

Contents

Stealthy Protocols: Metrics and Open Problems	1
<i>Olga Chen, Catherine Meadows, and Gautam Trivedi</i>	
A Specification Theory of Real-Time Processes	18
<i>Chris Chilton, Marta Kwiatkowska, Faron Moller, and Xu Wang</i>	
Towards Verification of Cyber-Physical Systems with UTP and Isabelle/HOL	39
<i>Simon Foster and Jim Woodcock</i>	
FDR: From Theory to Industrial Application	65
<i>Thomas Gibson-Robinson, Guy Broadfoot, Gustavo Carvalho, Philippa Hopcroft, Gavin Lowe, Sidney Nogueira, Colin O'Halloran, and Augusto Sampaio</i>	
Information Flow, Distributed Systems, and Refinement, by Example	88
<i>Joshua D. Guttman</i>	
Abstractions for Transition Systems with Applications to Stubborn Sets.	104
<i>Henri Hansen</i>	
A Hybrid Relational Modelling Language	124
<i>He Jifeng and Li Qin</i>	
What Makes Petri Nets Harder to Verify: Stack or Data?	144
<i>Ranko Lazić and Patrick Totzke</i>	
Analysing Lock-Free Linearizable Datatypes Using CSP	162
<i>Gavin Lowe</i>	
Discrete Random Variables Over Domains, Revisited	185
<i>Michael Mislove</i>	
A Demonic Lattice of Information.	203
<i>Carroll Morgan</i>	
A Brief History of Security Protocols	223
<i>Peter Y.A. Ryan</i>	
More Stubborn Set Methods for Process Algebras.	246
<i>Antti Valmari</i>	

A Branching Time Model of CSP	272
<i>Rob van Glabbeek</i>	
Virtualization Based Development.	294
<i>Jay Yantchev and Atanas Parashkevov</i>	
Author Index	319

Concurrency, Security, and Puzzles

Essays Dedicated to Andrew William Roscoe on the
Occasion of His 60th Birthday

Gibson-Robinson, Th.; Hopcroft, P.; Lazić, R. (Eds.)

2017, XVIII, 319 p. 58 illus., Softcover

ISBN: 978-3-319-51045-3
