PTCP Aim and Scope	v
Preface	vii
Obituary: Sir Harold W. Kroto (1939–2016)	xv
Obituary: Yves Chauvin (1930–2015)	xix
Obituary: Christiane Bonnelle (1930–2016)	xxiii
Obituary: Rossen Pavlov (1947–2016)	xxvii
Presenting the Hosts’ <i>Radioisotopes Production Laboratory</i> at the <i>Institute for Nuclear Research and Nuclear Energy</i>	xxxi
D. Tonev, N. Goutev, L.S. Georgiev, A. Nikolov	
Part I Quantum Methodology	
Towards the Inclusion of Dissipative Effects in Quantum Time-Dependent Mean-Field Theories	3
L. Lacombe, M. Vincendon, P.M. Dinh, P.-G. Reinhard and E. Suraud	
On the Ordering of Orbital Energies in the ROHF Method: Koopmans’ Theorem versus Aufbau Principle	17
B.N. Plakhutin, A.V. Novikov, N.E. Polygalova and T.E. Prokhorov	
Spin Effects in sp^2 Nanocarbons in the Light of Unrestricted Hartree-Fock Approach and Spin-Orbit Coupling Theory	39
Elena F. Sheka	
Population Analyses Based on Ionic Partition of Overlap Distributions	65
Ya Kun Chen and Yan Alexander Wang	

Topological Quantum Computation with Non-Abelian Anyons in Fractional Quantum Hall States	75
Lachezar S. Georgiev	

Part II Structure and Dynamics

Rb₂(³Σ_u⁺) Dimer Interacting with He Atoms: Quantum Structures of Small Clusters and Reactive Scattering Calculations: Rb + RbHe → Rb₂(³Σ_u⁺, ν) + He at Ultralow and Intermediate Energies	97
Gerardo Delgado-Barrio and Pablo Villarreal	

Water Structuring at Non-Polar Fluid Interfaces	119
Yana Tsoneva and Alia Tadjer	

Molecular Design of Organometallic Materials: Effect of the Metallophilic Interactions, Ligand, Metal, and Oxidation State	139
Julia Romanova, M.R. Ranga Prabhath, Yousif Sadik and Peter D. Jarowski	

Electrodynamical and Quantum Chemical Modelling of Electrochemical and Catalytic Processes on Metals and Semiconductors: A Review	159
A.V. Glushkov, A.A. Svinarenko, O.Yu. Khetselius, Yu.V. Dubrovskaya, A.S. Kvasikova, A.A. Kuznetsova and E.L. Ponomarenko	

Non-Linear Chaotic Dynamics of Quantum Systems: Molecules in an Electromagnetic Field and Laser Systems	169
A.V. Glushkov, V.V. Buyadzhi, A.S. Kvasikova, A.V. Ignatenko, A.A. Kuznetsova, G.P. Prepelitsa and V.B. Ternovsky	

Landau Quantisation of Electron Motion in the Crust of Highly Magnetised Neutron Stars	181
N. Chamel, Y.D. Mutafchieva, Zh.K. Stoyanov, L.M. Mihailov and R.L. Pavlov	

Part III Atomic and Molecular Properties

Electronic and Nuclear Dynamics for a Non-Equilibrium Electronic State: The Ultrafast Pumping of N₂	195
J. Šmýdke, J. Ajay, F. Remacle and R.D. Levine	

On the Inter-Ring Torsion Potential of 2,2'-Bithiophene: A Review of Open Problems and Current Proposals	209
Olga A. Guskova	

Theoretical Exploration of the Vibrational Structure and IVR of S_0 Thiophosgene at High Excitation Energies.	231
Svetoslav Rashev and David C. Moule	

Why is the “Donor-Acceptor” Stretching a <i>sine qua non</i> in Understanding the Vibrational Signatures of Ionic Hydrogen Bonds?	251
Jake A. Tan and Jer-Lai Kuo	

Relativistic Many-Body Perturbation Theory Calculations of the Hyperfine Structure and Oscillator Strength Parameters for Some Heavy Element Atoms and Ions.	271
O.Yu. Khetselius, P.A. Zaichko, A.V. Smirnov, V.V. Buyadzhi, V.B. Ternovsky, T.A. Florko and V.F. Mansarliysky	

Effects of Isotope Characteristics on the Electron System Ground State Energy of Helium-Like Ions	283
Ch.J. Velchev, R.L. Pavlov, D. Tonev, Zh.K. Stoyanov, L.M. Mihailov, Y.D. Mutafchieva and D. Van Neck	

Part IV Biochemistry and Biophysics

Computational Study of Michellamines: Naphthylisoquinoline Alkaloids with Anti-HIV Activity.	303
Liliana Mammino and Mireille K. Bilonda	

Integrated Computational Studies on Mutational Effects of a Nylon-Degrading Enzyme	317
Takeshi Baba, Katsumasa Kamiya and Yasuteru Shigeta	

Damage Induced by Proton Collisions on Building Blocks of Life	331
Marie-Christine Bacchus-Montabonel	

How Can the Green Sulfur Bacteria in the Depths of the Black Sea Use Quantum Computing for Light Harvesting?	341
Deiana Drakova and Gerold Doyen	

Part V Fundamental Theory

The Dirac Operator in Quantum Chemistry and Physics	361
Jacek Karwowski	

A Coherent Resonant Cosmology Approach and its Implications in Microphysics and Biophysics	375
Francis M. Sanchez	

**The Origin and Evolution of Complex Enough Systems
in Biology.** 409
Erkki Brändas

Author Index. 439

Subject Index. 441

Quantum Systems in Physics, Chemistry, and Biology

Advances in Concepts and Applications

Tadger, A.; Pavlov, R.; Maruani, J.; Brändas, E.J.;

Delgado-Barrio, G. (Eds.)

2017, XXXIX, 449 p. 123 illus., 74 illus. in color.,
