

Contents

1	Oscillations of Systems with One Degree of Freedom	1
1.1	Free Harmonic Oscillations	2
1.2	Damped Oscillations	10
1.3	Forced Oscillations	14
1.4	Resonance Curves	18
1.5	Resonance in Nature and in Technology	23
1.6	Superposition Principle	27
2	Oscillations of Systems with Several Degrees of Freedom	33
2.1	Free Oscillators with Several Degrees of Freedom	34
2.2	Forced Oscillators with Several Degrees of Freedom	44
2.3	Transverse Oscillations of a String	46
2.4	The Harmonic Analysis	52
2.5	Harmonic Analysis of a Periodic Phenomena	57
2.6	Harmonic Analysis of a Non-periodic Phenomena	62
2.7	Harmonic Analysis in Space	70
3	Waves	77
3.1	Progressive Waves	79
3.2	Production of a Progressive Wave	84
3.3	Reflection of a Wave	85
3.4	Sound Waves	88
3.5	Plane Harmonic Plane Waves in Space	92
3.6	Electromagnetic Waves	94
3.7	The Discovery of Electromagnetic Waves	100
3.8	Sources and Detectors of Electromagnetic Waves	103
3.9	Impedance of Free Space	108
3.10	Intensity of the Sound Waves	109
3.11	Intensity of Electromagnetic Waves	113
3.12	Electromagnetic Waves in a Coaxial Cable	114
3.13	Doppler Effect	117

4 Dispersion	125
4.1 Propagation in a Dispersive Medium. Wave Velocities	126
4.2 Measurement of the Speed of Light	135
4.3 Refraction, Reflection and Dispersion of Light.	140
4.4 Rainbow	145
4.5 Wave Interpretation of Reflection and Refraction	151
4.6 Reflected and Transmitted Amplitudes	157
4.7 Origin of the Refractive Index	160
4.8 Electromagnetic Waves in Transparent Dielectric Media	169
5 Diffraction, Interference, Coherence	175
5.1 Huygens-Fresnel Principle	176
5.2 Light Interference	179
5.3 Spatial and Temporal Coherence	187
5.4 Interference with Non-coherent Light	196
5.5 Diffraction	201
5.6 Diffraction by a Slit	205
5.7 Diffraction by a Circular Aperture	211
5.8 Diffraction by Random Distributed Centers	214
5.9 Diffraction by Periodically Distributed Centers.	219
5.10 Diffraction as Spatial Fourier Transform.	226
6 Polarization	235
6.1 Polarization States of Light.	236
6.2 Unpolarized Light.	241
6.3 Dichroism.	242
6.4 Analyzers	243
6.5 Polarization by Scattering.	244
6.6 Polarization by Reflection.	246
6.7 Birefringence	248
6.8 Phase Shifters.	256
6.9 Optical Activity	259
7 Optical Images.	265
7.1 Preliminaries.	266
7.2 Plane Mirrors and Prisms	269
7.3 Parabolic Mirror	272
7.4 Spherical Mirror	274
7.5 Thin Lenses	278
7.6 Thin Lenses in Contact.	284
7.7 Images of Extended Objects	285
7.8 Aberrations	290
7.9 Irregularities	294
7.10 Depth of Field and Depth of Focus	296
7.11 Resolving Power.	298
7.12 Nature of the Lens Action	301

7.13	Magnifying Glass	304
7.14	Telescope	305
7.15	Microscope	309
7.16	Photometric Quantities	312
7.17	Properties of Images	317
8	Images and Diffraction	325
8.1	Abbe Theory of Image Formation	326
8.2	Phase Contrast Microscope	329
8.3	Sine Grating	332
8.4	Fresnel Zones	335
8.5	Zone Plate	337
8.6	Action of the Zone Plate on a Spherical Wave	341
8.7	Camera Obscura	343
8.8	Gabor Grating	346
8.9	Holograms	350
	Index	355

A Course in Classical Physics 4 - Waves and Light

Bettini, A.

2017, XIX, 361 p. 189 illus., 12 illus. in color., Softcover

ISBN: 978-3-319-48328-3
