

Contents

1	Introduction	1
2	Formal Preliminaries	9
2.1	Overview	9
2.2	Logic and Set Theory	10
2.3	Probability Theory	10
2.4	Statistical Variables	13
2.5	Correlation and Probabilistic Independence	16
2.6	Graph Theory	17
2.7	Bayesian Networks	19
3	Causal Nets	27
3.1	Introduction	27
3.2	Causal Graphs and Causal Models	28
3.3	The Causal Markov Condition	29
3.4	Minimality and Faithfulness	32
3.4.1	Minimality	32
3.4.2	Faithfulness	33
4	Causality as a Theoretical Concept	39
4.1	Introduction	39
4.2	Explanatory Warrant of the Theory of Causal Nets	43
4.2.1	Explaining Correlation	43
4.2.2	Explaining Screening Off	45
4.2.3	Explaining Linking-Up	48
4.2.4	Explaining Complex Scenarios with Possible Latent Common Causes	52
4.2.5	Explaining Screening Off and Linking-Up in Systems Without Robust Probability Distributions	59

4.3	Empirical Content of the Theory of Causal Nets	61
4.3.1	Empirical Content of the Causal Markov Axiom	61
4.3.2	Empirical Content of Assuming Faithfulness	62
4.3.3	Empirical Content of the Causal Markov Axiom and Assuming Faithfulness	62
4.3.4	Empirical Content of Adding Time Directedness	63
4.3.5	Empirical Content of Adding Intervention Assumptions	65
4.4	Conclusion	67
5	Causal Nets and Woodwardian Interventionism	71
5.1	Introduction	71
5.2	Woodward's Interventionist Theory of Causation	73
5.2.1	Causation and Possible Interventions	73
5.2.2	Reconstructing Woodward's Interventionist Theory of Causation	78
5.3	Three Problems with Woodward's Interventionist Theory of Causation	88
5.3.1	Problem (i): Causes One Cannot Intervene on	88
5.3.2	Problem (ii): Interventions as Intermediate Causes	93
5.3.3	Problem (iii): Deterministic Causal Chains and Deterministic Common Cause Structures	95
5.4	An Alternative Approach	101
5.4.1	An Alternative Theory Using Deterministic Interventions ...	101
5.4.2	An Alternative Theory Using Stochastic Interventions	106
5.5	Conclusion	111
6	Causal Nets and Mechanisms	115
6.1	Introduction	115
6.2	The RBN Approach	118
6.2.1	Recursive Bayesian Networks	118
6.2.2	Modeling Mechanisms with RBNs	122
6.3	Three Problems with the RBN Approach	124
6.3.1	Problem (i): Missing Causal Information	124
6.3.2	Problem (ii): Impossibility of Bottom-Up Experiments	126
6.3.3	Problem (iii): False Predictions Under Manipulation	129
6.4	An Alternative Approach	135
6.4.1	The MLCM Approach for Modeling Mechanisms	135
6.4.2	MLCMs vs. RBNs	141
6.4.3	Recent Objections Against the MLCM Approach	145
6.4.4	Philosophical Consequences	149
6.5	Constitutive Relevance Relations in MLCMs	151
6.5.1	Constitutive Relevance Relations in Mechanisms	151
6.5.2	Constitutive Relevance and MLCMs	155
6.5.3	Uncovering Constitutive Relevance Relations	158
6.5.4	Empirical Adequacy	163

6.6	Modeling Causal Cycles with MLCMs	164
6.6.1	A Cyclic Toy Mechanism	165
6.6.2	Solving the Static Problem	166
6.6.3	Solving the Dynamic Problem	168
6.6.4	MLCMs vs. RBNs Again.....	171
6.7	Conclusion	173
