Koszul Algebras and Computations	1
Anna M. Bigatti and Emanuela De Negri	
1 Introduction	1
2 Presentation of Algebras.....	3
2.1 Some Families of Subalgebras Generated by Monomials	4
3 Quadratic and G-Quadratic Algebras	7
3.1 Generic Initial Ideals	11
4 Resolutions	14
4.1 Ideals with 2-Linear Resolution	15
5 Koszul Algebras and Hilbert Series	18
6 G-Quadratic and LG-Quadratic Algebras.....	22
7 Koszul Filtrations	27
8 Complete Intersection of Quadrics	31
9 Koszul Algebras in a Nutshell.....	38
Primary Decompositions	41
Irena Swanson and Eduardo Sáenz-de-Cabezón	
1 Computation of Primary Decompositions	41
1.1 Introduction to Primary Ideals and Primary Decompositions	42
1.2 Computing Radicals and Primary Decompositions.....	46
1.3 Computer Experiments: Using Macaulay2 to Obtain Primary Decompositions	50
2 Expanded Lectures on Binomial Ideals	52
2.1 Binomial Ideals in $S = k[X_1, \dots, X_n, X_1^{-1}, \dots, X_n^{-1}] =$ $k[X_1, \dots, X_n]_{X_1 \dots X_n}$	54
2.2 Associated Primes of Binomial Ideals Are Binomial	56
2.3 Primary Decomposition of Binomial Ideals.....	57
2.4 The Radical of a Binomial Ideal Is Binomial	60
3 Primary Decomposition in Algebraic Statistics	61
3.1 Conditional Independence	61
3.2 Intersection Axiom	64

3.3	A Version of the Hammersley-Clifford Theorem	66
3.4	Summary/Unification of Some Recent Papers	69
3.5	A Related Game	71
3.6	Binomial Edge Ideals with Macaulay2	72
3.7	A Short Excursion Into Networks Using Monomial Primary Decompositions	73
	Combinatorics and Algebra of Geometric Subdivision Operations	77
	Fateme Mohammadi and Volkmar Welker	
1	Introduction	77
2	Abstract and Geometric Simplicial Complexes	79
3	Subdivisions of Simplicial Complexes	80
3.1	Barycentric Subdivision	81
3.2	Edgewise Subdivision	81
3.3	Interval Subdivision	82
4	The Stanley-Reisner Ring	82
5	The f - and h -Vector Transformations	85
5.1	The f -Vector Transformation	85
5.2	The h -Vector Transformation	87
6	First Relations to Algebra	90
7	Few Subdivisions, Real Rootedness, Koszul and Veronese Algebras, Charney-Davis Conjecture	96
7.1	Barycentric Subdivision	96
7.2	Edgewise Subdivision	100
7.3	Interval Subdivision	103
7.4	Subdivisions and the Charney-Davis Conjecture	103
8	Few Subdivisions, Lefschetz Properties and Real Rootedness	105
8.1	Barycentric Subdivision	107
8.2	Edgewise Subdivision	110
8.3	Interval Subdivision	111
8.4	Lefschetz Properties and Real Rootedness	111
9	Many Subdivisions, Limit Behaviour	112
9.1	The f - and h -Vectors	112
9.2	Betti Numbers	114
10	Resolutions Supported on Subdivisions	116
10.1	Barycentric Subdivision	117
10.2	Edgewise Subdivision	118
10.3	Interval Subdivision	119
	References	123

Computations and Combinatorics in Commutative
Algebra

EACA School, Valladolid 2013

Bigatti, A.M.; Gimenez, P.; Sáenz-de-Cabezón, E. (Eds.)

2017, VIII, 127 p. 25 illus., 16 illus. in color., Softcover
