

# Contents

## Part I Biomechanical Engineering

<b>Design and Implementation of a Low-Cost Mechatronic Shoe for Biomechanical Analysis of the Human Locomotion</b> . . . . .	3
P. Boscariol, A. Gasparetto, N. Giovanelli, S. Lazzer and L. Scalera	
<b>A Study of Feasibility for a Limb Exercising Device</b> . . . . .	11
G. Carbone, C. Aróstegui Cavero, M. Ceccarelli and O. Altuzarra	
<b>DARTAGNAN a Self-balanced Rehabilitation Robot Able to Work in Active and Passive Modes on Both Sides of Upper and Lower Limbs</b> . . . . .	23
M. Perrelli, P. Nudo, M. Iocco and G. Danieli	
<b>Dynamic Analysis of Handcycling: Mathematical Modelling and Experimental Tests</b> . . . . .	33
G. Azizpour, A. Ousdad, G. Legnani, G. Incerti, M. Lancini and P. Gaffurini	
<b>A Kinematic Solution of a Novel Leg Mechanism with Parallel Architecture.</b> . . . . .	41
Matteo Russo and Marco Ceccarelli	
<b>Multi-target Planar Needle Steering with a Bio-inspired Needle Design</b> . . . . .	51
Christopher Burrows, Fange Liu, Alexander Leibinger, Riccardo Secoli and Ferdinando Rodriguez y Baena	
<b>Development of an Active Force Plate for Testing Lower-Limb Prostheses</b> . . . . .	61
Cristiano Marinelli, Hermes Giberti and Ferruccio Resta	
<b>Determination of the Human Arm Stiffness Efficiency with a Two Antagonist Muscles Model</b> . . . . .	71
Daniele Borzelli, Stefano Pastorelli and Laura Gastaldi	

<b>Design of a Miniaturized Safety Clamping Device for Portable Kidney Replacement Systems . . . . .</b>	<b>79</b>
P. Boscariol, G. Boschetti, R. Caracciolo, M. Neri, D. Richiedei, C. Ronco and A. Trevisani	
<b>Conceptual Design of a Mechatronic Biomedical Wearable Device for Blood Ultrafiltration . . . . .</b>	<b>89</b>
G. Boschetti, A. Dalla Via, N. De Rossi, F. Garzotto, M. Neri, L. Pamato, C. Ronco and A. Trevisani	
<b>Design of an Underactuated Hand Exoskeleton with Joint Estimation . . . . .</b>	<b>97</b>
Mine Sarac, Massimiliano Solazzi, Daniele Leonardis, Edoardo Sotgiu, Massimo Bergamasco and Antonio Frisoli	
<b>Standard and Natural Motion Protocols for the Kinetic Measurements of the Squat . . . . .</b>	<b>107</b>
Nicola Sancisi, Marco Coconcelli, Riccardo Rubini and Vincenzo Parenti-Castelli	
<b>Design and Simulation of an Assisting Mechanism for Arm Exercises . . . . .</b>	<b>115</b>
B. Chaparro-Rico, D. Cafolla, M. Ceccarelli and E. Castillo-Castaneda	
<b>Part II History of Mechanism and Machine Science</b>	
<b>Role of Scientific-Technical Museums in the Future of Mechanical . . . .</b>	<b>127</b>
Alberto Rovetta and Edoardo Rovida	
<b>An Analysis of the Hydraulic Saw of Hierapolis. . . . .</b>	<b>135</b>
Cesare Rossi, Sergio Savino and Francesco Timpone	
<b>Part III Linkages and Mechanical Controls</b>	
<b>Riccati Equation Based Nonlinear Filter: A Case Study for Hydraulic Actuators in the Presence of Dead-Zone . . . . .</b>	<b>145</b>
Salvatore Strano and Mario Terzo	
<b>Trajectories Generation with Constant Extrusion Rate for Experimentations on AM Techniques and Extrusion Based Technologies . . . . .</b>	<b>153</b>
H. Giberti, L. Sbaglia and M. Parabiaghi	
<b>Preliminary Design of a Simplified Pneumatic Actuator . . . . .</b>	<b>161</b>
G.A. Naselli, M. Zoppi and R. Molfino	

## Part IV Multi-Body Dynamics

<b>Multibody Model of Under-Actuated Tendon Driven Finger to Study the Antagonist Tendon</b> . . . . .	175
Sergio Savino	
<b>A Model Reduction Strategy for Flexible-Link Multibody Systems</b> . . . .	183
Ilaria Palomba, Dario Richiedei and Alberto Trevisani	

