

Contents

Dynamic Analysis of Column Stand for Aircraft Multi-barrel Machine Gun with Consideration of Bearing Clearance	1
Paweł Abratowski, Wiesław Krasoń, Wiesław Barnat and Włodzimierz Gnarowski	
Fatigue Life Estimation in Bucket-Wheel Excavators Maintenance	9
J. Alenowicz and W. Huss	
Analysis of State of Stress in the Loading Assembly of One-Bucket Wheel Loader Operated in Copper Mine.	19
Jakub Andruszko and Eugeniusz Rusiński	
Intelligent 1 kW Vertical Axis Wind Turbine—Simplified Analytical Model.	29
Piotr Araszkiewicz, Włodzimierz Gnarowski, Paweł Abratowski, Michał Ćmil and Michał Pokorski	
Application of Contemporary Measurement and Calculation Methods for Structural Analysis and Monitoring of Heritage Buildings	37
Łukasz Bednarz, Artur Górski, Jerzy Jasieńko, Eugeniusz Rusiński and Marcin Rutkowski	
Synthesis and Structural Analysis of High Strength Composite Flexible Landing Gear Legs.	49
Paweł Borkowski, Adam Dacko and Mirosław Rodzewicz	
The Influence of the Type of Used Connections on the Results of Analyses Carried Out in CATIA System	63
Dawid Cekus, Dorian Skrobek and Daniel Różalski	

Modeling and Stress Analysis of an Industrial CNC Plotter	71
Dawid Cekus, Dorian Skrobek and Tomasz Zajac	
Numerical Identification of Effort of Load Carrying Structure of Adjustable Stand	79
Robert Czabanowski	
Selected Aspects of Technical Condition State Assessment of Spreaders Operating in Lignite Mines	89
Jerzy Czmochoowski, Przemysław Moczko, Damian Pietrusiak, Grzegorz Przybyłek and Eugeniusz Rusiński	
The Optimization of Three-Involute Tooth Outline with Taking into Consideration Multi-valued Logic Trees	99
A. Deptuła and P. Osiński	
Study of the Causes of Boom Elements Cracking of Electric Demolition Machine with Use of Experimental and Numerical Methods	109
Damian Derlukiewicz and Maciej Cieślak	
Study Optimization of the Design-Construction Process of the Design Element of the Electric Remote Control Demolition Machine Based on the Design Thinking Methodology	121
Damian Derlukiewicz and Katarzyna Mielniczyn	
The Numerical-Experimental Studies of Demolition Machine Operator Work	129
Damian Derlukiewicz, Mariusz Ptak, Johannes Wilhelm and Krzysztof Jakubowski	
The Impact of Cross Beam on Stresses of Girders in Low Water Bridges	139
Artur Duchaczek	
Analysis of the Test Rig Conception for the Drilling-Bolting Systems Testing	149
Paulina Działak and Jacek Karliński	
Verification of the Theory of Construction Similarities in the Connectors	157
Piotr Gendarz, Rafał Rząsiński and Dominik Rabsztyn	
The Process of Parameterization and Creating Reference Construction	167
Piotr Gendarz, Rafał Rząsiński and Dominik Rabsztyn	

