

Contents

1	Introduction.....	1
2	Brief Historical Background	5
3	Shock Waves as Used in Biomedical Applications	19
3.1	Introduction.....	19
3.2	Pressure and Pressure Waves	20
3.3	Power and Intensity.....	26
3.4	Focal Zones and Penetration Depth	27
3.5	Energy and Impulse	30
3.6	Recording of Acoustic Cavitation and Shock Wave Fields	33
4	Shock Wave Interaction with Matter	43
4.1	Introduction.....	43
4.2	Propagation and Attenuation.....	44
4.3	Reflection and Refraction	48
4.4	Diffraction	50
4.5	Compression, Tear, and Shear Forces	52
4.6	Hopkinson Effect	54
4.7	Acoustic Cavitation.....	55
4.8	Circumferential Compression	68
4.9	Other Fragmentation Mechanisms	69
4.10	Radiation Pressure	69
4.11	Sonoluminescence.....	70
4.12	Mechanisms of Tissue Damage During SWL.....	71
4.13	Interaction of Shock Waves with Tissue During ESWT.....	77
5	Shock Wave Lithotripsy	83
5.1	Introduction.....	83
5.2	Electrohydraulic Lithotripters.....	91
5.2.1	Single Spark-Gap Shock Wave Sources	92
5.2.2	Dual Spark-Gap Shock Wave Sources.....	111

5.3	Electromagnetic Lithotripters	114
5.3.1	Flat Coil Shock Wave Sources.....	115
5.3.2	Cylindrical Coil Shock Wave Sources.....	121
5.3.3	Conical Coil Shock Wave Sources	124
5.3.4	Self-Focusing Shock Wave Sources	126
5.4	Piezoelectric Lithotripters.....	127
5.4.1	Self-Focusing Shock Wave Sources	129
5.4.2	Non-Spherical Piezoelectric Shock Wave Sources.....	135
5.5	Other Shock Wave Sources.....	136
5.5.1	Laser Shock Wave Sources.....	136
5.5.2	Microexplosive Shock Wave Sources.....	137
5.5.3	Combined Shock Wave Sources	138
5.5.4	Multichannel Discharge Shock Wave Sources	139
5.6	Shock Wave Lithotripsy in Urology	143
5.6.1	Contraindications.....	144
5.6.2	Pediatric Patients.....	145
5.6.3	Obese Patients.....	147
5.6.4	The Focal Size	149
5.6.5	The Shock Wave Rate.....	150
5.6.6	Voltage-Stepping and Number of Shock Waves.....	153
5.6.7	Prophylactic Shock Waves.....	155
5.6.8	Shock Wave Coupling.....	157
5.6.9	Imaging Systems and Patient Positioning.....	160
5.6.10	Computed Tomography Attenuation Numbers.....	165
5.6.11	Stone Size, Composition and Location.....	169
5.6.12	Efficiency Evaluation.....	170
5.6.13	Final Comments and Recommendations	172
5.7	Shock Wave Lithotripsy for Gallbladder, Pancreatic and Common Bile Duct Stones.....	178
5.8	Shock Wave Lithotripsy for Salivary Gland Stones.....	182
5.9	Development and Future of SWL	184
6	Extracorporeal Shock Wave Therapy	189
6.1	Introduction.....	189
6.2	Focused, Defocused, and Planar Pressure Wave Sources	193
6.3	Ballistic Sources.....	200
6.4	Other Shock Wave Sources for ESWT	204
6.5	Pain Relief.....	205
6.6	Plantar Fasciitis	206
6.7	Calcaneal Spur	209
6.8	Achilles Tendinopathy	210
6.9	Tendinopathy of the Shoulder.....	212
6.10	Epicondylitis of the Elbow.....	217
6.11	Patellar Tendinopathy	219
6.12	Bone Healing	220

6.13	Bone Vascular Diseases	226
6.14	Spasticity	228
6.15	Wound Healing	232
6.16	Aesthetic Dermatology	237
6.17	Heart Diseases.....	241
6.18	Chronic Pelvic Pain Syndrome	245
6.19	Peyronie's Disease	247
6.20	Erectile Dysfunction	247
6.21	Shock Wave Acupuncture	249
6.22	ESWT in Veterinary Medicine.....	250
7	Novel Uses and Potential Applications	251
7.1	Introduction.....	251
7.2	Needleless Injection and Small Shock Tubes	252
7.3	Ablation and Neurosurgery.....	254
7.4	Cell Transfection and Oncology	256
7.5	Bacterial Transformation	281
7.6	Transformation of Filamentous Fungi	286
7.7	Bactericidal and Fungicidal Effects of Shock Waves	291
7.8	ESWT in Dentistry.....	298