## Part V Reliability

<b>Topology Optimization and Analysis of Static Transmission Error in Lightweight Gears</b> . . . . .	195
Jakub Korta, Domenico Mundo, Giuseppina Ambrogio, Barbara Folino, Shadi Shweiki and Luigino Filice	
<b>A Strategy for Moving Cable Driven Robots Safely in Case of Cable Failure</b> . . . . .	203
Giovani Boschetti, Chiara Passarini and Alberto Trevisani	
<b>Approaches to the Detectability of Faults in Railway Pantograph Mechanism.</b> . . . .	213
G. Santamato, M. Gabardi, M. Solazzi and A. Frisoli	
<b>Behaviour of Tilting-Pad Journal Bearings in Case of Large Manufacturing Errors</b> . . . . .	221
Steven Chatterton, Phuoc Vinh Dang, Paolo Pennacchi and Andrea Vania	

## Part VI Robotics and Mechatronics

<b>A New Automated 2 DOFs 3D Desktop Optical Scanner.</b> . . . .	231
Maria Cristina Valigi, Silvia Logozzo and Gabriele Canella	
<b>Adam's Hand: An Underactuated Robotic End-Effector</b> . . . . .	239
Giovanni Antonio Zappatore, Giulio Reina and Arcangelo Messina	
<b>Automatic System for Fibers Extraction from Brooms</b> . . . . .	247
P.F. Greco, G. La Greca, G. Larocca, S. Meduri, B. Sinopoli, D. Battaglia, A. Caseti, A. Aloise, G. Chidichimo and G. Danieli	
<b>Functional Design of a Robotic Gripper for Adaptive Robotic Assembly</b> . . . . .	257
F. Oscari, S. Minto and G. Rosati	
<b>Optimal Design of a Reconfigurable End-Effector for Cable-Suspended Parallel Robots</b> . . . . .	267
Luca Barbazza, Damiano Zanotto, Giulio Rosati and Sunil K. Agrawal	
<b>Kinematic Optimization of a 2DoF PRRRP Manipulator</b> . . . . .	277
Simone Cinquemani, Hermes Giberti and Giovanni Legnani	

<b>Optimized Trajectory Planning of Pick and Place Operations to Be Performed by Cable-Driven Parallel Robots . . . . .</b>	<b>287</b>
Luca Barbazza, Fabio Oscari, Simone Minto and Giulio Rosati	
<b>An Innovative Method for Sizing Actuating Systems of Manipulators with Generic Tasks . . . . .</b>	<b>297</b>
E. Fiore, H. Giberti and G. Bonomi	
<b>Experimentally Based Design of a Manually Operated Baler for Straw Bale Construction. . . . .</b>	<b>307</b>
Walter Franco, Giuseppe Quaglia and Carlo Ferraresi	
<b>Part VII Transportation Machinery</b>	
<b>Fast Calibration Procedure of the Dynamic Model of an Autonomous Underwater Vehicle from a Reduced Set of Experimental Data . . . . .</b>	<b>317</b>
Benedetto Allotta, Riccardo Costanzi, Luca Pugi, Alessandro Ridolfi and Andrea Rindi	
<b>Braking Energy Recovery in High Speed Trains: An Innovative Model . . . . .</b>	<b>327</b>
Amedeo Frilli, Enrico Meli, Daniele Nocciolini, Simone Panconi, Luca Pugi and Andrea Rindi	
<b>Dynamic Model and Instability Evaluation of an Articulated Mobile Agri-Robot . . . . .</b>	<b>335</b>
G. Carabin, R. Vidoni, F. Mazzetto and A. Gasparetto	
<b>NVH Analysis of Automotive Components: A Carbon Fiber Suspension System Case . . . . .</b>	<b>345</b>
Alessandro Fasana, Massimiliana Carello, Alessandro Ferraris, Andrea Airale and Davide Berti Polato	
<b>Dynamics of a Tethered Rover on Rough Terrain . . . . .</b>	<b>355</b>
Stefano Seriani, Paolo Gallina and Armin Wedler	
<b>Wind Propulsion for Robot Surface Mobility . . . . .</b>	<b>363</b>
Mario Foglia, Giulio Reina and Giovanni Boschetti	
<b>Anti-dive Front Suspension for Agricultural Tractors: Dynamic Model and Validation . . . . .</b>	<b>371</b>
Francesco Biral, Riccardo Pelanda and Alberto Cis	
<b>Dynamic Model of an Independent Carts System. . . . .</b>	<b>379</b>
Jacopo Cavalaglio Camargo Molano, Stefano Rossi, Marco Cocconcelli and Riccardo Rubini	

