1	Introduction	1
1.1	General Aspects of Switching in Power Grids	2
1.2	Switchgear Requirements	4
1.3	General Design of a Power Switching Device	5
1.4	Stresses on Switching Equipment	6
1.4.1	Mechanical Stresses	6
1.4.2	Thermal Stresses	7
1.4.3	Dielectric Stresses	7
1.5	Types of Switching Components in Power Networks	8
1.6	Outline of the Book	10
2	Current Interruption Basics	13
2.1	A Phenomenological Description of Current Interruption in an AC Power System	13
2.1.1	Contact Separation and Switching Arc	13
2.1.2	Recovery Voltage	17
2.2	Switching Arcs	18
2.2.1	Arc Initiation	18
2.2.2	Charge Carriers Balance	20
2.2.3	Ionisation Mechanisms	20
2.2.4	Charge Carrier Dynamics	26
2.3	High Pressure Switching Arc	29
2.3.1	Static Arc Characteristic	30
2.3.2	Heat Transport in Electric Arcs	34
2.3.3	Temperature Distribution in an Electric Arc Column	37
2.3.4	Dynamic Arcs	38
2.4	Low Pressure (Vacuum) Switching Arc	40
2.5	Modeling of Switching Arcs	44
2.5.1	Detailed Physical Models	44

2.5.2	Qualitative Physical Models	47
2.5.3	Black Box Models	48

3	Application of Switching Devices in Power Networks	59
3.1	Interruption of Short Circuit Currents	59
3.1.1	Short Circuit Currents	60
3.1.2	Recovery Voltage	63
3.1.3	Stresses During Short Circuit Current Interruption from a Testing Perspective	84
3.1.4	Test Methods	86
3.2	Closing Under Fault Condition (Making of Short Circuit)	92
3.2.1	Making Under Short Circuit from a Testing Perspective	95
3.2.2	Test Methods	96
3.3	Energization of Loads	97
3.3.1	Energizing a Transmission Line	98
3.3.2	Energizing a Capacitor Bank	100
3.3.3	Energizing of a No Load Transformer	102
3.3.4	Synchronized Closing	103
3.4	Interruption of Load Currents	104
3.4.1	Interruption of Inductive–Resistive Currents	105
3.4.2	Interruption of Capacitive Currents	108
3.4.3	Interruption of Small Inductive Currents	112
	Exercises	123

4	Current Interruption Technologies	135
4.1	High Voltage Substations	135
4.1.1	Introduction	135
4.1.2	Configurations	136
4.1.3	Air Insulated Substations (AIS)	139
4.1.4	Gas Insulated Substations (GIS)	140
4.1.5	Distribution Level Substations	143
4.2	Interrupting Media	144
4.2.1	Desired Properties	144
4.2.2	Sulphur Hexafluoride (SF ₆)	145
4.2.3	Air/Nitrogen	147
4.2.4	Oil	147
4.2.5	Vacuum	149
4.3	Transmission Level Circuit Breakers	151

4.3.1	Technologies	151
4.3.2	Air Blast Circuit Breakers	153
4.3.3	Minimum Oil Circuit Breakers	155
4.3.4	SF ₆ Circuit Breakers	159
4.4	Distribution Level Switchgear	164
4.4.1	Load Break Switches	165
4.4.2	High Voltage Fuses	166
4.4.3	Interaction Between Fuse and Load Break Switch	172
4.4.4	Circuit Breakers with SF ₆ , Oil and Air as the Interrupting Medium	174
4.4.5	Vacuum Interrupters	176
4.5	Summary	182
