Engineering	80
5.5.2	Data Conversion	80
5.5.3	Re-Invention	81
5.6	Inventory.	81
5.6.1	In-Process Inventory.	81
5.6.2	In-Product Inventory.	81
5.6.3	In-Company Inventory	82

5.7	Motion	82
5.7.1	Bad Information System.	82
5.7.2	Remote Locations.	82
5.7.3	Misuse of Equipment, Tools, and Techniques	83
5.8	Defects	83
5.8.1	Deficient Physical Deliverables	83
5.8.2	Deficient Information Attributes	83
5.8.3	Obsolete Deliverables.	84
5.9	Correcting.	84
5.9.1	Repairing and Reworking.	84
5.9.2	Scrapping	84
5.9.3	Inspecting	85
5.10	Wishful Thinking	85
5.10.1	Information Wrongly Perceived as Complete	85
5.10.2	Bounded Rationality.	85
5.10.3	Poor Tests and Verifications	86
5.11	Happenings.	86
5.11.1	Bad Forecasting	86
5.11.2	Enterprise Happenings	86
5.12	A Practical View.	87
	References	88
6	Continuous Improvement.	89
6.1	Introduction	89
6.2	Continuous Improvement.	90
6.2.1	Target Condition.	90
6.2.2	Unclear Territory	92
6.2.3	Responsiveness.	92
6.3	Continuous Process Improvement	92
6.3.1	Traditional Improvement Approaches	93
6.3.2	The Continuous Improvement Approach	96
6.3.3	VSMA as a Process Improvement Technique	98
6.4	Continuous Product Improvement	99
6.4.1	Point-Based Concurrent Engineering.	100
6.4.2	Set-Based Concurrent Engineering - SBCE.	101
6.5	A Practical View.	102
	References	103

Part III The Wheel

7	The Lean Product Development Organizational Culture	107
7.1	Introduction	107
7.2	Lean Enabling Organizational Culture.	109
7.2.1	Vision = Pulled Value = Beacon.	110
7.2.2	The Power of the Problems	111

7.2.3	Hard on the Problem, Soft on the People	113
7.2.4	The Power of Communication	114
7.2.5	Learning by Doing	115
7.2.6	Understand by Going and Seeing	118
7.3	A Practical View	120
	References	121
8	The Lean Product Development Organization Knowledge	
	Management	123
8.1	Introduction	123
8.2	Organized to Learn (and to Lean)	125
8.3	Knowledge Identification and Creation	128
8.4	Knowledge Representation, Distribution, and Enabling	130
8.4.1	A3 Report Planning Method	133
8.4.2	Problem-Solving A3	135
8.5	A Practical View	136
	References	137
Part IV	The Tire	
9	The Lean Product Development Process	141
9.1	Introduction	141
9.2	The Process and Its Phases	142
9.2.1	Portfolio Phase—Portfolio Management Activities	143
9.2.2	Study Phase—Value Identification Activities	145
9.2.3	Study Phase—Value Proposition Activities	147
9.2.4	Study Phase—Value Delivery Planning Activities	148
9.2.5	Execution Phase—Design and Development Activities	149
9.2.6	Execution Phase—Production/Ramp-up Activities	149
9.2.7	Use Phase—Product/Process Follow-up and Product Process Discontinuation Activities	150
9.3	The Value Function Deployment—VFD	150
9.3.1	Value Identification Matrix	153
9.3.2	Waste Reduction Matrix	154
9.3.3	Systems Engineering and the VFD	156
9.4	Product Development Visual Management Boards	158
9.5	A Practical View	159
	References	161
10	Study Phase—Identification Activities	163
10.1	Introduction	163
10.2	The Board Guides the Team Through the Lean Journey	164
10.2.1	The Background Is the Basis for Everything	164
10.2.2	Analyzing the Current Condition	166
10.2.3	I, Myself, and the Others	166

