

Contents

1	Polymers Against Microorganisms.....	1
1.1	Infectious Diseases: Historical Context.....	1
1.1.1	Mechanisms of Resistance to Antibacterial Agents.....	6
1.2	Implant-Associated Infections	7
1.3	The Use of Macromolecules as Antimicrobials.....	8
1.4	About This Book.....	9
	References.....	10
2	Bacterial Infections: Few Concepts.....	13
2.1	Introduction.....	13
2.2	Bacterial Structure	14
2.3	Interactions Mechanisms of Antimicrobials with Bacteria in Solution.....	15
2.3.1	Bacterial Targets of Antibiotics.....	15
2.3.2	Antibiotic Resistance Developed by Bacteria.....	16
2.3.3	Macromolecular Antimicrobials	18
2.4	Biomaterials Surface: Device-Associated Infections.....	22
2.4.1	Adhesion, Adherence, and Attachment.....	23
2.4.2	Bacterial Adhesion to Biomaterials Surfaces.....	23
2.4.3	Biofilm Formation.....	26
2.4.4	Antibiotic Resistance of Bacteria in Biofilms.....	28
2.4.5	Approaches Developed to Achieve Polymeric Biomaterials with Antibacterial Properties.....	30
2.5	Conclusions.....	31
	References.....	32
3	Chemical Approaches to Prepare Antimicrobial Polymers	39
3.1	Introduction.....	39
3.2	Types of Antimicrobial Groups Incorporated in Polymers	40
3.2.1	Quaternary Ammonium/Phosphonium	41
3.2.2	<i>N</i> -Halamine and Other Halogen Containing Polymers.....	43

3.2.3	Antimicrobial Peptides and Other Polymers	
	Mimicking Natural Peptides	44
3.2.4	Other Antimicrobial Functional Groups.....	47
3.3	Synthetic Strategies to Prepare Antimicrobial Polymers	48
3.4	Interactions Between Bacteria and Polymeric Materials:	
	Role of the Macromolecular Parameters on the Antibacterial	
	Activity.....	49
3.4.1	Hydrophilic/Hydrophobic Balance	49
3.4.2	Molecular Weight.....	51
3.4.3	Polymer Topology	52
3.4.4	Monomer Derivatization with Alkyl Chains:	
	Spacer Length and Alkyl Chain Effect.....	57
3.4.5	Other Macromolecular Parameters Involved	
	in the Antibacterial Activity	57
3.5	Evaluation of the Antimicrobial Activity: In Vitro Testing	59
3.6	Conclusions.....	61
	References.....	63
4	Nano-Micro Polymeric Structures with Antimicrobial	
	Activity in Solution	71
4.1	Introduction.....	71
4.2	Amphiphilic Antimicrobial Structures in Solution:	
	Key Variables to Take into Account	72
4.3	Antimicrobial Random/Alternated Copolymers in Solution	73
4.4	Self-Assembled Block Copolymer-Based Antimicrobial	
	Nanostructures	76
4.5	Hybrid Organic/Inorganic Nano-Assemblies in Solution	79
4.6	Polymeric Nanocapsules	82
4.7	Polymeric Nanoparticles	82
4.8	Core/Shell Nanoparticles	84
4.9	Fabrication of Microspheres for Antibacterial Purposes.....	85
4.10	Responsive Nanoparticles/Assemblies	87
4.11	Conclusions.....	90
	References.....	91
5	Antimicrobial/Antifouling Surfaces Obtained	
	by Surface Modification	95
5.1	Introduction.....	95
5.2	Polymer Surface Modification	97
5.3	Techniques to Functionalize Polymer Surfaces	98
5.4	Anti-Adhesive Polymer Surfaces: Antifouling	99
5.5	Antibacterial Coatings	102
	5.5.1 Biocide-Releasing Antibacterial Coatings	102
	5.5.2 Intrinsically Bioactive Materials: Contact-Active	
	Biocidals.....	102

5.6	Dual-Function Antibacterial Surfaces for Biomedical Applications	107
5.6.1	Repelling and Releasing Surfaces.....	107
5.6.2	Contact-Killing and Repelling	107
5.6.3	Releasing and Contact-Killing.....	108
5.7	Responsive Antibacterial Surfaces.....	109
5.7.1	Thermoresponsive Surfaces	111
5.7.2	pH-Responsive Surfaces	112
5.7.3	Bioresponsive Surfaces	112
5.7.4	Other Responsive Interfaces	113
5.8	Conclusions.....	115
	References.....	115
6	Nano/Microstructured Antibacterial Surfaces.....	125
6.1	Introduction.....	125
6.2	Fabricating Micro- and Nanometer Size Patterns on Polymer Surfaces	127
6.2.1	Innovative Lithographic Techniques.....	127
6.2.2	Laser-Based Micro-Nanopatterning.....	128
6.2.3	Writing Using Electron and Ion Beams.....	128
6.2.4	Molding.....	129
6.2.5	Pattern Formation by Surface Instabilities.....	129
6.3	Micro/Nanostructured Antimicrobial Surfaces in Nature	131
6.3.1	Nanostructured Surfaces that Repel/Kill Bacteria in Nature	132
6.3.2	Hierarchically Structured Surfaces with Antifouling Properties	134
6.4	Engineering Bioinspired Surfaces with Either Micro- or Nanostructured Topographic Structures	134
6.4.1	Synthetic Structured Polymer Surfaces with Micrometer Size Patterns.....	135
6.4.2	Nanoscale Surface Patterns in Polymeric Materials as Antimicrobial Materials.....	135
6.5	Engineered Surfaces with Micro/Nanostructured Topographic Features and Chemically Controlled Surface	138
6.6	Nanostructured Composite Films	143
6.7	Nanostructured Responsive Surfaces.....	145
6.8	Conclusions.....	148
	References.....	148
7	Antimicrobial Fibers and Fabrics Obtained by Electro/Melt Spinning	155
7.1	Introduction.....	155
7.2	Approaches for Fiber Fabrication	156
7.2.1	Melt, Solution, and Emulsion Spinning.....	156
7.2.2	Electrospinning	157
7.2.3	Melt Blowing	158

