

Contents

1	Vector and Tensor Analysis	1
1.1	Conventions and Symbols	1
1.1.1	Summation Convention	1
1.1.2	Kronecker's Delta and Permutation Symbol	2
1.1.3	Matrix and Determinant	2
1.2	Vector	6
1.2.1	Definition of Vector	6
1.2.2	Operations of Vectors	7
1.2.3	Component Description of Vector	11
1.3	Tensor	15
1.3.1	Definition of Tensor	15
1.3.2	Quotient Law	16
1.3.3	Notations of Tensors	18
1.3.4	Orthogonal Tensor	19
1.3.5	Tensor Product and Component	21
1.4	Operations of Tensors	22
1.4.1	Trace	23
1.4.2	Various Tensors	23
1.5	Scalar Triple Products with Invariants	29
1.6	Eigenvalues and Eigenvectors	31
1.7	Calculations of Eigenvalues and Eigenvectors	38
1.7.1	Eigenvalues	38
1.7.2	Eigenvectors	39
1.8	Eigenvalues and Eigenvectors of Skew-Symmetric Tensor	40
1.9	Cayley-Hamilton Theorem	42
1.10	Positive Definite Tensor	43
1.11	Polar Decomposition	43
1.12	Isotropic Tensor-Valued Tensor Function	45
1.13	Representation of Tensor in Principal Space	49
1.14	Two-Dimensional State	52
1.15	Tensor Functions	55

1.16	Partial Differential Calculi.	56
1.17	Differentiation and Integration in Tensor Field	59
	References.	63
2	Motion and Strain (Rate)	65
2.1	Motion of Material Point	65
2.2	Time-Derivatives.	67
2.3	Deformation Gradient and Deformation Tensors.	68
2.4	Strain Tensors.	73
2.5	Strain Rate and Spin Tensors	79
2.6	Logarithmic and Nominal Strains	91
2.7	Surface Element, Volume Element and Their Rates	93
2.8	Material-Time Derivative of Volume Integration	95
	References.	97
3	Stress Tensors and Conservation Laws	99
3.1	Stress Tensor	99
3.2	Conservation Law of Mass	104
3.3	Conservation Law of Linear Momentum	105
3.4	Conservation Law of Angular Momentum	105
3.5	Equilibrium Equation	106
3.6	Equilibrium Equation of Angular Moment	108
3.7	Virtual Work Principle	109
3.8	Various Simple Deformations.	110
3.8.1	Uniaxial Loading.	110
3.8.2	Simple Shear	112
3.8.3	Combination of Tension and Distortion.	122
	References.	125
4	Objectivity and Objective (Rate) Tensors	127
4.1	Objectivity	127
4.2	Influence of Rigid-Body Rotation on Various Mechanical Quantities.	128
4.3	Material-Time Derivative of Tensor	132
4.4	Convected Time-Derivative of Tensor	134
4.5	Corotational Rate Tensors.	142
4.6	Various Stress Rate Tensors	143
4.7	Time Derivative of Scalar-Valued Tensor Function	146
4.8	Work Conjugacy.	150
	References.	151
5	Elastic Constitutive Equations	153
5.1	Hyperelasticity	153
5.2	Infinitesimal Elastic Deformation	158
5.3	Cauchy Elasticity	161

5.4	Hypoelasticity	162
	References.	164
6	Basic Formulations for Elastoplastic Constitutive Equations	165
