

Contents

An Introduction to Cavitation in Inducers and Turbopumps	1
Luca d'Agostino, Lucio Torre, Angelo Cervone, Giovanni Pace, Dario Valentini and Angelo Pasini	
Experimental Methods for the Study of Hydrodynamic Cavitation	35
Steven L. Ceccio and Simo A. Mäkiharju	
An Introduction to Flow-Induced Instabilities in Rocket Engine Inducers and Turbopumps	65
Luca d'Agostino, Angelo Cervone, Lucio Torre, Giovanni Pace, Dario Valentini and Angelo Pasini	
Three-dimensional Simulation of Cavitation Instabilities	87
Yoshinobu Tsujimoto	
Rotordynamics of Turbopumps and Hydroturbines	109
Yoshinobu Tsujimoto	
On the Preliminary Design and Performance Prediction of Centrifugal Turbopumps—Part 1	137
Luca d'Agostino, Dario Valentini, Angelo Pasini, Lucio Torre, Giovanni Pace and Angelo Cervone	
On the Preliminary Design and Performance Prediction of Centrifugal Turbopumps—Part 2	157
Luca d'Agostino, Dario Valentini, Angelo Pasini, Lucio Torre, Giovanni Pace and Angelo Cervone	

Numerical Simulation of Cavitating Flows with Different Cavitation and Turbulence Models	179
Eric Goncalves	
Numerical Simulation of Cavitating Flows in Complex Geometries	235
Maria Vittoria Salvetti	
From Cavitating to Boiling Flows	259
Richard Saurel, Olivier Le Métayer and Pierre Boivin	

Cavitation Instabilities and Rotordynamic Effects in
Turbopumps and Hydroturbines
Turbopump and Inducer Cavitation, Experiments and
Design

d'Agostino, L.; Salvetti, M.V. (Eds.)

2017, VIII, 282 p. 172 illus., 41 illus. in color., Hardcover

ISBN: 978-3-319-49717-4
