

Contents

On the L_2 Markov Inequality with Laguerre Weight	1
Geno Nikolov and Alexei Shadrin	
Markov-Type Inequalities for Products of Müntz Polynomials Revisited	19
Tamás Erdélyi	
On Bernstein-Type Inequalities for the Polar Derivative of a Polynomial	41
N.K. Govil and P. Kumar	
On Two Inequalities for Polynomials in the Unit Disk	75
Richard Fournier and Stephan Ruscheweyh	
Inequalities for Integral Norms of Polynomials via Multipliers	83
Igor E. Pritsker	
Some Rational Inequalities Inspired by Rahman's Research	105
Xin Li, Ram Mohapatra, and Rajitha Ranasinghe	
On an Asymptotic Equality for Reproducing Kernels and Sums of Squares of Orthonormal Polynomials	129
A. Ignjatovic and D.S. Lubinsky	
Two Walsh-Type Theorems for the Solutions of Multi-Affine Symmetric Polynomials	145
Blagovest Sendov and Hristo Sendov	
Vector Inequalities for a Projection in Hilbert Spaces and Applications ..	163
Silvestru Sever Dragomir	
A Half-Discrete Hardy-Hilbert-Type Inequality with a Best Possible Constant Factor Related to the Hurwitz Zeta Function	183
Michael Th. Rassias and Bicheng Yang	

Quantum Integral Inequalities for Generalized Convex Functions	219
Muhammad Aslam Noor, Khalida Inayat Noor, and Muhammad Uzair Awan	
Quantum Integral Inequalities for Generalized Preinvex Functions	237
Muhammad Aslam Noor, Themistocles M. Rassias, Khalida Inayat Noor, and Muhammad Uzair Awan	
On the Bohr Inequality	269
Yusuf Abu Muhanna, Rosihan M. Ali, and Saminathan Ponnusamy	
Bernstein-Type Polynomials on Several Intervals	301
J. Szabados	
Best Approximation by Logarithmically Concave Classes of Functions ...	317
Dimitar Dryanov	
Local Approximation Using Hermite Functions	341
H.N. Mhaskar	
Approximating the Riemann Zeta and Related Functions	363
Frank Stenger	
Overconvergence of Rational Approximants of Meromorphic Functions	375
Hans-Peter Blatt	
Approximation by Bernstein–Faber–Walsh and Szász–Mirakjan–Faber–Walsh Operators in Multiply Connected Compact Sets of \mathbb{C}	401
Sorin G. Gal	
Summation Formulas of Euler–Maclaurin and Abel–Plana: Old and New Results and Applications	429
Gradimir V. Milovanović	
A New Approach to Positivity and Monotonicity for the Trapezoidal Method and Related Quadrature Methods	463
Q. I. Rahman and G. Schmeisser	
A Unified and General Framework for Enriching Finite Element Approximations	491
Allal Guessab and Yassine Zaim
