

Contents

| | | |
|----------|--|----|
| 1 | Introduction | 1 |
| 1.1 | Motivation | 3 |
| 1.1.1 | Entanglement in the Symmetric States | 3 |
| 1.1.2 | Detecting Nonlocality in Many-Body Systems | 4 |
| 1.1.3 | The Relation Between Entanglement and Nonlocality | 5 |
| 1.1.4 | Atomic Monogamies of Correlations | 5 |
| 1.2 | Main Results | 6 |
| 1.2.1 | Characterization of PPT Entangled Symmetric States | 6 |
| 1.2.2 | Detecting Nonlocality with Two-Body Correlators | 7 |
| 1.2.3 | Entanglement and Nonlocality Are Inequivalent for Any Number of Particles | 7 |
| 1.2.4 | Elemental and Tight Monogamy Relations in No-Signalling Theories | 8 |
| 1.3 | Outline of the Thesis | 8 |
| | References | 9 |
| 2 | Background | 13 |
| 2.1 | Entanglement | 13 |
| 2.1.1 | Characterization of Entanglement | 14 |
| 2.1.2 | The Separability Problem | 16 |
| 2.2 | Nonlocality | 20 |
| 2.2.1 | The Device-Independent Formalism | 21 |
| 2.2.2 | A Geometric Approach to Correlations | 21 |
| 2.2.3 | Multipartite Nonlocality | 26 |
| 2.2.4 | Local Models | 27 |
| 2.3 | Systems of Indistinguishable Particles | 28 |
| 2.3.1 | The Block Decomposition of a Permutationally Invariant Operator. Schur–Weyl Duality | 28 |
| 2.3.2 | Symmetric States | 30 |
| | References | 31 |

| | | |
|----------|--|-----|
| 3 | PPT Entangled Symmetric States | 37 |
| 3.1 | Characterization | 38 |
| 3.1.1 | Separability Criteria | 38 |
| 3.1.2 | Symmetric Edge States | 44 |
| 3.1.3 | Schmidt Number | 50 |
| 3.2 | The Geometry of the Set of PPTES | 54 |
| 3.2.1 | Extremal PPT States | 55 |
| 3.2.2 | Algorithm to Produce Extremal PPT States | 58 |
| 3.3 | Particular Considerations | 60 |
| 3.3.1 | Special Constructions | 64 |
| | References | 71 |
| 4 | Nonlocality in Multipartite Quantum States | 73 |
| 4.1 | The Structure of the Local Polytope | 77 |
| 4.1.1 | Going to a Lower Order Correlations Local Polytope | 78 |
| 4.1.2 | The Symmetrized Polytope | 80 |
| 4.1.3 | The Permutationally Invariant K -Body Correlations Polytope | 82 |
| 4.1.4 | Characterization of the Vertices of the Permutationally Invariant Polytope | 86 |
| 4.2 | Classes of Bell Inequalities | 89 |
| 4.3 | Quantum Violation | 96 |
| 4.3.1 | Block-Diagonalization of the Bell Operator | 98 |
| 4.3.2 | Analytical Class of States | 99 |
| 4.3.3 | Accuracy of Analytical Results | 101 |
| 4.3.4 | The Two-Body Reduced Density Matrix | 103 |
| 4.3.5 | Robustness | 106 |
| 4.4 | Inequalities for the Dicke States | 108 |
| 4.4.1 | Quantum Violation of the Dicke States | 109 |
| 4.5 | Generalization | 111 |
| 4.5.1 | Expectation Values | 117 |
| 4.6 | Translationally Invariant Bell Inequalities | 119 |
| 4.6.1 | The Translationally Invariant Polytope | 119 |
| 4.6.2 | Equivalent Bell Inequalities | 121 |
| 4.6.3 | Numerical Results | 122 |
| 4.6.4 | Quantum Violation with Translationally Invariant Qudit States | 125 |
| 4.7 | Experimental Considerations | 128 |
| 4.7.1 | Experimental Realizations | 131 |
| | References | 133 |
| 5 | Relating Entanglement and Nonlocality | 139 |
| 5.1 | Local Models | 140 |
| 5.2 | Bilocal Models in the Multipartite Scenario | 143 |

| | | |
|----------|---|------------|
| 5.2.1 | The Extension | 143 |
| 5.2.2 | Certifying Genuinely Multipartite Entanglement | 145 |
| 5.3 | K -Local Models in the Multipartite Scenario | 148 |
| 5.4 | Applications | 151 |
| 5.4.1 | Isotropic States | 151 |
| 5.4.2 | Werner States | 152 |
| 5.5 | Conclusions and Outlook | 152 |
| 5.5.1 | Other Nonlocality Frameworks | 153 |
| | References. | 154 |
| 6 | Atomic Monogamies of Correlations | 157 |
| 6.1 | Monogamy Relations | 159 |
| 6.1.1 | Monogamy Relations for No-Signalling Theories | 159 |
| 6.1.2 | Monogamy Relations for Quantum Theory | 167 |
| 6.2 | Bounds on Randomness | 170 |
| 6.3 | Applications | 172 |
| 6.3.1 | Quantum Key Distribution | 172 |
| 6.3.2 | Randomness Amplification | 174 |
| | References. | 181 |
| 7 | Conclusions and Outlook | 183 |
| 7.1 | PPT Entangled Symmetric States | 183 |
| 7.2 | Detection of Nonlocality in Many-Body Systems. | 184 |
| 7.3 | Entanglement and Nonlocality are Inequivalent in General. | 185 |
| 7.4 | Atomic Monogamies of Correlations | 186 |
| | References. | 186 |

| | Appendix B: Additional Proofs | 199 |
| | Appendix C: Tables | 225 |
| | Appendix D: Curriculum Vitae | 233 |

Characterizing Entanglement and Quantum Correlations
Constrained by Symmetry

Tura i Brugués, J.

2017, XXV, 237 p. 17 illus., 8 illus. in color., Hardcover

ISBN: 978-3-319-49570-5
