

Contents

Part I The Challenge and the Science

1	Enhancing Trade in Sea- and Land-Locked Countries	3
1.1	Objectives	3
1.2	The Current Situation	5
1.3	Possibilities for Development	6
	References	9
2	Two Approaches to Modelling Trade	11
2.1	The Multilayer and Agent Based Model (ABM)	11
2.2	The Multilayer Model	12
2.3	The Agent Based Model	17
2.4	Multiplier Attachment	23
	References	24
3	The Current Situation and Future Challenges	27
3.1	Core Statistics	27
3.2	Future Challenges	33
	Reference	34

Part II The South Pacific Island Countries (SPICs)

4	The Multilayer Model for Sea-Locked Countries	37
4.1	Methodology and Study Structure	37
4.2	Multilayer Model: Specifications and Hypotheses	39
4.3	Variables and Multilayer Configuration	39
4.4	Horizontal Network Model	44
4.5	Vertical Network Model	47
4.6	Concluding Comments	50
	Appendix: The Dijkstra Algorithm	50
	References	52

5	Port Attractiveness	53
5.1	Introduction	53
5.2	Methodology	53
5.3	Results	56
5.4	Conclusions and Policy Recommendations	59
	References	63
6	Scenario Analysis of Shipping Networks: Consolidation	65
6.1	Introduction: Towards Consolidation of Cargo and Reduced Transport Costs	65
6.2	Scenario 1: Existing Conditions Network	68
6.3	Scenario 2: Fully Connected Network	73
6.4	Scenario 3: Multiplier Attachment Network	77
6.5	Conclusions and Policy Recommendations	80
	References	81
7	Trade Coordination Agreements	83
7.1	Introduction	83
7.2	Scenario 1: Existing Conditions Network with Bilateral Agreement	85
7.3	Scenario 2: Fully Connected Network with Bilateral Agreement	89
7.4	Scenario 3: Multiplier Attachment Network with Free Trade Agreement	93
7.5	Conclusions and Policy Recommendations	97
	References	99
8	Synthesis: The Integrated Multilayer Model	101
8.1	Introduction	101
8.2	The Vertical Network Model	101
8.3	Evaluation of External Shocks on Trade	104
8.4	Interactions Between the SPICs	107
8.5	Conclusions and Policy Recommendations	110
	Reference	111
	Appendix to Part II: Data Requirements for the SPICS	113
II.1	Data Sets for South Pacific Island Countries—SPICs	113
II.2	The Shipping Network	116
	Port Selection	116
	Container Shipping Services	120
	Trade	123
II.3	Cultural Links and Common Language	125
	Trade Agreements	125
II.4	Transport Costs for SPICS	126
	Voyage Cost	126
	Port Fees	129
	Reference	134

Part III Uganda

9	The Agriculture Supply Chain in Uganda: The Design of an Agent Based Model	137
9.1	Introduction	137
9.2	The Conceptual Framework	138
9.3	Hypotheses	139
9.4	Agents and Agent Interactions	140
9.5	Farmer-Trader Interaction Through Four Channels	144
	CHANNEL 1	144
	CHANNEL 2	145
	CHANNEL 3	146
	CHANNEL 4	146
	References	147
10	The Implementation of the Uganda Agent Based Model	149
10.1	Data	149
10.2	Multiplier Attachment	153
10.3	Production of Crops	154
10.4	Price of Crop	155
10.5	Trading	156
	Feasibility	158
	Costs	159
	Reward	159
	Probability of Deal Failure	159
	Utility Function	160
10.6	Simulation of the Channels in the Model	162
	Itinerant Trader	162
	Conditions for Market Exit	162
10.7	Model Calibration	163
	Product Parameters	163
	Transport Parameters	164
	Market Parameters	164
	Agent Parameters	165
	References	168
11	Transport Cost and Infrastructure Investments	169
11.1	Introduction	169
11.2	Scenario 1: Existing Conditions	171
11.3	Scenario 2: Improvement of Road Infrastructure	174
11.4	Scenario 3: Improvement of Airport Infrastructure	176
11.5	Results and Policy Recommendations	178
	References	180

12	Consolidation and Reform: Towards a Collaborative Approach . . .	183
12.1	Introduction	183
12.2	Scenario 1: Existing Conditions	184
12.3	Scenario 2: Consolidation Around Ruralpolis	187
12.4	Scenario 3: Reform of the Logistics Market	192
12.5	Concluding Remarks and Policy Recommendations	193
	References	194
13	Information Exchange: Collaboration and Coordination	
	Standards	197
13.1	Introduction	197
13.2	Scenario 1: Existing Conditions	199
13.3	Scenario 2: Farmer Coordination-Collaboration Strategies	200
13.4	Scenario 3: Standardisation and Harmonisation of Product Quality in the Supply Chain	206
13.5	Conclusions and Policy Recommendations	211
	References	212
Part IV Conclusions		
14	Collaborative Approach to Trade	217
14.1	Methods to Study Interdependency	217
14.2	The Collaborative Approach to Trade	219
14.3	Trade Interdependency	221
	References	222

Collaborative Approach to Trade
Enhancing Connectivity in Sea- and Land-Locked
Countries
