Part I Knowledge

1	Introduction	3
1.1	A Full Understanding of Time Requires a Non-Boolean Framework	3
1.2	Two Modes of Understanding	4
1.3	Two Modes of Learning	5
1.4	Two Notions of Time	6
1.5	Parts of the Universe of Discourse	9
2	Boolean Descriptions	11
2.1	On the Necessity of Distinctions	11
2.2	Boolean Logic	12
2.3	On the Biological Basis of Binary Distinctions	14
2.4	Boolean Worldviews	15
2.5	Boolean Classifications	19
3	Non-Boolean Descriptions	23
3.1	Vagueness	23
3.2	Non-Classical Logic	25
3.3	Fuzzy Sets and Fuzzy Logic	28
3.4	Partial Boolean Descriptions	37
3.5	Mathematical Models of Complementarity	46
4	Rationality and Creativity	53
4.1	Modes of Reasoning	53
4.2	Neuropsychological Aspects	62
4.3	Time and the Modes of Knowing	65
4.4	Modes of Comprehending Art	67
4.5	Modes of Learning	68
4.6	Complementary Modes of Knowing	68
4.7	Where Do Ideas Come From?	70

5	Modes of Knowing in Mathematics	73
5.1	Truth in Mathematics	73
5.2	On the Origin of the Concept of Integers	74
5.3	Is Mathematics Discovered or Invented?	75
5.4	Formalism	76
5.5	Gödel's Theorems	78
5.6	Constructivism	79
5.7	Platonism	80
5.8	Complementarity in Mathematics	81
5.9	Birds and Frogs in Mathematics	84
5.10	Mathematical Intuition	85
6	Bottom-Up Approaches in Physics	91
6.1	Atomistic Physics	91
6.2	Bottom-Up Quantum Mechanics	92
6.3	Decomposition of a Universe of Discourse	108
6.4	Symmetry and Symmetry Breakdown	127
6.5	Bottom-Up Algebraic Quantum Theory	135
7	Top-Down Approaches in Physics	155
7.1	Limitations of Bottom-Up Approaches	155
7.2	Complementarity of Bottom-Up and Top-Down Descriptions	159
7.3	Local Quantum Physics	161
7.4	Intrinsic Time	177
Part II Time		
8	Matter, Mind, and Time	185
8.1	Limitations of Physical Descriptions	185
8.2	What Is Matter?	186
8.3	What Is Time?	187
8.4	What Is a Fact?	192
8.5	Matter-Mind-Time Systems	197
9	Temporal Groups and Algebras	211
9.1	Jordan Automorphisms	211
9.2	Temporal Reversal Groups	212
9.3	Temporal Symmetries	215
9.4	The Weyl-Heisenberg Group	222
9.5	The Affine Weyl-Heisenberg Group	230
9.6	The Dilation Group: Scaling	233
9.7	Affine Subgroups of the Affine Weyl-Heisenberg Group	234
10	Representations of Temporal Groups and Semigroups	243
10.1	Hilbert-Space Representations	243
10.2	Temporal Abelian Groups	245
10.3	Representations of the Weyl Group	263
10.4	Representations of Temporal States	266
10.5	Affine Temporal Weyl Systems	273

11 Complementary Temporal Descriptions	279
11.1 Complementary Projections	279
11.2 Complementary Temporal Projections	280
11.3 Four Elementary Affine Weyl Semigroups	282
11.4 Some Basic Time Concepts	284
11.5 Sequential Time and the Affine Semigroup $\mathfrak{S}_{\mathcal{U}}$	289
11.6 Non-Sequential Time and the Affine Semigroup $\mathfrak{S}_{\mathfrak{N}}$	293
11.7 Examples of Temporal Distributions	298
12 The Relevance of Sequential Time	309
12.1 Origin of Sequential Time	309
12.2 Causation and Experiments	317
12.3 Determinism and Predictability	326
12.4 Predictions and Retrodictions	328
13 The Relevance of Non-Sequential Time	353
13.1 Complementarity of Sequential and Non-Sequential Time	353
13.2 Sequential Time in Science	353
13.3 Philosophical Approaches to Non-Sequential Time	355
13.4 Experienced Durational Time	356
13.5 Temporal Nonlocality	357
Appendix C*- and W*-Algebras	361
A.1 Algebras of Observables	361
A.2 Reduced Descriptions	364
A.3 The GNS-Construction	366
A.4 Disjoint States	366
A.5 Modular Theory	367
A.6 Standard Representation of W*-Algebras	371
Bibliography	377
Index	417

Knowledge and Time

Primas, H. - Atmanspacher, H. (Ed.)

2017, XV, 427 p. 38 illus., 10 illus. in color., Hardcover

ISBN: 978-3-319-47369-7
