

Contents

1	Railway Operators Needs in Terms of Wireless Communications	1
1.1	Introduction to Wireless Communications for Railway Applications	1
1.1.1	Context	1
1.1.2	Railway Communication Standards	3
1.1.3	Safety Aspects	7
1.1.4	Classifications	9
1.1.5	Basic Architectures for Train-to-Ground Wireless Communications	13
1.2	The Needs for Operational Applications	18
1.2.1	The Communication and Signaling Systems	18
1.2.2	Monitoring Systems	24
1.2.3	Video Surveillance (CCTV)	26
1.3	The Needs for Services to Passengers	27
1.3.1	Introduction to Internet on Board Trains	27
1.3.2	User Needs	28
1.4	Summary on Wireless Communications in the Railway Domain	30
	References	30
2	Railway Applications Requiring Broadband Wireless Communications	35
2.1	Broadband Internet Access on Board Trains	35
2.1.1	How Users Access Internet on Board?	36
2.1.2	Classification of Technologies to Connect the Train to Internet	40
2.2	Satellite Solutions	40
2.2.1	Description of the Technology	40
2.2.2	Existing Studies, Projects and Solutions	42
2.2.3	Summary on Satellite Solutions	47

2.3	Terrestrial Solutions	48
2.3.1	Public Cellular Networks Solutions.	48
2.3.2	Dedicated Train-to-Infrastructure Solutions	53
2.4	Summary on How to Provide Broadband Internet on Board Trains	62
2.4.1	General Remarks.	62
2.4.2	Comparison of the Different Technologies	63
2.5	Broadband Wireless Communications for Operational Needs	64
2.5.1	Maintenance	64
2.5.2	Video Surveillance	70
2.5.3	Other Operational Applications	72
	References.	74
3	Challenges and Perspectives for the Future Broadband Wireless Communications for Railway	81
3.1	Next Generation Broadband Technologies	81
3.1.1	Spectral Aggregation and Cognitive Radio	81
3.1.2	5G Next Generation	87
3.1.3	Satellite Technologies	92
3.1.4	Other Future Technologies	93
3.2	Current Works and Discussions	94
3.2.1	Works on Professional Mobile Radio	94
3.2.2	Works in Railway Community	96
3.2.3	What About Current Works on Internet on Board in France?	100
3.3	Challenges and Perspectives	101
3.3.1	European Commission Objectives.	101
3.3.2	Scientific Barriers	102
3.3.3	Key Challenges Extracted from the Shift2Rail Multi-annual Action Plan	103
3.3.4	Summary on Expectations and Challenges of Railway Domain.	106
	References.	108
	Conclusion	111
	Appendix A: How Does Internet Work?	113
	Appendix B: Mobile Satellite Systems	117
	Appendix C: Existing and Future European Mobile Technologies	123

Broadband Wireless Communications for Railway
Applications

For Onboard Internet Access and Other Applications

Masson, É.; Berbineau, M.

2017, XVIII, 123 p. 10 illus., 6 illus. in color., Hardcover

ISBN: 978-3-319-47201-0
