

Contents

MapReduce: From Elementary Circuits to Cloud	1
Răzvan Andonie, Mihaela Malița, and Gheorghe M. Ștefan	
On the Helmholtz Principle for Data Mining	15
Alexander Balinsky, Helen Balinsky, and Steven Simske	
A Method of Introducing Weights into OWA Operators and Other Symmetric Functions	37
Gleb Beliakov	
Uncertainty Management: Probability, Possibility, Entropy, and Other Paradigms	53
Bernadette Bouchon-Meunier	
Relationships Between Fuzziness, Partial Truth, and Probability in the Case of Repetitive Events	61
Jozo Dujmović	
Using Extended Tree Kernel to Recognize Metalanguage in Text	71
Boris A. Galitsky	
Relationships Between Probability and Possibility Theories	97
Boris Kovalerchuk	
Modeling Extremal Events Is Not Easy: Why the Extreme Value Theorem Cannot Be As General As the Central Limit Theorem	123
Vladik Kreinovich, Hung T. Nguyen, Songsak Sriboonchitta, and Olga Kosheleva	
Information Quality and Uncertainty	135
Marie-Jeanne Lesot and Adrien Revault d'Allonnes	
Applying Anomalous Cluster Approach to Spatial Clustering	147
Susana Nascimento and Boris Mirkin	

Why Is Linear Quantile Regression Empirically Successful: A Possible Explanation	159
Hung T. Nguyen, Vladik Kreinovich, Olga Kosheleva, and Songsak Sriboonchitta	
A Rapid Soft Computing Approach to Dimensionality Reduction in Model Construction	169
Vesa A. Niskanen	
Physics of the Mind, Dynamic Logic, and Monotone Boolean functions	193
Leonid I. Perlovsky	
Fuzzy Arithmetic Type 1 with Horizontal Membership Functions	233
Andrzej Piegat and Marek Landowski	
Copula as a Bridge Between Probability Theory and Fuzzy Logic	251
Germano Resconi and Boris Kovalerchuk	
Note to the Polemics Surrounding the Second Gödel's Theorem.	273
Klimentij Samokhvalov	
Ontological Data Mining	277
Evgenii Vityaev and Boris Kovalerchuk	

Uncertainty Modeling

Dedicated to Professor Boris Kovalerchuk on his
Anniversary

Kreinovich, V. (Ed.)

2017, XIV, 292 p. 68 illus., 24 illus. in color., Hardcover

ISBN: 978-3-319-51051-4
