1	Indian Tropical Soils: An Overview	1
	References.	5
2	Cracking Clay Soils (Vertisols): Pedology, Mineralogy and Taxonomy	9
2.1	Introduction	10
2.2	Factors of Vertisol Formation: A Revisit	12
2.2.1	Parent Material	12
2.2.2	Climate	13
2.2.3	Topography.	14
2.2.4	Vegetation.	19
2.2.5	Time	19
2.3	Smectite Clay Minerals in Vertisols: Recent Initiatives for Their Proper Characterization	20
2.3.1	Characteristics of Smectite	20
2.3.2	Seat of Charge in and Layer Charge of Fine Clay Smectites.	22
2.3.3	Hydroxy-Interlayered Smectites (HIS) and Determination of Layer Charge	25
2.4	Genesis of Smectites in Vertisols: A Revised Status.	25
2.5	Recent Advances in Pedogenic Processes in Vertisols	28
2.5.1	Clay Illuviation in Vertisols: An Example of Proanisotropism.	28
2.5.2	Factors of Clay Illuviation in Vertisols	30
2.5.3	Relative Rapidity of Clay Illuviation, Pedoturbation and Slickenside Formation	30
2.5.4	Development of Microstructures and Vertical Cracks in Vertisols as Controlled by Smectite Swelling	34
2.6	Evolutionary Pathways of Vertisol Formation.	35
	References.	37

3	Red Ferruginous Soils: Pedology, Mineralogy and Taxonomy.	43
3.1	Introduction	44
3.2	US Soil Taxonomic Classes and Factors in the Formation of Red Ferruginous (RF) Soils	48
3.3	Clay Illuviation, Clay Enriched B Horizons and Taxonomic Rationale of RF Soils of Humid Tropical (HT) Climate.	49
3.4	RF Soils (Alfisols) in Semi-arid Tropics (SAT): Record of Climate Change and Polypedogenesis in the Holocene Period . . .	51
3.5	Acidity and Its Nature and Charge Characteristics in RF Soils of HT Climate: The Present Status.	56
3.6	Clay Mineralogy of RF Soils of the HT Climate: Recent Advances	61
3.6.1	Genesis of Gibbsite at the Expense of Kaolinite: Dissolution of a Myth.	61
3.6.2	Mixed Mineralogy Class for RF Soils of HT Climate: A Rational Proposal	64
3.7	Ultisols of Indian Tropical Humid Climate in Context with Doubtful Existence of Oxisols	65
	References.	66
4	Soils of the Indo-Gangetic Alluvial Plains: Historical Perspective, Soil-Geomorphology and Pedology in Response Climate Change and Neotectonics	71
4.1	Introduction	72
4.2	Early Studies on Soils	74
4.3	Soil-Geomorphology of the Indo-Gangetic Plains (IGP).	74
4.4	Soil Ages of the IGP	76
4.5	Pedogenic Response of the IGP Soils to Holocene Climatic Fluctuations	77
4.6	Pedogenic Response of the IGP Soils to Neotectonic Events	79
4.7	Soils of the IGP: Bio-climates, Pedogenic Processes, Mineralogy and Taxonomic Classes	81
4.7.1	Development of Soils in Different Bio-climates	81
4.7.2	Pedogenic Processes, Polygenesis and Taxonomic Classes of the IGP Soils	82
4.7.3	Clay Minerals and Mineralogy Class of the IGP Soils	84
	References.	87
5	Conceptual Models on Tropical Soil Formation	91
5.1	Introduction	91
5.2	Vertisols Spatially Associated with Alfisols and Mollisols on Zeolitic Deccan Basalts	92
5.3	Acidic Alfisols, Mollisols and Ultisols on Gneissic and Sedimentary Rock Systems	92
5.4	Critique on the Validation of the Conceptual Models.	93
	References.	94

6	Land and Soil Degradation and Remedial Measures	97
6.1	Introduction	97
6.2	Natural Chemical Degradation of Soils in the Indian SAT, and Remedial Measures	98
6.3	Definition, Processes and Factors of Soil Degradation	99
6.4	Natural Chemical Soil Degradation: Neotectonic-Climate Linked and Mineral Induced.	100
6.5	Chemical Soil Degradation: Regressive Pedogenic Processes in the SAT	101
6.6	Clay Mineral (Palygorskite) Induced Natural Chemical Soil Degradation	103
6.7	Micro-topography: A Unique Factor of Natural Soil Degradation in SAT	104
6.8	Indices of Soil Degradation	106
6.9	Rehabilitation of Degraded Soils	107
6.9.1	Difficulties in Identification and Reclamation of Sodic Soils	107
6.9.2	An Alternative Management to Reclaim Sodic Soils.	107
6.9.3	Linking Calcium Carbonates to Resilience of the IGP Sodic Soils	108
6.9.4	Calcium Carbonates as Soil Modifier in Ensuring Soil Sustainability of SAT Soils.	109
6.10	Nature and Extent of Degradation in RF Soils: A Critique.	109
	References.	112
7	Clay and Other Minerals in Soils and Sediments as Evidence of Climate Change.	115
7.1	Introduction	115
7.2	Di- and Tri-Octahedral Smectite as Evidence for Paleoclimatic Changes	117
7.3	Red and Black Soils in Semi-arid Climatic Environments	118
7.4	Clay Minerals in Soils of the Indo-Gangetic Plains (IGP)	118
7.5	Vertisols, Carbonate Minerals and Climate Change	119
7.6	Implications for Climate Change from Clay Minerals Record in Drill Cores of the Ganga Plains	122
	References.	123
8	Linking Minerals to Selected Soil Bulk Properties	127
8.1	Introduction	128
8.2	Clay and Other Minerals in Adsorption and Desorption of Major Nutrients.	128
8.2.1	Organic and Inorganic Carbon	128
8.2.2	Nitrogen	132
8.2.3	Phosphorus	134
8.2.4	Potassium	137
	References.	148

9 Importance of Pedology of Indian Tropical Soils in Their Edaphology	153
9.1 Introduction	153
9.2 Impact of Spatially Associated Non-sodic (Aridic Haplusterts) and Sodic (Sodic Haplusterts) Vertisols on Crop Performance	154
9.3 Linear Distance of Cyclic Horizons in Vertisols and Its Relevance to Agronomic Practices	155
9.4 Smectite as the First Weathered Product of the Deccan Basalt and Its Contribution in Growing Vegetation on Weathered Basalt and in Very Shallow Cracking Clay Soil	157
9.5 Sustainability of Rice Production in Zeolitic Vertisols	159
9.6 Holocene Climate Change, Natural Soil Degradation, Modified Vertisols and Their Evaluation	160
9.7 Soil Modifiers (Zeolites, Gypsum and CaCO_3) in Mitigating the Adverse Holocene Climate Change and Making Sodic Vertisols Resilient.	162
9.7.1 Ca-Zeolites	162
9.7.2 Gypsum.	164
9.7.3 CaCO_3	165
9.8 Acidity, Al Toxicity and Lime Requirement in RF Soils of HT Climates: A Critique.	167
9.9 Present Soil Health Status Due to Anthropogenic Activities in IGP Soils	168
References.	170
10 Summary and Concluding Remarks	175

A Treatise of Indian and Tropical Soils

Pal, D.K.

2017, XIV, 180 p. 44 illus., 18 illus. in color., Hardcover

ISBN: 978-3-319-49438-8
