1	Integrative Production Technology—Theory and Applications	1
	Christian Brecher, Denis Özdemir and Anja Ruth Weber	
1.1	Global Economic Background	1
1.2	Opportunities and Challenges for Manufacturing Companies in High-Wage Countries.	8
1.3	The Polylemma of Production	12
1.4	Research Program.	13
1.5	Theory of Production	15
	References.	16
 Part I Individualized Production		
	Christian Hopmann, Christian Windeck, Torben Fischer and Nafi Yesildag	
2	Direct, Mold-Less Production Systems.	23
	Reinhart Poprawe, Wolfgang Bleck, Frank Thomas Piller, Günther Schuh, Sebastian Barg, Arne Bohl, Sebastian Bremen, Jan Bültmann, Christian Hinke, Ruth Jiang, Robin Kleer, Simon Merkt, Ulrich Prah, Michael Riesener, Johannes Schrage, Christian Weller and Stephan Ziegler	
2.1	Summary	24
2.2	Motivation and Research Question	26
2.2.1	Objectives and Measures for the Second Funding Period	27
2.3	State of the Art.	30
2.3.1	Value Creation with Customized Products for the Case of Additive Manufacturing (AM)	30
2.3.2	Complementation of Manufacturing with SLM Technologies	34

2.3.3	Machine-Specific Cost Drivers in Additive Manufacturing (AM) Technologies like Selective Laser Melting (SLM).	38
2.3.4	High-Power Selective Laser Melting (HP SLM)	42
2.3.5	Qualification of Lattice Structures Manufactured by Selective Laser Melting (SLM) for Custom Part Properties.	43
2.3.6	Steels in the Selective Laser Melting (SLM) Process	46
2.4	Results	48
2.4.1	Value Creation with Customized Products for the Case of Additive Manufacturing (AM)	48
2.4.2	The SLM-Complemented Product Production System (PPS).	55
2.4.3	Machine-Specific Cost Drivers in Additive Manufacturing (AM) Technologies like Selective Laser Melting (SLM).	60
2.4.4	High-Power Selective Laser Melting (HP SLM)	79
2.4.5	Qualification of Lattice Structures Manufactured by Selective Laser Melting (SLM) for Custom Part Properties.	86
2.4.6	High-Manganese Steel Fe-22Mn-0.3C in the Selective Laser Melting (SLM) Process.	95
2.5	Profitability Assessment as a Contribution to the Theory of Production	99
2.5.1	Time-to-Market	100
2.5.2	Tooling Costs	101
2.6	Industrial Relevance	103
2.7	Future Research Topics	104
	References.	107
3	Mold-Based Production Systems	113
	Andreas Bührig-Polaczek, Marek Behr, Christian Hopmann, Günther Schuh, Abassin Aryobsei, Stefanie Elgeti, Markus Frings, Jan Kantelberg, Michael Riesener, Frank Schmidt, Roland Siegbert, Uwe Vroomen, Christian Windeck and Nafi Yesildag	
3.1	Summary	114
3.2	Motivation and Research Question	117
3.3	State of the Art.	120
3.3.1	Methodology for Product and Tool Design	120
3.3.2	Numerical Optimization.	123
3.3.3	Application Case Plastics Profile Extrusion	124
3.3.4	Application Case High-Pressure Die Casting.	127

3.4	Results	129
3.4.1	Methodology for Product and Tool Design	129
3.4.2	Numerical Optimization	138
3.4.3	Application Case Plastics Profile Extrusion	144
3.4.4	Application Case High-Pressure Die Casting	152
3.5	Profitability Assessment as a Contribution to the Theory of Production	163
3.6	Industrial Relevance	166
3.7	Future Research Topics	167
	References	170

