

Contents

1	The US Commercial Nuclear Power Plants and Their Potential Risks.	1
1.1	U.S. Nuclear Power Development	1
1.1.1	Discovery of Fission	1
1.1.2	Self-sustaining Chain Reaction	5
1.1.3	Peaceful Applications of Atoms	5
1.1.4	Nuclear Power Reactor with Fission Technology	6
1.2	U.S. Commercial Nuclear Power Plants in Operation.	8
1.2.1	Operating License Requirement	8
1.2.2	Operating License Process	10
1.2.3	License Renewal	12
1.2.4	Current Reactors in Operation.	12
1.3	U.S. Commercial Nuclear Power Plants and Their Potential Risks	16
1.3.1	Core-Meltdown Risks	16
1.3.2	Contamination Risks	30
1.3.3	Nuclear Radiation Risks	32
1.3.4	Terrorist Attack Risks	33
1.3.5	Inevitable Risks.	33
	References.	34
2	Communities Hosting US Commercial Nuclear Power Plants	39
2.1	Setting Boundaries in Host Communities	39
2.2	Invisible Risks and Unknown Consequences	40
2.2.1	Nuclear Power Plant Siting and Environmental Justice	40
2.2.2	Embracing the Low-Level Radiation.	42
2.2.3	Consequence of Constant Exposure to Low-Level Radiation.	43
2.2.4	Incomplete Knowledge of Low-Level Radiation Consequences	44

2.2.5	Nuclear Power Facilities Living Longer Than Human Average Longevity	46
2.3	Data and Research Methods	47
2.3.1	Study Questions	47
2.3.2	Study Variables	47
2.3.3	Study Data	48
2.3.4	Study Methods	49
2.4	Overall Demographic Composition by Distance	50
2.5	Hosting Communities in Urban and Non-urban Areas	58
2.6	Hosting Communities at Individual Nuclear Power Plants	58
2.7	Demographic Changes in 1990–2000 and 2000–2010	66
2.8	Conclusion	72
	References	73
3	Nuclear Power Emergencies and Their Management Process	75
3.1	Disaster and Emergency Management Process	75
3.2	Nuclear Power Emergency Management Process	77
3.3	Nuclear Power Emergency and Response	79
3.4	Projection of Plume Path Dispersion	82
3.4.1	RASCAL Computer Code	82
3.4.2	Obtaining RASCAL Computer Code	83
3.4.3	Installing RASCAL	84
3.4.4	RASCAL Tools	86
3.4.5	Projecting Source to Term Dose	88
3.4.6	Exporting to Shapefile	96
3.4.7	Overlaying on Other Map Layers	96
3.5	Protective Action Recommendation (PAR)	99
3.6	Protective Action Decisions (PADs)	101
3.7	Evacuation	101
3.8	Conclusions	103
	References	103
4	Simulation of Nuclear Power Plant Core-Meltdown Accidents	105
4.1	Nuclear Power Plant Core-Meltdown Accidents	105
4.2	Radioactive Plume Dispersion	105
4.3	A Scenario of a Core-Meltdown Accident at the Palo Verde Nuclear Power Plant	106
4.3.1	Palo Verde Nuclear Generation Station (PVNGS)	106
4.3.2	Pressurized Water Reactor (PWR) Core-Damage Accident	106
4.3.3	Projected Plume Path for Quarter 1	108
4.3.4	Projected Plume Path for Quarter 2	112
4.3.5	Projected Plume Path for Quarter 3	113
4.3.6	Projected Plume Path for Quarter 4	115

4.4	A Scenario of Core-Meltdown Accident at the Indian Point Nuclear Power Plant	118
4.4.1	Indian Point Nuclear Power Plant	118
4.4.2	Projected Plume Path for Quarter 1	118
4.4.3	Projected Plume Path for Quarter 2	124
4.4.4	Projected Plume Path for Quarter 3	125
4.4.5	Projected Plume Path for Quarter 4	128
4.5	Projection Limitations	130
4.6	Conclusion	132
	References	133
5	Issues Associated with the Nuclear Power Emergency	135
5.1	Policy Issues Associated with Nuclear Power Emergency Response	135
5.2	Issues Associated with the Process	142
5.3	Issues Associated with the Priorities	143
5.4	Issues Associated with the Stakeholders' Participation	146
5.5	Issues Associated with the Evacuation	147
5.6	Issues Associated with the Recovery	149
5.7	Conclusion	150
	References	152
6	Conclusions	155
6.1	Dealing with the Inevitable Risks of NPPs	155
6.2	Eliminating the Inevitable Risks	156
6.3	Transforming the Inevitable Risks	159
6.4	Minimizing the Inevitable Risks	160
6.5	Revisiting Radiological Emergency Planning	162
	References	166
	Appendix A	169
	Appendix B: Descriptive Analyses	173
	Index	357

Nuclear Power Plant Emergencies in the USA
Managing Risks, Demographics and Response

Kyne, D.

2017, XV, 359 p. 125 illus., 119 illus. in color.,

Hardcover

ISBN: 978-3-319-50342-4
