

Contents

Part I Keynotes

Optimizing Adaptable Systems for Future Uncertainty	3
D. Straub and O. Špačková	
Freak Events, Black Swans, and Unknowable Unknowns: Impact on Risk-Based Design	15
M.A. Maes and M.R. Dann	

Part II Structural Reliability Methods and Statistical Approaches

Extrapolation, Invariance, Geometry and Subset Sampling	33
K. Breitung	
Performance of Various Sampling Schemes in Asymptotic Sampling	45
M. Šmídová and M. Vořechovský	
Moving Least Squares Metamodels—Hyperparameter, Variable Reduction and Model Selection	63
I. Reuter, M. Voigt, R. Mailach, K.-H. Becker, A. Fischerswöring-Bunk, H. Schlums and M. Ivankovic	
Comparing Three Methodologies for System Identification and Prediction	81
S.G.S. Pai and I.F.C. Smith	
Global Sensitivity Analysis of Reinforced Concrete Walls Subjected to Standard Fire—A Comparison of Methods	97
M. Achenbach, T. Lahmer and G. Morgenthal	

Part III Probability and Statistics

Comparison of Computed and Observed Probabilities of Failure and Core Damage Frequencies	109
D. Proske	

Probability of a Large Fire in a Road Tunnel Bayesian Inference	123
R.M.L. Nelisse and A.C.W.M. Vrouwenvelder	

Statistical Extrapolation for Extreme Traffic Load Effect Estimation on Bridges	135
M. Nowak, D. Straub and O. Fischer	

Part IV Uncertainty Quantification

Uncertainty Quantification for Force Identification and Response Estimation in Structural Dynamics	157
K. Maes, G. De Roeck and G. Lombaert	

Uncertainty Quantification of Creep in Concrete by Taylor Series Expansion	175
P. Criel, R. Caspeele, S. Matthys and L. Taerwe	

Uncertainty Quantification of Extrapolation Techniques for Bonded Anchors	189
J. Podroužek, J. Vorel and R. Wendner	

Uncertainty Quantification Applied to a Fire-Exposed Glued-Laminated Timber Beam	203
A.I. Bartlett, D. Lange, J. Anderson and R.M. Hadden	

Part V Uncertainty Modelling

Generation of Spatially Embedded Random Networks to Model Complex Transportation Networks	217
J. Hackl and B.T. Adey	

Effect of Climate Change on Snow Load on Ground: Bayesian Approach for Snow Map Refinement	231
P. Croce, P. Formichi, F. Landi, F. Marsili and N. Friedman	

Imposed Correlation Between Random Field and Discrete Particle Placement	245
J. Podroužek, J. Vorel, G. Cusatis and R. Wendner	

A Bayesian Network for the Definition of Probability Models for Masonry Mechanical Parameters.	253
F. Marsili, P. Croce, F. Klawonn, A. Vignoli, S. Boschi and F. Landi	

A Bayesian Network for the Definition of Probability Models for Compressive Strength of Concrete Homogeneous Population	269
F. Marsili, P. Croce, F. Klawonn and F. Landi	
Probabilistic Tsunami Hazard Assessment Through Large Scale Simulations	285
F. Sihombing and M. Torbol	
 Part VI Applied Structural Reliability Analysis	
Probabilistic Slope Stability Analysis Using Approximative FORM	299
M. Huber, M. van der Krogt and W. Kanning	
Bayesian Updating of Slope Reliability in Undrained Clay with Vane Shear Test Data	317
S.H. Jiang, I. Papaioannou and D. Straub	
Structural Reliability in Design and Analysis of Tensile Structures	331
E. De Smedt, M. Mollaert, R. Caspeeale and L. Pyl	
Probabilistic Assessment of Wind-Loaded Façade Elements	345
N.E. Meinen, R.D.J.M. Steenbergen, C.P.W. Geurts and C.A. van Bentum	
Shear Resistance of Prestressed Girders: Probabilistic Design	365
O. Slowik, D. Novák, L. Novák and A. Strauss	
Reliability Assessment of Buried Pipelines for Through-Wall Bending Stress	377
A.U. Ebenuwa and K.F. Tee	
Sensitivity Studies Within a Reliability Analysis of Cross Sections with Carbon Concrete	389
J. Weselek and U. Häussler-Combe	
 Part VII Risk Analysis and Optimization	
Risk Analysis of Bridge Falsework Structures	409
J. André, R. Beale and A.M. Baptista	
Reliability-Based Methodology for the Optimal Design of Viscous Dampers	427
D. Altieri, E. Tubaldi, M. Broggi and E. Patelli	
Optimization of a Landing Gear System Including Uncertainties	441
I. Tartaruga, J.E. Cooper, M.H. Lowenberg, P. Sartor and Y. Lemmens	

Part VIII Probabilistic Assessment of New and Existing Structures

Probabilistic Analysis of Combination Rules in Eurocodes 461
J. Markova and M. Holicky

Floor Live Loads of Building Structures 471
N. L. Tran, D. Müller and C.-A. Graubner

**Methodology for Evaluating the Safety Level of Current Accepted
Design Solutions for Limiting Fire Spread Between Buildings 485**
R. Van Coile and D. Maeso

**Robustness Assessment—A New Perspective to Achieve
a Performance Indicator. 499**
H. Guimarães, J. Fernandes, J. Matos and A. Henriques

**Probabilistic Concepts of Upcoming European Document
on Assessment of Existing Structures 509**
M. Holický

**Present and Future Probabilistic Challenges for Maintenance
of Reinforced Concrete Structures. 521**
S. Kessler, A. Strauss and R. Caspeepe

Author Index. 539

14th International Probabilistic Workshop
Caspeele, R.; Taerwe, L.; Proske, MSc, D. (Eds.)
2017, XII, 540 p. 325 illus., 253 illus. in color.,
Hardcover
ISBN: 978-3-319-47885-2