Part II Virtual Production Systems

Wolfgang Schulz and Christian Hinke

4	Virtual Production Intelligence (VPI)	177
	Sabina Jeschke, Achim Kampker, Torsten W. Kuhlen, Günther Schuh, Wolfgang Schulz, Toufik Al Khawli, Christian Büscher, Urs Eppelt, Sascha Gebhardt, Kai Kreisköther, Sebastian Pick, Rudolf Reinhard, Hasan Tercan, Julian Utsch and Hanno Voet	
4.1	Summary	178
4.2	Motivation and Research Question	180
4.2.1	Virtual Production Intelligence (VPI)	180
4.2.2	Research Questions and Solution Hypothesis	181
4.3	State of the Art	183
4.3.1	Information Management	184
4.3.2	Design Domain Factory	185
4.3.3	Design Domain Machine	190
4.4	Results	195
4.4.1	Design Domain Factory	196
4.4.2	Design Domain Machine	209
4.5	Profitability Assessment as a Contribution to the Theory of Production	232
4.5.1	Reduction of Time-to-Market	233
4.5.2	Increase of Quality	236
4.5.3	Effects on Development and Investment Costs	236
4.5.4	Conclusions on Profitability	237
4.6	Industrial Relevance	238
4.6.1	Virtual Production Intelligence (VPI) in Factory Planning	238
4.6.2	Metamodeling of Laser Cutting Processes	239
4.7	Future Research Topics	241
4.7.1	Design Domain Factory	241

4.7.2	Design Domain Machine	243
4.7.3	Integrative Scenario	245
	References	246
5	Integrated Computational Materials and Production Engineering (ICMPE)	253
	Wolfgang Bleck, Christian Brecher, Michael Herty, Gerhard Hirt, Christian Hopmann, Fritz Klocke, Nikolai Borchmann, Jens Dierdorf, Hamidreza Farivar, Patrick Fayek, Axel Häck, Viktor Kripak, Markus Krömer, Gottfried Laschet, Ulrich Prahl, Markus Rüngeler, Georg J. Schmitz, Marcel Spekowius, Phillip Springer and Andre M. Teixeira	
5.1	Summary	254
5.2	Motivation and Research Question	255
5.2.1	Topics and Contribution to the Overall Objectives	255
5.2.2	Vision and Research Question	256
5.2.3	Research Questions for the Contributing Scientists	256
5.3	Demonstrator Components and Process Chain	257
5.3.1	Demonstrator 1: Steel Gear	257
5.3.2	Demonstrator 2: Plastic Component	257
5.4	State of the Art	258
5.4.1	Design of a Low-Cost Substitution Steel for Large Gears	258
5.4.2	Continuous Casting of Microalloyed Gear Steels	261
5.4.3	Hot Rolling Multipass Simulation	262
5.4.4	Material Modeling for the Simulation of Hot Forming Processes	263
5.4.5	Warm Forging Process and Its Implications	265
5.4.6	Machining Simulation with Focus on the Material Properties	267
5.4.7	Carburizing Simulation	269
5.4.8	Lifetime Simulation of Steel Gears	271
5.4.9	Multiscale Simulation of Injection Molded Semicrystalline Components	272
5.4.10	Production Planning with ICMPE Framework	274
5.5	Results	275
5.5.1	Design of a Low-Cost Substitution Steel for Large Gears	275
5.5.2	Continuous Casting of Microalloyed Gear Steels	280
5.5.3	Hot Rolling Multipass Simulation	286
5.5.4	Material Modeling for the Simulation of Hot Forming Processes	293
5.5.5	Warm Forging Process and Its Implications	302

5.5.6	Machining Simulation with Focus on the Material Properties	306
5.5.7	Carburizing Simulation	315
5.5.8	Lifetime Simulation	323
5.5.9	Multiscale Simulation of Injection Molded Semicrystalline Components	328
5.5.10	Profitability Assessment as a Contribution to the Theory of Production.	352
5.5.11	Industrial Relevance	355
5.5.12	Future Research and Development Topics.	359
	References.	359

Part III Integrated Technologies

Gerhard Hirt and Laura Conrads

6	Multi-technology Platforms (MTPs)	369
	Christian Brecher, Wolfgang Bleck, Jörg Feldhusen, Gerhard Hirt, Fritz Klocke, Uwe Reisgen, Robert Schmitt, David Bailly, Markus Bambach, Laura Conrads, Frédéric du Bois-Reymond, Alexander Göttmann, Stefan Gräfe, Mohamed Harraz, Jan Erik Heller, Werner Herfs, Krishna Chaitanya Komerla, Marvin Laugwitz, Manuel Löwer, Chris Mertin, Andreas Naumov, Johannes Nittinger, Martin Peterek, Ulrich Prah, Jan Rey, Alexander Schiebahn, Alexander Schmid, Roman Schmitz, Stefan Tönissen, Holger Voswinckel, Maximilian Wegener and Frederik Wellmann	
6.1	Summary	371
6.2	Motivation and Research Question	372
6.3	Design Methodology for Multi-technology Platforms	373
6.3.1	Introduction	373
6.3.2	State of the Art	375
6.3.3	Results.	377
6.3.4	Industrial Relevance	384
6.3.5	Conclusions and Outlook.	384
6.4	Measurement on Machine Tools and MTPs	385
6.4.1	Introduction	385
6.4.2	State of the Art	385
6.4.3	Results.	387
6.4.4	Industrial Relevance	398
6.4.5	Conclusion and Outlook	399
6.5	Demonstrator Multi-technology Machining Center (MTMC)	399
6.5.1	Introduction	400
6.5.2	State of the Art	402
6.5.3	Results.	404

