1	Introduction	1
	References.	9
2	Battery Production and Simulation	11
2.1	Battery Production	11
2.1.1	Batteries and Battery Components	11
2.1.2	Production Systems and Production Management	15
2.1.3	Production of Battery Cells and Systems	18
2.2	Simulation of Production Systems	24
2.2.1	Digital Factory	24
2.2.2	Simulation.	25
2.2.3	Simulation in Production.	27
2.2.4	Multiscale Simulation	28
2.2.5	Co-Simulation.	29
2.3	Summary and Preliminary Findings for the Simulation of Battery Production	31
	References.	32
3	State of Research for Multiscale Simulation of Production Systems	39
3.1	Selection of Approaches and Definition of Evaluation Criteria.	39
3.1.1	Selection of Approaches	39
3.1.2	Evaluation Criteria	40
3.2	Presentation and Evaluation of Existing Approaches	43
3.3	Findings and Research Demand	51
	References.	55
4	Multiscale Simulation Modeling Concept for Battery Production Systems	59
4.1	Objectives and Requirements	59
4.2	Modeling Framework Development	62
4.2.1	System Boundaries and Scope	63

4.2.2	Hierarchy and Scales	64
4.2.3	Multiscale Model Framework	66
4.3	Process Chain Model (1)	67
4.3.1	Process Chain Elements	68
4.3.2	Process Chain Configurations and Control Strategies	70
4.3.3	State Variables and Indicators	73
4.4	Concepts for Sub-models	81
4.4.1	Machine Models (2)	81
4.4.2	Product and Process Models (3)	88
4.4.3	Human Workers (4)	98
4.4.4	TBS Models (5)	99
4.4.5	Building Model (6)	106
4.5	Model Connection (7)	108
4.6	Result Evaluation and Visualization (8)	110
4.7	Application Procedure	115
4.7.1	Description of Production System and Stakeholders (I)	116
4.7.2	Definition of Evaluation and Simulation Objectives (II)	117
4.7.3	Definition of Required Models (III)	118
4.7.4	Modeling, Implementation (IV), and Coupling of Models (V)	120
4.7.5	Verification and Validation (VI)	123
4.7.6	Definition (VII) and Execution (VIII) of Simulation Runs	123
4.7.7	Evaluation of Simulation Results (IX) and Objectives (X)	124
4.7.8	Reporting of Evaluation Results (XI)	124
	References	125
5	Implementation of a Multiscale Core Model	131
5.1	Core Model Architecture	131
5.2	Core Model Components	133
5.2.1	Jobs and Product Types	133
5.2.2	Processing Unit Agents	134
5.2.3	Machine Agents	136
5.2.4	Workers	139
5.2.5	Building Zones and Lighting	139
5.2.6	Shift Schedules	140
5.2.7	Evaluation and Visualization	140
5.3	Compressed Air Generation System	141
5.4	Coupling and Synchronization of Models	142
5.5	Verification	143
