

Contents

1	Foundations of Josephson Junction Dynamics	1
1.1	Josephson Current	1
1.1.1	The Josephson Current Using Method of Tunnel Hamiltonian.	1
1.1.2	Josephson Current Using GL Theory	5
1.1.3	Josephson Current Using Bogoliubov-de Gennes Equations	6
1.2	Influence of Anisotropy and Multiband Effects of Superconducting State on Josephson Current.	9
1.2.1	JJs on D-Wave Superconductors	9
1.2.2	JJ Between Two-Band S-Wave Superconductors	11
1.2.3	CPR of S/F/S and S/AF/S Structures	14
1.3	Fabrication Parameters of JJs	16
1.3.1	Important Parameters of JJs	16
1.3.2	Experimental Results of Study of CPR in Different JJs.	19
1.4	Dynamical Properties of JJs	21
1.4.1	Resistively Shunted Junction (RSJ) Model of JJs	21
1.5	Influence of Anharmonic Effects of CPR on JJ Dynamics	25
1.5.1	Anharmonic Effects of CPR on IV Curve	25
1.5.2	Plasma Frequency of JJ Systems.	32
1.6	Macroscopic Quantum Dynamics of JJ.	41
1.6.1	Escape Rate in JJ at Low Temperatures	41
1.6.2	Influence of D-Wave Pairing Symmetry on Macroscopic Tunneling	43
1.6.3	Influence of Multigap Nature of Superconductivity on Escape Rate	45
1.6.4	Effect of Coulomb Blockade in Nano-Size JJs	46

2	Analog Superconductivity Electronics	49
2.1	Superconducting Bolometers	49
2.1.1	Low Frequency Limit	52
2.1.2	High Frequency Limit	55
2.2	Superconducting Samplers	56
2.2.1	Comparators on Single JJ	58
2.2.2	Time Resolution of a Single-Junction Comparator	59
2.2.3	Dynamics of Balanced Josephson Comparator	60
2.2.4	Time Resolution of Balanced Tunnel Josephson Comparators	61
2.2.5	Balanced Comparators on Overdamped JJs	63
2.2.6	Time Resolution of Balanced Overdamped Josephson Comparators	64
2.2.7	Sensitivity of Josephson Comparators	66
2.3	Superconducting Interfometers and SQUIDS	69
2.3.1	Flux Quantization in a Superconducting Ring with Single JJ	69
2.3.2	Basic Schema of AC SQUID and Their Parameters	73
2.3.3	Double Junction Interfometer and DC SQUID	76
2.3.4	DC SQUID Characteristics	79
2.4	Superconducting Microwave Devices	81
2.4.1	Resonators	82
2.4.2	Filters	83
2.4.3	Antenna	83
2.4.4	Delay Lines	84
2.5	Superconducting Devices in Meteorology	84
2.5.1	Voltage Standards	84
2.5.2	Current Standards	85
2.6	Multi-terminal Devices	86
3	Digital Superconductivity Electronics	89
3.1	Brief Overview of Status of Superconducting Digital Electronics	89
3.2	Latching Josephson Logic	91
3.3	Foundation and Basic Circuits of RSFQ Logic	92
3.3.1	Interfacing SFQ Pulses to Conventional Logic Circuits	94
3.3.2	Basic SFQ Circuits	98
3.3.3	Simulation of RSFQ Circuits	100
3.4	Timing Analysis and Optimization of RSFQ Circuits	103
3.4.1	Delay and Jitter Time in Wiring Gates	103
3.4.2	Optimization of SFQ Circuits	109
3.4.3	Design of RSFQ Wave Pipelined Kogge–Stone Adder	111

4 Superconducting Quantum Bits	119
4.1 Hamilton Formalism for Superconducting Qubits	119
4.1.1 Phase Qubit on a Single JJ	121
4.1.2 Charge Qubit on Single JJ	122
4.1.3 Flux Qubit on Single JJ Interferometer	125
4.2 Influence of Anharmonic CPR on Qubit Characteristics	128
4.2.1 Phase Qubit	128
4.2.2 Charge Qubits	132
4.3 Silent Qubit	135
4.4 Flux Qubit with Three JJ	136
4.5 Adiabatic Measurements of Superconducting Qubits	138
4.6 Direct Detection of Rabi Oscillation in Superconducting Qubits	141
5 Chaotic Phenomena in Josephson Systems	143
5.1 Chaotic Dynamics of a Single JJ and the Influence of Anharmonic CPR	143
5.2 Chaotic Behavior of Fractal JJ	146
5.3 Chaotic Dynamics of Resistively Coupled DC-Driven JJs	152
5.4 Bifurcation and Hyperchaos of Resistively Coupled DC-Driven JJs	160
5.4.1 Bifurcation Analysis	161
5.4.2 Results of Hyperchaos Simulations	165
5.5 Chaos Synchronization Between JJs	169

Modern Aspects of Josephson Dynamics and
Superconductivity Electronics

Askerzade, I.; Bozbey, A.; Cantürk, M.

2017, XVI, 186 p. 161 illus., 66 illus. in color., Hardcover

ISBN: 978-3-319-48432-7