Simulations of Air Flow Around the Blades of a Wind Turbine Rotor Using CFD Methods	175
Tomasz Górnicz, Tadeusz Lewandowski, Romuald Sałacki and Wiktor Słomski	
The Analysis of the Stress Distribution in Contact Pairs <i>Ball-Wire</i> and <i>Wire-Ring</i> in Wire Raceway Slewing Bearing	185
Dominik Gunia and Tadeusz Smolnicki	
Investigation of Titanium Dioxide Effectiveness of BTX Photocatalytic Oxidation for Automotive Applications Using Advanced Optimisation Algorithms	197
Aleksander Górniak, Anna Janicka, Maciej Zawiaślak and Daniel Michniewicz	
Analysis of Construction and Internal Load of the Powertrain of the Prototypical Four-Wheeled Mobile Platform	211
Anna Jaskot, Bogdan Posiadała and Szczepan Śpiewak	
CFD Model of an External Gear Pump	221
Paulina Jędraszczyk and Wiesław Fiebig	
Preliminary CFD Analysis of the Influence of the Geometry of the Selected Element on the Fluid Flow in the Tank of the Hydraulic System	233
Klaudiusz Klarecki and Dominik Rabsztyń	
A Review of Fused Deposition Modeling Process Models	241
Piotr Komarnicki	
Method for Determining Bucket Chain Drive Loads During Excavation of the Bucket Chain Excavator	249
Marcin Kowalczyk, Jerzy Czmochoński, Przemysław Moczko and Eugeniusz Rusiński	
Design by Analogy: Synectics and Knowledge Acquisition Network	259
Sebastian Koziołek	
Correlation of Gears Strength and Methods of Determining the Coefficient of Load Distribution Along the Tooth Width	275
Stanisław Krawiec, Michał Krawiec and Tadeusz Leśniewski	
The Design and Field Tests of a Box for “Erg” Electric Blasting Caps	285
Piotr Krysiak, Ireneusz Lubach, Janusz Śliwiński and Andrzej Wojciechowski	
Airless Tire Conceptions Modeling and Simulations	293
Michał Kucewicz, Paweł Baranowski and Jerzy Małachowski	

Method of Assessment of Energy Consumption of Forklifts in Warehouses with Specific Operating Conditions	303
Stanisław Kwaśniewski and Paweł Zając	
Modeling and Strength Analysis of the Specialized Car Trailer	313
Piotr Ladra and Bogdan Posiadała	
Application of Reverse Engineering Methods in 3D Wide Area Measurements	323
Mateusz Lebiechowski	
Experimental Analysis of the State of Stress of the Axisymmetric Perforated Plates Loaded With Hydrostatic Pressure	331
W. Ledwoń and H. Achtelik	
CAD/CAE Applications in Mill's Design and Investigation	343
Marek Macko, Józef Flizikowski, Zbigniew Szczepański, Krzysztof Tyszczyk, Grzegorz Śmigielski, Adam Mroziński, Jacek Czerniak and Andrzej Tomporowski	
The Method of Artificial Organs Fabrication Based on Reverse Engineering in Medicine	353
Marek Macko, Zbigniew Szczepański, Dariusz Mikołajewski, Emilia Mikołajewska and Sławomir Listopadski	
Image Filtering and Acquisition for Detection Damage of Conveyor Belts	367
Paweł Maślak	
Analysis of the Blood Flow Through the Centrifugal Pump	375
Joanna Mikołajczak, Jakub Słowiński and Maciej Zawiaślak	
Topology Optimization of Structures Subjected to Transient Thermomechanical Loading	383
Mirosław W. Mrzygłód and Piotr Duda	
Investigation of Influence of Unevenly Spaced Blades onto Working Parameters of Centrifugal Fans Impellers Used in Mine Ventilation	389
Piotr Odyjas, Przemysław Moczko, Maciej Zawiaślak and Damian Pietrusiak	
Computer Supporting of Determining Decision Interactive Variables for the Importance Rank of Construction and Exploitation Parameters Illustrated with an Example of a Gear Pump After Tooth Root Undercutting	399
Marian A. Partyka and Agnieszka Tiszbierok	

