

Contents

- 1 An Introduction to Machine Learning** 1
 - 1.1 Introduction 1
 - 1.2 Typed of Machine Learning Strategies 2
 - 1.3 Classification 3
 - 1.3.1 Nearest Neighbors 4
 - 1.4 Parametric and Non-parametric Models 4
 - 1.5 Overfitting 5
 - 1.6 The Curse of Dimensionality 6
 - 1.7 Bias-Variance Trade-Off 7
 - 1.8 Data into Probabilities 8
 - References 11
- 2 Optimization** 13
 - 2.1 Definition of an Optimization Problem 13
 - 2.2 Classical Optimization 14
 - 2.3 Evolutionary Computation Methods 17
 - 2.3.1 Structure of an Evolutionary Computation Algorithm 18
 - 2.4 Optimization and Image Processing and Pattern Recognition 19
 - References 20
- 3 Electromagnetism—Like Optimization Algorithm: An Introduction** 23
 - 3.1 Introduction to Electromagnetism-Like Optimization (EMO) 23
 - 3.2 Optimization Inspired in Electromagnetism 24
 - 3.2.1 Initialization 25
 - 3.2.2 Local Search 26
 - 3.2.3 Total Force Vector 27
 - 3.2.4 Movement 29
 - 3.3 A Numerical Example Using EMO 30

3.4	EMO Modifications	31
3.4.1	Hybridizing EMO with Descent Search (HEMO)	34
3.4.2	EMO with Fixed Search Pattern (FEMO)	37
	References.	40
4	Digital Image Segmentation as an Optimization Problem	43
4.1	Introduction	43
4.2	Image Multilevel Thresholding (MT)	45
4.2.1	Between—Class Variance (Otsu’s Method).	46
4.2.2	Entropy Criterion Method (Kapur’s Method)	48
4.2.3	Tsallis Entropy	49
4.3	Multilevel Thresholding Using EMO (MTEMO)	51
4.3.1	Particle Representation	51
4.3.2	EMO Implementation with Otsu’s and Kapur’s Methods	51
4.3.3	EMO Implementation with Tsallis Entropy	52
4.4	Experimental Results	53
4.4.1	Otsu and Kapur Results	53
4.4.2	Tsallis Entropy Results	73
4.5	Conclusions	88
	References.	89
5	Template Matching Using a Physical Inspired Algorithm	93
5.1	Introduction	93
5.2	Template Matching Process	95
5.3	New Local Search Procedure in EMO for Template Matching.	98
5.3.1	The New Local Search Procedure for EMO	98
5.3.2	Fitness Estimation for Velocity Enhancement in TM	102
5.3.3	Template Matching Using EMO	102
5.4	Experimental Results	104
5.5	Conclusions	109
	References.	110
6	Detection of Circular Shapes in Digital Images.	113
6.1	Introduction	113
6.2	Circle Detection Using EMO	115
6.2.1	Particle Representation	116
6.2.2	Objective Function	117
6.2.3	EMO Implementation	118
6.3	Experimental Results	119
6.3.1	Circle Localization	120
6.3.2	Test on Shape Discrimination	121
6.3.3	Multiple Circle Detection	122
6.3.4	Circular Approximation.	123

6.3.5	Circle Localization from Occluded or Imperfect Circles and Arc Detection	124
6.3.6	Accuracy and Computational Time	125
6.4	Conclusions	131
	References.	132
7	A Medical Application: Blood Cell Segmentation by Circle Detection	135
7.1	Introduction	135
7.2	Circle Detection	138
7.2.1	Data Preprocessing	138
7.2.2	Particle Representation	138
7.2.3	Objective Function	139
7.2.4	EMO Implementation	140
7.2.5	White Blood Cell Detection	142
7.3	A Numerical Example of White Blood Cells Detection	146
7.4	Experimental Results	147
7.5	Comparisons to Other Methods	150
7.5.1	Detection Comparison	150
7.5.2	Robustness Comparison	151
7.5.3	Stability Comparison	153
7.6	Conclusions	155
	References.	155
8	An EMO Improvement: Opposition-Based Electromagnetism-Like for Global Optimization.	159
8.1	Introduction	159
8.2	Opposition - Based Learning (OBL).	161
8.2.1	Opposite Number	161
8.2.2	Opposite Point	162
8.2.3	Opposition-Based Optimization	162
8.3	Opposition-Based Electromagnetism-Like Optimization (OBEMO).	163
8.3.1	Opposition-Based Population Initialization	163
8.3.2	Opposition-Based Production for New Generation	165
8.4	Experimental Results	166
8.4.1	Test Problems	166
8.4.2	Parameter Settings for the Involved EMO Algorithms	166
8.4.3	Results and Discussions	170
8.5	Conclusions	175
	References.	176

Advances and Applications of Optimised Algorithms in
Image Processing
