1	Introduction	1
1.1	Background	1
1.1.1	Clinical Problems: A Case Study on Autoimmune Diseases	1
1.1.2	Cellular Imaging: A Case Study on Indirect Immunofluorescence	3
1.2	Computer-Aided Diagnosis	6
1.3	Experimental Datasets in the Book	8
1.3.1	The ICPR2012 Dataset	8
1.3.2	The ICIP2013 Training Dataset	10
1.4	Structure of the Chapters	10
	References	12
2	Fundamentals	15
2.1	Optical Systems for Cellular Imaging	15
2.1.1	Laser Scanning Confocal Microscope	16
2.1.2	Multi-photon Fluorescence Imaging	20
2.1.3	Total Internal Reflection Fluorescence Microscope	22
2.1.4	Near-Field Scanning Optical Microscopy Imaging Technology	25
2.1.5	Optical Coherence Tomography Technology	29
2.2	Feature Extraction	31
2.2.1	Low-Level Features	31
2.2.2	Mid-Level Features	38
2.3	Classification	39
2.3.1	Support Vector Machine	39
2.3.2	Nearest Neighbor Classifier	40
	References	41

3	Optical Systems for Cellular Imaging	45
3.1	Introduction	46
3.2	Optical Tweezer	47
3.2.1	Introduction to Optical Tweezers	47
3.2.2	Gradient and Scattering Force of Optical Tweezers.	48
3.2.3	Three-Dimensional Optical Trap	49
3.3	Low-Order Fiber Mode LP_{21}	51
3.3.1	Fiber Mode Coupling Theory	51
3.3.2	Analysis of Field Distribution in Optical Fiber	53
3.3.3	Solution to LP_{21} Mode	55
3.3.4	Selective Excitation of LP_{21} Mode	56
3.3.5	The Twisting and Bending Characteristics of LP_{21} Mode	58
3.3.6	Why LP_{21} Mode?	60
3.4	Optical Tweezer Using Focused LP_{21} Mode.	61
3.4.1	Fiber Axicons	61
3.4.2	Cell Manipulation	66
3.5	Modeling of Optical Trapping Force	68
3.5.1	Force Analysis of Mie Particles in Optical Trap	69
3.5.2	Gaussian Beam	72
3.5.3	Simulation of Light Force on Mie Particle	73
3.6	Summary	77
	References.	78
4	Image Representation with Bag-of-Words	81
4.1	Introduction	81
4.2	Coding	83
4.2.1	Vector Quantization	84
4.2.2	Soft Assignment Coding	84
4.2.3	Locality-Constrained Linear Coding	85
4.3	Pooling	86
4.4	Summary	86
	References.	86
5	Image Coding	89
5.1	Introduction	89
5.2	Linear Local Distance Coding Method	90
5.2.1	Distance Vector.	91
5.2.2	Local Distance Vector.	92
5.2.3	The Algorithm Framework	93
5.3	Experiments and Analyses	94
5.3.1	Experiment Setup	95
5.3.2	Experimental Results on the ICPR2012 Dataset	96

5.3.3	Experimental Results on the ICIP2013 Training Dataset	98
5.3.4	Discussion.	99
5.4	Summary	102
	References.	102
6	Encoding Image Features	105
6.1	Introduction	105
6.2	Encoding Rotation Invariant Features of Images.	107
6.2.1	Pairwise LTPs with Spatial Rotation Invariant	107
6.2.2	Encoding the SIFT Features with BoW Framework	110
6.3	Experiments and Analyses	111
6.3.1	Experiment Setup	111
6.3.2	Experimental Results on the ICPR2012 Dataset	112
6.3.3	Experimental Results on the ICIP2013 Training Dataset	113
6.3.4	Discussion.	115
6.4	Summary	117
	References.	117
7	Defining Feature Space for Image Classification.	119
7.1	Introduction	119
7.2	Adaptive Co-occurrence Differential Texton Space for Classification.	120
7.2.1	Co-occurrence Differential Texton.	120
7.2.2	Adaptive CoDT Feature Space	123
7.2.3	HEp-2 Cell Image Representation in the Adaptive CoDT Feature Space	124
7.3	Experiments and Analyses	127
7.3.1	Experiment Setup	127
7.3.2	Experimental Results on the ICPR2012 Dataset	128
7.3.3	Experimental Results on the ICIP2013 Training Dataset	129
7.3.4	Discussion.	130
7.4	Summary	132
	References.	132
8	Conclusions and Perspectives	135
8.1	Major Techniques Developed in the Book	135
8.2	Directions and Future Work	136
	References.	137
