

Contents

1	Introduction	1
	Wojciech Stanek	
Part I Fundamentals		
2	Resources. Production. Depletion	7
	Wojciech Stanek, Alicia Valero, Guiomar Calvo and Lucyna Czarnowska	
3	Fundamentals of Exergy Analysis	37
	Wojciech Stanek, Jan Szargut and Sergio Usón	
4	“Input-Output” Approach to Energy Production Systems	81
	Andrzej Ziębik	
5	Cumulative Calculus and Life Cycle Evaluation	109
	Wojciech Stanek, Lucyna Czarnowska and Paweł Gładysz	
6	Thermodynamic Methods to Evaluate Resources	131
	Wojciech Stanek, Alicia Valero, Antonio Valero, Javier Uche and Guiomar Calvo	
7	Theory of Exergy Cost and Thermo-ecological Cost	167
	Antonio Valero, Sergio Usón, César Torres and Wojciech Stanek	
8	The Thermodynamic Rarity Concept for the Evaluation of Mineral Resources	203
	Antonio Valero, Alicia Valero and Adriana Domínguez	
9	Externalities Burdening Production Processes and Systems	233
	Lucyna Czarnowska	

Part II Applications

10	Computable Examples of the Application of “Input-Output” Models of Energy Production Systems.	255
	Andrzej Ziębik and Paweł Gładysz	
11	Application of Thermo-ecological Cost (TEC) as Sustainability Measure for Useful Products	289
	Wojciech Stanek, Jan Szargut and Lucyna Czarnowska	
12	Integrating the Thermo-ecological and Exergy Replacement Costs to Assess Mineral Processing	337
	Adriana Domínguez, Alicia Valero and Wojciech Stanek	
13	Application of Thermo-economic Analysis (TEA) to Industrial Ecology (IE).	353
	Sergio Usón and Wojciech Stanek	
14	Assessment of Water Resources by Exergy Cost.	371
	Javier Uche, Amaya Martínez and Beatriz Carrasquer	
15	Exergo-ecological Assessment of Multi-generation Energy Systems.	405
	Wojciech Stanek, Wiesław Gazda, Wojciech Kostowski and Sergio Usón	
16	Thermo-ecological Evaluation of Advanced Coal-Fired Power Technologies	443
	Paweł Gładysz and Andrzej Ziębik	
17	Cumulative Green-House Gasses (GHG) Emissions as Total Measure of Global Warming Potential	473
	Ryszard Białecki and Wojciech Stanek	
18	Thermo-ecological System Analysis as a Tool Supporting the Analysis of the National Energy and Environmental Policy.	489
	Andrzej Ziębik, Wojciech Stanek and Paweł Gładysz	

Thermodynamics for Sustainable Management of
Natural Resources

Stanek, W. (Ed.)

2017, VI, 510 p. 196 illus., Hardcover

ISBN: 978-3-319-48648-2
