

Contents

1	Introduction	1
1.1	General Introduction	1
1.2	What Does It Mean to Be Tangled?	2
1.3	Phase Singularities in Two and Three Dimensions	6
1.4	Random Waves and Vortex Tangle	15
1.5	Knotting and Linking as a Statistical Tool	22
1.6	Other Random Tangles and Random Walks	26
1.7	Variations on Random Waves	29
1.7.1	The 3-Torus (Periodic Boundary Conditions)	29
1.7.2	The 3-Sphere	34
1.7.3	The Quantum Harmonic Oscillator	37
1.8	Thesis Outline	39
	References	40
2	Numerical Methods	45
2.1	Numerically Locating Vortices	45
2.2	Tracking Vortices with a Resampling Algorithm	53
2.3	Vortex Tracking in Different Systems	60
2.4	Geometrical Details in Different Systems	65
2.4.1	The 3-Torus	65
2.4.2	The 3-Sphere	65
2.4.3	The Quantum Harmonic Oscillator	67
2.5	Summary of Numerical Results	68
2.5.1	The 3-Torus	68
2.5.2	The 3-Sphere	70
2.5.3	The Quantum Harmonic Oscillator	71
	References	72
3	Geometry and Scaling of Vortex Lines	75
3.1	Introduction to Geometrical Statistics	75
3.2	Local Geometry of Random Wave Vortices	77
3.3	Statistics of Curvature and Torsion	81

3.4	Geometric Correlations	85
3.5	Three Measures of Fractality	87
3.6	Scaling Relations of Random Tangle	94
3.7	Crossing Number and Writhe of Vortex Loops	100
3.8	Discussion	104
	References.	106
4	Topological Methods	109
4.1	A Practical Introduction to Knot Theory.	109
4.2	Calculating Invariants.	121
4.2.1	The Alexander Polynomial	122
4.2.2	The Determinant and Roots of the Alexander Polynomial	124
4.2.3	The Jones and HOMFLY-PT Polynomials	126
4.2.4	Hyperbolic Volume.	128
4.2.5	Minimal Crossing Number	128
4.2.6	The Linking Number.	129
4.2.7	The Fary-Milnor Theorem.	130
4.3	Simplifying Space Curves.	130
4.4	Topological Complexity	137
	References.	138
5	Knotting and Linking of Vortex Lines.	143
5.1	Finding Knots.	143
5.1.1	The 3-torus	144
5.1.2	The 3-sphere	147
5.1.3	The Quantum Harmonic Oscillator	150
5.2	Probabilities of Knotting.	153
5.3	Comparison of Knot Type Statistics	162
5.4	Finding Links	166
5.4.1	The 3-torus	166
5.4.2	The 3-sphere	168
5.4.3	The Quantum Harmonic Oscillator	169
5.5	Probabilities of Linking	170
5.6	Knotting in Lines with Non-trivial Homology	174
5.7	Postselection Relations	177
5.8	The Smallest Knot	179
5.9	Discussion	184
	References.	186
6	Conclusions	189
	Appendices.	193

Analysis of Quantised Vortex Tangle

Taylor, A.J.

2017, XVI, 197 p. 95 illus., 84 illus. in color., Hardcover

ISBN: 978-3-319-48555-3