10.2.4	Planning for What Is Relevant	167
10.2.5	Kanban and Product Development.	167
10.2.6	The Road Ahead Is Always Bumpy	168
10.2.7	Fill the VFD's Value Identification Matrix.	171
10.3	A Practical View	179
	References	180
11	Study Phase—Value Proposition Activities.	181
11.1	Introduction	181
11.2	Using the Board to Guide the Value Proposition Activities	182
11.2.1	Milestone Chart and Progress Board	183
11.2.2	New Product/Process Design: Functional Architecture	183
11.2.3	Risks and Issues	186
11.2.4	Fill the VFD's Value Rework Avoidance Sub-matrix	187
11.3	A Practical View.	199
	References	200
12	Study Phase—Planning Activities	201
12.1	Introduction	201
12.2	Using the Board to Guide the Value Delivery Planning Activities	203
12.2.1	Milestone Chart and Progress Board	203
12.2.2	Risks and Issues	204
12.2.3	Fill the VFD's Concurrent Engineering and Flow Definition Sub-Matrices	204
12.3	A Practical View	211
	References	212
13	Execution Phase.	213
13.1	Introduction	213
13.2	Using the Board to Guide the Design and Development Activities	213
13.2.1	Setting Project Team.	214
13.2.2	Keeping the VFD Up-to-Date.	214
13.2.3	Navigating Through Milestones.	215
13.2.4	Execution Kanbans.	216
13.2.5	Tracking the Current Product/Process Design	219
13.2.6	Mirror, Mirror on the Wall, Who Is the Fairest of Them All?.	219
13.2.7	Bumps on the Miles Ahead	220
13.2.8	Background and Change Management.	220
13.3	Production and Ramp-Up Activities.	220
13.4	A Practical View: Which DFX and/or DTXshould I Use?.	221
	Reference.	223

Part V On The Road

14	Project: Your Lean Journey	227
14.1	Setting Your Attitude	227
14.2	Before You Begin the Journey	228
14.3	Setting a Plan for Your Trip	229
14.4	On the Road	230
14.5	Bumps on the Track	231
14.5.1	Breaking the Roots from the Traditional Paradigm	231
14.5.2	Solving Misunderstandings of the Lean Philosophy	232
14.5.3	Falling in the Common Pitfalls	232
14.6	A Practical View	233
	References	234
15	Thermo Baby Development Project	235
15.1	Introduction	235
15.2	Background	236
15.3	Current Condition	236
15.4	Comparative Board	237
15.5	Keeping Track of the Development Project	238
15.6	Study Phase—Value Identification Activities	239
15.6.1	Stakeholders' Identification + Value Items Analysis	239
15.6.2	Prioritize the Value Items	241
15.6.3	Define Measures of Effectiveness	242
15.6.4	Identify Conflicting Value Items	244
15.7	Study Phase—Value Proposition Activities	244
15.7.1	New Product Design: Functional Architecture	244
15.7.2	Risks and Issues	244
15.7.3	Fill the VFD's Value Rework Avoidance Sub-matrix	245
15.7.4	Finding Alternatives	247
15.8	Study Phase—Planning Activities	250
15.8.1	Fill the VFD's Flow Definition Sub-matrix	250
15.9	Execution Phase—Design and Development Activities	251
15.10	Final Product Result	253
15.11	A Practical View	255
16	Robot Based Flight Simulator Development Project	257
16.1	Introduction and Background	257
16.2	Current Condition	258
16.3	Comparative Board	260
16.4	Keeping Track of the Development Project	261

16.5	VFD's Value Identification Matrix	263
16.5.1	Stakeholders' Identification + Value Items Analysis . . .	263
16.5.2	Prioritize the Value Items	264
16.5.3	Define Measures of Effectiveness	264
16.5.4	Identify Conflicting Value Items	265
16.6	Study Phase—Value Proposition Activities	270
16.6.1	New Product Design: Functional Architecture.	270
16.6.2	Risks and Issues	271
16.6.3	Fill the VFD's Value Rework Avoidance Sub-matrix. . .	271
16.6.4	Finding Alternatives	272
16.7	Study Phase—Planning Activities	276
16.7.1	Fill the VFD's Flow Definition Sub-matrix	277
16.8	Execution Phase—Design and Development Activities.	277
16.9	A Practical View.	279
	Appendix A: Product Development Performance Drivers	281
	Appendix B: Commonly Used Program Metrics	297
	Glossary	301
	Index.	307