Application of Piezoelectric Films for Measuring Dynamical Response of Freight Wagons During Exploitation	407
Marek Placzek, Andrzej Wróbel and Andrzej Buchacz	
FEM (Finite Element Method) Numeric Analyses of the Syrenka S201 Car Model	415
Krzysztof Podkowski, Zbigniew Barszcz and Jarosław Seńko	
Numerical Simulations of Composite Frontal Protection System According to EC 78/2009	423
Mariusz Ptak, Paweł Blicharski, Eugeniusz Rusiński and Jacek Karliński	
Computer Simulations for Head Injuries Verification After Impact	431
Mariusz Ptak, Paweł Kaczyński, Fabio Fernandes and Ricardo Alves de Sousa	
Analysis of the Use of Biogas as Fuel for Internal Combustion Engines	441
Mariusz Ptak, Sebastian Koziółek, Damian Derlukiewicz, Mateusz Słupiński and Marek Mysior	
Calculations with the Finite Element Method During the Design Ballistic Armour	451
Dariusz Pyka, Krzysztof Jamroziak, Wojciech Blazejewski and Mirosław Bocian	
Experimental Tests of Pressure Pulsation of Gear Pumps	461
D. Rabsztyn and K. Klarecki	
Analysis of Blood Flow Through the Pathologically Changed Main Artery	471
Alina Rudiak, Jakub Słowiński and Maciej Zawisław	
Some Aspects of Numerical Calculations of Specialized Vehicle's Load Carrying Structure for the Transport of Dangerous Materials by the Requirements of the European ADR Agreement	479
Eugeniusz Rusiński, Artur Górski, Michał Paduchowicz and Marcin Pondel	
The Numerical and Experimental Vibrations Analysis of WLS Series Fans Designed for the Use in Underground Mines	489
Eugeniusz Rusiński, Przemysław Moczko, Piotr Odyjas and Jędrzej Więckowski	

Computer-Aided Process of Selecting Technological Features for Machine Design Series of Types.	505
Rafał Rzański and Piotr Gendarz	
The Assessment Method of Operation Fuel Consumption of Underground Machinery	515
Lech J. Sitnik, Monika Magdziak-Tokłowicz and Monika Andrych-Zalewska	
A Comparison Between Two Different Methods of Blast Modelling.	527
Grzegorz Sławiński, Piotr Malesa, Tadeusz Niezgoda and Marek Świerczewski	
Explosive Charge Impact on Dual-Layer Aluminium-Steel Shield	537
Grzegorz Sławiński, Marek Świerczewski, Tadeusz Niezgoda and Piotr Malesa	
The Analysis of Suspension Performance of High Speed Tracked Vehicle	543
M. Stanco and M. Kosobudzki	
Numerical Analysis of Guyed Mast for Small Wind Turbine at Normal Operating Conditions	551
Tomasz Szafrński and Jerzy Małachowski	
Designing of Multilayered Protective Panels Against Improvised Debris.	561
Michał Szymczyk, Wojciech Sumelka and Tomasz Łodygowski	
Computer Supporting of Determining Decision Conditional Variables for the Importance Rank of Construction and Exploitation Parameters Illustrated with an Example of a Whirl-Propeller Pump.	571
Agnieszka Tiszberek and Marian A. Partyka	
Stability of a Hydraulic Telescopic Cylinder Subjected to Euler's Load	581
Sebastian Uzny, Krzysztof Sokół and Łukasz Kutrowski	
The Influence of Manufacturing Technology on the Mechanical Properties of Fiber Composites.	589
Maciej Wnuk and Artur Iluk	
Determining the Response of Piezoelectric Sensors Working as Sensors of Freight Wagon Construction.	597
Andrzej Wróbel, Marek Płaczek and Andrzej Buchacz	

Feature Recognition Methods Review	605
Rafał Zbiciak and Cezary Grabowik	
Chaboche Material Model and Thermo-Mechanical Behaviour of Polymers with Respect to Fatigue	617
Matthias Ziegenhorn, Ewa Grzelak, Marek Sawicki, Daniela Schob and Holger Sparr	

Proceedings of the 13th International Scientific
Conference

Computer Aided Engineering

Rusiński, E.; Pietrusiak, D. (Eds.)

2017, XI, 631 p. 471 illus., 380 illus. in color., Hardcover
