

Contents

Part I Time Stretch Imaging

1	Introduction	3
2	Time Stretch	7
2.1	Time Stretch Imaging	7
2.2	Cell Classification Using Time Stretch Imaging	9
2.3	Label-Free Phenotypic Screening	10
2.4	Warped Time Stretch for Data Compression	10

Part II Inspection and Vision

3	Nanometer-Resolved Imaging Vibrometer	15
3.1	Introduction	15
3.2	Experimental Demonstration	16
3.3	Theoretical Study of the Vibrometer Performance	18
3.4	Experimental Results	18
3.5	Conclusion	19
4	Three-Dimensional Ultrafast Laser Scanner	21
4.1	Introduction	21
4.2	Principle of Hybrid Dispersion Laser Scanner	22
4.3	Applications of Hybrid Dispersion Laser Scanner	23

Part III Biomedical Applications

5	Label-Free High-Throughput Phenotypic Screening	33
5.1	Introduction	33
5.2	Experimental Setup	35
5.3	Results and Discussion	38
5.4	Conclusion	41

6	Time Stretch Quantitative Phase Imaging	43
6.1	Background	43
6.2	Time Stretch Quantitative Phase Imaging	45
6.2.1	Overview	45
6.2.2	Imaging System	47
6.2.3	System Performance and Resolvable Points	49
6.2.4	Microfluidic Channel Design and Fabrication	49
6.2.5	Coherent Detection and Phase Extraction	51
6.2.6	Cell Transmittance Extraction	56
6.2.7	Image Reconstruction	57
6.3	Image Processing Pipeline	59
6.3.1	Feature Extraction	59
6.3.2	Multivariate Features Enabled by Sensor Fusion	61
6.3.3	System Calibration	63
6.4	Conclusion	63

Part IV Big Data and Artificial Intelligence

7	Big Data Acquisition and Processing in Real-Time	67
7.1	Introduction	67
7.2	Technical Description of the Acquisition System	68
7.3	Big Data Acquisition Results	70
7.4	Conclusion	71
8	Deep Learning and Classification	73
8.1	Background	73
8.2	Machine Learning	74
8.3	Applications	76
8.3.1	Blood Screening: Demonstration in Classification of <i>OT-II</i> and <i>SW-480</i> Cells	76
8.3.2	Biofuel: Demonstration in Algae Lipid Content Classification	77
8.4	Further Discussions in Machine Learning	80
8.4.1	Learning Curves	80
8.4.2	Principal Component Analysis (PCA)	80
8.4.3	Cross Validation	83
8.4.4	Computation Time	84
8.4.5	Data Cleaning	84
8.5	Conclusion	85

Part V Data Compression

9	Optical Data Compression in Time Stretch Imaging	89
9.1	Background	89
9.2	Warped Stretch Imaging	90
9.3	Optical Image Compression	91

9.4	Experimental Design and Results	95
9.5	Conclusion	99
10	Design of Warped Stretch Transform	101
10.1	Overview	101
10.2	Kernel Design	104
10.2.1	Spectral Resolution	106
10.2.2	Group Delay Profile Design	110
10.2.3	Simulation Model	114
10.2.4	Spectrograms	116
10.3	Discussion	116
10.4	Conclusion	118
11	Concluding Remarks and Future Work	121
	References	123
	Index	131

Artificial Intelligence in Label-free Microscopy

Biological Cell Classification by Time Stretch

Mahjoubfar, A.; Chen, C.L.; Jalali, B.

2017, XXXIII, 134 p. 52 illus. in color., Hardcover

ISBN: 978-3-319-51447-5
