

Contents

- 1 Introduction** 1
 - 1.1 Introduction 1
 - 1.2 Remarkable Innovation: Mass Production. 3
 - 1.3 Batch Production 4
 - 1.4 Improving Productivity of Batch Production. 5
 - 1.4.1 Manufacturing. 6
 - 1.5 Favorite Innovation: The Search for Production Efficiency. 9
 - 1.5.1 Outcome of Long Throughput Times 10
 - 1.5.2 Remarkable Innovation: Group Technology 11
 - 1.5.3 Remarkable Innovation: Numerical Control Machines 12
 - 1.6 Conclusions 13
- 2 Group Technology**. 15
 - 2.1 Introduction 15
 - 2.1.1 The Evolution of Group Technology. 16
 - 2.2 Definition of Group Technology. 17
 - 2.3 Expectations of Group Technology. 19
 - 2.3.1 Group Technology as Leading Technology. 19
 - 2.3.2 Predictions for Group Technology 20
 - 2.4 Disappointments in Group Technology. 21
 - 2.4.1 Form Families. 22
 - 2.4.2 Classification and Coding 25
 - 2.4.3 Creating Part Families. 27
 - 2.5 Summary 29
 - References. 30
- 3 Numerical Control**. 33
 - 3.1 Numerical Control (NC) 33
 - 3.1.1 CNC and DNC 34

3.2	Increased Processing Time	35
3.2.1	Automatic Tool Changer.	35
3.2.2	Automatic Workpiece Loading/Unloading.	36
3.2.3	Machining Center	37
3.3	Auxiliary Manufacturing Hardware.	38
3.3.1	Industrial Robots.	38
3.3.2	AGV—Automated Guided Vehicle.	38
3.3.3	AS/RS Automated Warehouse	39
3.4	Remarkable Successes and Disappointments.	40
3.4.1	Flexible Manufacturing System—FMS	40
3.4.2	Flexible Manufacturing Cell—FMC	45
3.4.3	Unmanned Factory—The Factory of the Future	46
4	Integrated Manufacturing Systems	55
4.1	Introduction	55
4.1.1	Manufacturing Concepts and Objectives	57
4.2	Traditional Manufacturing Approach	60
4.2.1	Basic Notions of a Hierarchical Approach	60
4.3	Computer Integrated Manufacturing	62
4.4	Overview of Manufacturing Proposal Methods.	66
4.4.1	List of Manufacturing Methods.	68
4.4.2	Detailed Descriptions of Certain Methods.	71
4.5	Summary	80
5	Analysis and Restoration	83
5.1	Introduction	83
5.2	Process Planner Activities.	86
5.2.1	Metal-Cutting Process Planning	87
5.2.2	Process Planning Method	89
5.2.3	Example of the Concept	91
5.2.4	Routine	94
5.2.5	Universal Process Planning Method	96
5.3	CAD for Manufacturing Support	97
5.3.1	Available CAD Technologies	100
5.3.2	Notions for CAD Part Description	102
5.4	Group Technology	105
5.4.1	Drawings Management	105
5.4.2	New Design	107
5.5	Numerical Control	112
5.5.1	Machine Capabilities Upgrade.	113

5.6	Manufacturing	114
5.6.1	Notions for a Simple, Flexible Production Planning System	116
5.6.2	Job Released for Execution	117
5.6.3	Algorithm and Terminology	121
5.6.4	Summary.	126
	References.	127
Index		129

Expectations and Disappointments of Industrial
Innovations

Halevi, G.

2017, XI, 131 p. 11 illus., Hardcover

ISBN: 978-3-319-50701-9