<b>Tyre-Road Adherence Conditions Estimation for Intelligent Vehicle Safety Applications</b> . . . . .	389
Mojtaba Sharifzadeh, Francesco Timpone, Arash Farnam, Adolfo Senatore and Ahmad Akbari	

## **Part VIII Tribology**

<b>Tilting Pad Journal Bearing TEHD Analysis: An Innovative Model</b> . . . . .	401
Amedeo Frilli, Enrico Meli, Daniele Nocciolini, Simone Panconi, Luca Pugi, Andrea Rindi and Stefano Rossin	
<b>Thermo-Hydrodynamic Analysis of Tilting Pad Journal Bearing with General Purpose CFD Software</b> . . . . .	411
Marco Del Chiaro, Paola Forte, Francesco Torrigiani and Enrico Ciulli	
<b>Multiple Holes Rectangular Gas Thrust Bearing: Dynamic Stiffness Calculation with Lumped Parameters Approach</b> . . . . .	421
Federico Colombo, Mona Moradi, Terenziano Raparelli, Andrea Trivella and Vladimir Viktorov	
<b>Theoretical and Experimental Study of a Rectangular Grooved Pocketed Air Pad</b> . . . . .	431
Federico Colombo, Danial Ghodsiyeh, Terenziano Raparelli, Andrea Trivella and Vladimir Viktorov	
<b>Experimental Identification of an Aerostatic Thrust Bearing</b> . . . . .	441
Federico Colombo, Luigi Lentini, Terenziano Raparelli and Vladimir Viktorov	
<b>Experimental Analysis of the Influence of the Electrical Arc on the Wear Rate of Contact Strip and Contact Wire in a.c. System.</b> . . . . .	449
Giuseppe Bucca, Andrea Collina and Ezio Tanzi	

## **Part IX Vibrations**

<b>Low-Cost Experimental Assessment of Forces in the Contact Bridge-Soundboard of Stringed Musical Instruments</b> . . . . .	459
Enrico Ravina	
<b>Vibration Modes of Piezoelectric Bimorphs: A Sensitivity Analysis</b> . . . .	467
Alberto Borboni, Cinzia Amici, Valter Cappellini and Rodolfo Faglia	
<b>Concurrent Active Control and Dynamic Structural Modification in the Design and the Optimization of Vibrating Systems</b> . . . . .	475
Roberto Belotti, Roberto Caracciolo and Dario Richiedei	

<b>A Vibration Isolator Based on Magneto-Rheological Elastomer . . . . .</b>	<b>483</b>
Renato Brancati, Giandomenico Di Massa and Stefano Pagano	
<b>A Physical Analytical Model to Study the Elasto-Kinematic Behaviour of a MacPherson Suspension . . . . .</b>	<b>491</b>
Francesco Timpone	
<b>A Smart System for Shock and Vibration Isolation of Sensitive Electronic Devices On-Board a Vehicle . . . . .</b>	<b>503</b>
M. De Michele, G. Di Massa, G. Frisella, S. Lippolis, S. Pagano, G. Pisani and S. Strano	
<b>Wavelet Analysis of Gear Rattle Induced by a Multi-harmonic Excitation. . . . .</b>	<b>513</b>
Renato Brancati, Ernesto Rocca, Sergio Savino and Francesco Timpone	
 <b>Part X Special Session in Honor of Prof. Aldo Rossi for his 70th Birthday</b>	
<b>Analytical and Multibody Modelling of a Quick-Release Hook Mechanism. . . . .</b>	<b>523</b>
Luca Bruzzzone, Davide Bonatti, Giovanni Berselli and Pietro Fanghella	
<b>Evolution of a Dynamic Model for Flexible Multibody Systems . . . . .</b>	<b>533</b>
P. Boscariol, P. Gallina, A. Gasparetto, M. Giovagnoni, L. Scalera and R. Vidoni	
<b>Anti-hedonistic Mechatronic Systems . . . . .</b>	<b>543</b>
Lorenzo Scalera, Paolo Gallina, Alessandro Gasparetto and Marco Giovagnoni	
<b>On the Use of Cable-Driven Robots in Early Inpatient Stroke Rehabilitation . . . . .</b>	<b>551</b>
G. Rosati, S. Masiero and A. Rossi	

Advances in Italian Mechanism Science

Proceedings of the First International Conference of  
IFTOMM Italy
