

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Speech Recognition Systems	1
1.2	Articulatory Features for Phone Recognition Systems	2
1.3	Excitation Source Features for Phone Recognition Systems	3
1.4	Objective and Scope of the Work	4
1.5	Proposed Organization of the Book	5
	References	5
<b>2</b>	<b>Literature Review</b>	7
2.1	Introduction	7
2.2	Prior Works on Speech Recognition	7
2.3	Prior Works on Speech Recognition Using Articulatory Features	11
2.4	Prior Works on Speech Recognition Using Excitation Source Features	12
2.5	Summary	13
	References	14
<b>3</b>	<b>Articulatory Features for Phone Recognition</b>	17
3.1	Introduction	17
3.2	Speech Corpora	18
3.2.1	Bengali Speech Corpus	18
3.2.2	TIMIT Speech Corpus	18
3.3	Feature Extraction	19
3.3.1	Mel-frequency Cepstral Coefficients	19
3.3.2	Extraction of Articulatory Features	20
3.3.3	Prediction of Phone Posterior Features	31
3.4	Development of Baseline and Tandem Phone Recognition Systems	32

3.5	Hybrid Phone Recognition Systems Using Articulatory Features . . . . .	34
3.5.1	Development of Hybrid Phone Recognition Systems Using Articulatory Features. . . . .	34
3.5.2	Performance Evaluation of Hybrid Phone Recognition Systems. . . . .	37
3.6	Discussion of Results . . . . .	38
3.7	Summary . . . . .	44
	References. . . . .	45
<b>4</b>	<b>Excitation Source Features for Phone Recognition . . . . .</b>	<b>47</b>
4.1	Introduction . . . . .	47
4.2	Extraction of Excitation Source Features . . . . .	48
4.2.1	Computation of LP Residual. . . . .	48
4.2.2	Mel Power Differences of Spectrum in Sub-bands . . . . .	48
4.2.3	Residual Mel Frequency Cepstral Coefficients . . . . .	51
4.3	Phone Recognition Systems Using Excitation Source and Vocal Tract System Features . . . . .	51
4.4	Tandem Phone Recognition Systems Using Excitation Source and Vocal Tract Features . . . . .	53
4.4.1	Development of Tandem Phone Recognition Systems . . . . .	53
4.4.2	Performance Evaluation of Tandem Phone Recognition Systems. . . . .	53
4.5	Robust Phone Recognition Systems Using Excitation Source and Vocal Tract Features . . . . .	56
4.6	Summary . . . . .	62
	References. . . . .	62
<b>5</b>	<b>Articulatory and Excitation Source Features for Phone Recognition in Read, Extempore and Conversation Modes of Speech . . . . .</b>	<b>65</b>
5.1	Introduction . . . . .	65
5.2	Different Modes of Speech. . . . .	65
5.3	Feature Extraction. . . . .	66
5.3.1	Articulatory Features for Extempore and Conversation Modes of Speech . . . . .	66
5.3.2	Prediction of Articulatory Features . . . . .	67
5.3.3	Performance Evaluation of AF-Predictors . . . . .	69
5.4	Articulatory Feature-Based Tandem Phone Recognition Systems . . . . .	69
5.5	Hybrid Phone Recognition Systems Using Articulatory Features . . . . .	71
5.6	Phone Recognition Systems Using Excitation Source and Vocal Tract System Features . . . . .	73

- 5.7 Analysis Across Read, Extempore, and Conversation
  - Modes of Speech . . . . . 74
- 5.8 Summary . . . . . 78
- References. . . . . 78
- 6 Summary and Conclusion. . . . . 81**
  - 6.1 Summary of the Book . . . . . 81
  - 6.2 Contributions of the Book . . . . . 82
  - 6.3 Future Scope of Work . . . . . 83
  - References. . . . . 84
- Appendix A: MFCC Features . . . . . 85**
- Appendix B: Pattern Recognition Models . . . . . 89**

Speech Recognition Using Articulatory and Excitation  
Source Features

Rao, K.S.; K.E., M.

2017, XI, 92 p. 23 illus., 4 illus. in color., Softcover

ISBN: 978-3-319-49219-3