6.5.4	Industrial Relevance	418
6.5.5	Conclusion and Outlook	419
6.6	Demonstrator Hybrid Sheet Metal Processing Center	419
6.6.1	Introduction	419
6.6.2	State of the Art	420
6.6.3	Results.	427
6.6.4	Industrial Relevance	439
6.6.5	Conclusion and Outlook	441
6.7	Demonstrator Conductive Friction Stir Welding (FSW) Center.	442
6.7.1	Introduction	442
6.7.2	State of the Art	442
6.7.3	Results.	451
6.7.4	Industrial Relevance	465
6.7.5	Conclusion and Outlook	466
6.8	Demonstrator LaserTurn	466
6.8.1	Introduction	466
6.8.2	State of the Art	467
6.8.3	Results.	469
6.8.4	Industrial Relevance	480
6.8.5	Conclusion and Outlook	480
6.9	Economic Efficiency of Manufacturing Technology Integration	480
6.9.1	Introduction	480
6.9.2	State of the Art	481
6.9.3	Results.	484
6.9.4	Conclusion and Outlook	494
6.10	Profitability Assessment as a Contribution to the Theory of Production	495
6.10.1	Multi-technology Machining Center	495
6.10.2	Hybrid Sheet Metal Processing Center	497
6.10.3	Conductive Friction Stir Welding (FSW).	499
6.10.4	LaserTurn	502
6.11	Conclusion and Future Research Topics	504
	References.	505
7	Multi-technology Products	515

Linke, Uwe Vroomen, Christian Windeck, Michael Berens, Claudia A. Hartmann, Jan Klein, Nathan C. Kruppe, Xifang Liao, Patrick Messer, Mona Naderi, Philipp Ochotta, Magnus Orth, Florian Petzinka, Malte Röbig, Alexander Schiebahn, Johannes Schönberger and Michael Steger	

7.1	Summary	516
7.2	Motivation and Research Question	518
7.3	Plastics–Metal Hybrid Parts for Electrical Applications	519
7.3.1	Introduction	519
7.3.2	State of the Art	520
7.3.3	Results.	523
7.3.4	Profitability Assessment as a Contribution to the Theory of Production	540
7.3.5	Industrial Relevance	542
7.3.6	Conclusion and Outlook	544
7.4	Manufacture of Plastic Components with Optical Microstructures	544
7.4.1	Introduction	544
7.4.2	State of the Art	545
7.4.3	Results.	551
7.4.4	Profitability Assessment as a Contribution to the Theory of Production	584
7.4.5	Industrial Relevance	587
7.4.6	Conclusion and Outlook	588
7.5	Plastic–Metal Hybrids for Structural Applications	589
7.5.1	Introduction	589
7.5.2	State of the Art	589
7.5.3	Results.	592
7.5.4	Profitability Assessment as a Contribution to the Theory of Production	615
7.5.5	Industrial Relevance	616
7.5.6	Conclusion and Outlook	617
7.6	Future Research Topics	618
	References.	622

Part IV Self-optimizing Production Systems

Christopher Schlick, Günther Schuh, Fritz Klocke,
 Robert Schmitt, Dirk Abel, Christian Brecher,
 Burkhard Corves, Thomas Gries, Christian Hopmann,
 Sabina Jeschke, Achim Kampker, Peter Loosen,
 Reinhart Poprawe, Uwe Reisgen, Wolfgang Schulz,
 Martina Zieffle, Felix Bertelsmeier, Matthias Blum,
 Marco Faber, Yves-Simon Gloy, Gunnar Keitzel,
 Alexander Mertens and Henning Petruck