7.3	Fibers Bearing Antimicrobial Molecules	158
7.4	Hybrid Organic–Inorganic Nanofibers with Antimicrobial Properties	161
7.5	Antibacterial Fibers with Covalently Bonded Biocides.....	166
7.6	Fibers with Responsive Antimicrobial Activity	167
7.7	Biodegradable Fibers with Antimicrobial Properties.....	172
7.8	Conclusions.....	174
	References.....	174
8	Antimicrobial Hydrogels	179
8.1	Introduction.....	179
8.2	Types of Hydrogels	180
8.3	Hydrogels as Supports of Antimicrobial Agents.....	181
	8.3.1 Hydrogels Containing Antimicrobial Metal Nanoparticles	181
	8.3.2 Hydrogels Loaded with Antibiotics	188
	8.3.3 Hydrogels Loaded with Antimicrobial Agents.....	189
8.4	Hydrogels with Inherent Antimicrobial Properties.....	190
	8.4.1 Antimicrobial Peptide-Based Hydrogels.....	191
	8.4.2 Antimicrobial Hydrogels Prepared from Natural Polymers.....	192
8.5	Dual Antimicrobial/Antifouling Hydrogels	195
8.6	Responsive Hydrogels with Antimicrobial Properties	196
8.7	Conclusions.....	199
	References.....	200
9	Antibacterial Polymeric Membranes	205
9.1	Introduction to Polymer Membranes	205
9.2	Contamination of Polymeric Membranes	207
	9.2.1 Membrane Biofouling	208
9.3	Strategies for the Modification of Polymeric Membranes.....	209
9.4	Types of Antifouling/Antimicrobial Polymers Employed in the Fabrication of Membranes	213
	9.4.1 Membrane Surface Modification with Anti-Adhesive Polymers	213
	9.4.2 Antimicrobial Biocides and Polymers Incorporated in Polymeric Membranes	218
9.5	Responsive Membranes	225
9.6	Conclusions.....	226
	References.....	226
10	Environmental and Safety Issues.....	231
10.1	Introduction.....	231
10.2	Using Small Biocides Released from the Polymer.....	232
10.3	Alternatives to Small Biocides: Nonleaching Polymer Materials.....	234

10.4	Safety Concerns Related to the Use of Different Antimicrobial Polymers: Cytotoxicity Against Mammalian Cells.....	237
10.4.1	General Mechanisms of Antimicrobial Toxicity	238
10.4.2	Cytotoxicity of Antimicrobial Polymers	240
10.4.3	Cytotoxicity of Hybrid Antibacterial Nanostructures	240
10.5	Environmental Friendly Non-Fouling Polymeric Materials	242
10.5.1	Strategies Approaches Based on the Modification of the Surface Chemistry.....	242
10.5.2	Fabrication of Nontoxic Antifouling Interfaces Based on the Surface Physical Properties	243
10.6	Particular Environmental and/or Safety Concerns Related to the Final Use and Conclusions.....	245
10.6.1	Particular Considerations in Polymeric Antimicrobial Packaging Systems.....	245
10.6.2	Modern Approaches to Environmentally Effective Marine Antifouling Coatings.....	246
10.7	Conclusions.....	248
	References.....	248
11	Applications and Current Status of Antimicrobial Polymers.....	255
11.1	Introduction.....	255
11.2	Main Areas of Application of Antimicrobial Polymers	256
11.2.1	Applications in the Fabrication of Medical and Healthcare Products.....	256
11.2.2	Antimicrobial Polymers in Food Packaging Applications	258
11.2.3	Textile Products.....	259
11.2.4	Water Treatment	261
11.2.5	Antimicrobial Paints.....	269
11.3	Gap Between Lab-Scale and Reality	270
11.4	Clinical Status of Antimicrobial Polymers	270
11.5	Conclusions.....	274
	References.....	275

Polymers against Microorganisms

On the Race to Efficient Antimicrobial Materials

Rodríguez-Hernández, J.

2017, XIII, 278 p. 93 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-47960-6