8	Cognition-Enhanced, Self-optimizing Production Networks	645
	Christopher Schlick, Volker Stich, Robert Schmitt, Günther Schuh, Martina Zieffle, Christian Brecher, Matthias Blum, Alexander Mertens, Marco Faber, Sinem Kuz, Henning Petruck, Marco Fuhrmann, Melanie Luckert, Felix Brambring, Christina Reuter, Niklas Hering, Marcel Groten, Simone Korall, Daniel Pause, Philipp Brauner, Werner Herfs, Markus Odenbusch, Stephan Wein, Sebastian Stiller and Marvin Berthold	
8.1	Summary	646
8.2	Motivation and Research Question	649
8.2.1	Motivation	649
8.2.2	State of the Art	649
8.2.3	Concept of Self-optimizing Production Networks	651
8.2.4	Structure	652
8.3	Intercompany Material and Information Flow	654
8.3.1	Introduction	654
8.3.2	State of the Art	655
8.3.3	Results	657
8.3.4	Profitability Assessment as a Contribution to the Theory of Production	685
8.3.5	Industrial Relevance	686
8.3.6	Conclusion and Outlook	688
8.4	Self-optimizing Production Planning and Control	689
8.4.1	Introduction	689
8.4.2	State of the Art	689
8.4.3	Results	691
8.4.4	Profitability Assessment as a Contribution to the Theory of Production	698
8.4.5	Industrial Relevance	700
8.4.6	Conclusion and Outlook	701
8.5	Cognition-Enhanced Self-optimizing Production Lines	701
8.5.1	Introduction	701
8.5.2	State of the Art	703
8.5.3	Results	708
8.5.4	Profitability Assessment as a Contribution to the Theory of Production	731
8.5.5	Industrial Relevance	732
8.5.6	Conclusion and Outlook	733
8.6	Conclusion and Future Research Topics	735
	References	736

Part V Cross-Sectional Processes

Christian Brecher, Denis Özdemir and Anja Ruth Weber

11	Scientific Cooperation Engineering	993
	Sabina Jeschke, Wolfgang Bleck, Anja Richert, Günther Schuh, Wolfgang Schulz, Martina Ziefle, André Bräkling, André Calero Valdez, Kirsten Dahmen, Ulrich Jansen, Claudia Jooß, Sarah L. Müller, Ulrich Prah, Anne Kathrin Schaar, Mamta Sharma and Thomas Thiele	
11.1	Summary	994
11.2	Motivation and Research Question	995
11.3	State of the Art and Results of Scientific Cooperation Engineering.	997
11.3.1	Continuous Formative Evaluation	997
11.3.2	Critical Incidents of Interdisciplinary Research	1001
11.3.3	Intercultural Diversity Management—Age and Culture Effects in Cluster Research	1005
11.3.4	Physical Networking and Tailor-Made Trainings as Means for Cluster Development	1011
11.3.5	Interdisciplinary Innovation Management	1015

11.3.6	Scientific Cooperation Portal	1019
11.3.7	Cluster Terminologies: Data Science in Cooperation Engineering	1024
11.3.8	Visualization of Collaboration as a Means to Support Interdisciplinary Cooperation and Integration	1029
11.3.9	Research Planning Using the <i>FlowChart</i> Tool.	1033
11.4	Industrial Relevance	1038
11.5	Future Research Topics	1041
	References.	1042
12	Towards a Technology-Oriented Theory of Production	1047
	Günther Schuh, Malte Brettel, Christina Reuter, David Bendig, Christian Dölle, Niklas Friederichsen, Annika Hauptvogel, Thomas Kießling, Till Potente, Jan-Philipp Prote, Anja Ruth Weber and Bartholomäus Wolff	
12.1	Summary	1047
12.2	Research Motivation.	1048
12.3	State of the Art.	1050
12.3.1	Production Theory Models	1050
12.3.2	Classification of the Technology-Oriented Theory of Production.	1054
12.4	Results	1057
12.4.1	Operationalization of Technological Advances Within the CoE Towards Their Impact on Profitability.	1059
12.4.2	Operationalization Towards the Impact on Sales	1059
12.4.3	Operationalization Towards the Impact on Fixed Costs	1065
12.4.4	Operationalization Towards the Impact on Variable Costs	1068
12.5	Conclusion	1074
	References.	1076
13	Technology Platforms	1081
	Christian Brecher, Günther Schuh, André Bräklings, Denis Özdemir, Anja Wassong and Anja Ruth Weber	
13.1	Summary	1081
13.2	Motivation and Research Question	1082
13.3	State of the Art.	1082
13.4	Results	1083
13.4.1	External and Internal Communication	1083
13.4.2	Spin-Offs, Centers, and Further Research Projects.	1085

13.5 Conclusion and Outlook 1088
