

Contents

1	From Natural to Synthetic Swarms	1
1.1	Natural Swarm Intelligence	2
1.1.1	Glowworm Swarms	2
1.1.2	Ant Colonies	6
1.1.3	Honeybee Swarms	6
1.1.4	Fish Schools and Shoals	7
1.1.5	Bird Flocks	7
1.2	Synthetic Swarm Intelligence	8
1.2.1	Ant Colony Optimization	8
1.2.2	Particle Swarm Optimization	10
1.2.3	The Bees Algorithm	11
1.3	Glowworm Swarm Optimization	11
1.3.1	Basic Principle of GSO	12
1.3.2	Multimodal Function Optimization	13
1.3.3	Multiple Source Localization	15
1.3.4	GSO for Multi-agent Rendezvous	17
1.4	Summary	18
1.5	Thought and Computer Exercises	18
2	Glowworm Swarm Optimization: Algorithm Development	21
2.1	The Glowworm Swarm Optimization (GSO) Algorithm	21
2.1.1	Algorithm Description	23
2.1.2	Evolving Graph Architecture of GSO	26
2.1.3	Leapfrogging Behavior Enables Local Search	29
2.2	Evolution of GSO	30
2.3	Convergence Results	32
2.4	Simulation Experiments to Illustrate GSO	34
2.4.1	Simulation Experiment 1: Constant Local-Decision Domain Range	35
2.4.2	Simulation Experiment 2: Adaptive Local-Decision Domain Range	36

2.4.3	Simulation Experiment 3: Effect of Presence of Forbidden Region	36
2.4.4	Effect of Step-Size on Convergence	40
2.5	Comparison of GSO with ACO and PSO	41
2.5.1	ACO and GSO	42
2.5.2	PSO and GSO	43
2.6	Summary	47
2.7	Thought and Computer Exercises	47
3	Theoretical Foundations	57
3.1	Characterization of Swarming Behavior	57
3.1.1	Splitting of the Glowworm Swarm into Subgroups	57
3.1.2	Local Convergence of Agents in Each Subgroup to the Peak Locations	62
3.2	Theoretical Framework for a Simplified GSO Model	64
3.2.1	Notations	66
3.2.2	Assumptions	67
3.2.3	GSO Model for Analysis	67
3.3	Main Results: Constant Luciferin Case	70
3.4	Results for the Variable Luciferin Case	77
3.5	Simulations on Simplified GSO Model	82
3.5.1	Simulation Experiment 1: Isolated Leader	82
3.5.2	Simulation Experiment 2: Non-isolated and Non-overlapping Leader Neighborhoods	83
3.5.3	Simulation Experiment 3: Overlapping Leader Neighborhoods	86
3.5.4	Simulation Experiment 4: Random Placement of Agents	88
3.6	Summary	88
3.7	Thought and Computer Exercises	89
4	Multimodal Function Optimization	91
4.1	Multimodal Test Functions	91
4.2	Performance Measures	102
4.3	Simulation Experiment Results	103
4.3.1	Tests on the Rastrigin's Function	103
4.3.2	Tests on the Circles Function	104
4.3.3	Tests on the Staircase Function	105
4.3.4	Tests on the Plateaus Function	105
4.3.5	Tests on the Schwefel's Function	108
4.3.6	Tests on the Griewangk's Function	108
4.3.7	Tests on the Ackley's Function	109
4.3.8	Tests on the Langerman's Function	110
4.3.9	Tests on the Michalewicz's Function	110

4.3.10	Tests on the Drop Wave Function	111
4.3.11	Tests on the Shubert's Function	112
4.3.12	Tests on the Fifth Function of de Jong	113
4.4	Parameter Selection and Performance Evaluation	113
4.4.1	Effect of n and r_s on Algorithmic Performance	114
4.4.2	Fixed Algorithm Parameters	116
4.5	Tests in Higher Dimensional Spaces	117
4.6	Experimental Comparison Between PSO and GSO	119
4.7	Performance in the Presence of Noise	123
4.7.1	Modelling of Measurement Noise	123
4.7.2	Simulation Experiments	126
4.8	Summary	127
4.9	Thought and Computer Exercises	128
5	Experiments Using Physical Simulations and Real Robots	133
5.1	Physical Simulations	134
5.1.1	GSO Variant for Physical Simulations	134
5.1.2	Experiments	136
5.2	Glowworms: Multi-robot Platform	140
5.3	Sound Source Localization	142
5.3.1	Luciferin Glow/Reception	142
5.3.2	Relative Localization of Neighbors	142
5.3.3	Physical Experiments	142
5.4	Light Source Localization	145
5.4.1	Luciferin Glow/Reception	145
5.4.2	Relative Localization of Neighbors	146
5.4.3	Physical Experiments	147
5.5	Summary	154
5.6	Thought and Computer Exercises	154
6	Applications to Ubiquitous Computing Environments	157
6.1	Ubiquitous Computing Based Environments	158
6.2	Heterogeneous Agent Swarms	158
6.2.1	GSO Variant for Heterogeneous Agent Swarms	159
6.2.2	Theoretical Expressions for Agents' Luciferin Levels	161
6.3	Simulation Experiments	162
6.3.1	Simulation Experiment 1: Effect of Assortment Ratio on Number of Captured Signal Sources	163
6.3.2	Simulation Experiment 2: Assortment Ratios for Capturing all Sources	165
6.3.3	Simulation Experiment 3: Pre-defined Deployment of Mobile Agents	166
6.3.4	Simulation Experiment 4: Deployment of Stationary Agents in a Uniform Grid	173

6.4	Summary	179
6.5	Thought and Computer Exercises	180
7	Pursuit of Multiple Mobile Signal Sources	183
7.1	Group Hunting in Natural World	183
7.2	GSO Framework for Moving Sources	184
7.3	Simulation Experiment Results	188
7.3.1	Simulation Experiment 1: Single Source Moving in a Circular Trajectory with Constant Angular Speed	189
7.3.2	Simulation Experiment 2: Two Sources Moving in Two Overlapping Circular Trajectories	191
7.3.3	Simulation Experiment 3: Two Sources Moving in Concentric Circular Trajectories	195
7.3.4	Simulation Experiment 4: Two Sources Moving Randomly About Nominal Concentric Circular Trajectories	197
7.4	Summary	199
7.5	Thought and Computer Exercises	200
8	GSO Applications and Extensions	203
8.1	Multiple Source Localization and Boundary Mapping	203
8.2	Wireless Sensor Networks	207
8.3	Clustering	209
8.3.1	CGSO	209
8.3.2	GSO for Self-organized Clustering	210
8.4	Knapsack Problem	211
8.5	Numerical Integration	212
8.6	Fixed Point Equations	213
8.7	System of Nonlinear Equations	215
8.8	Engineering Design Optimization	217
8.8.1	Active Vibration Control of Smart Structures	217
8.8.2	Composite Laminates Buckling Load Maximization	217
8.9	Variants of GSO	218
8.9.1	GSO-v1, GSO-v2, and GSO-Group	218
8.9.2	Variable Step Size (V-GSO) and Self-exploration (E-GSO)	219
8.9.3	Multi-population GSO (MPGSO)	220
8.9.4	Definite Updating Search Domains (GSO-D)	220
8.9.5	Bioluminescent Swarm Optimization Algorithm (BSO)	221
8.10	Thought and Computer Exercises	221

Appendix A: GSO Code in MATLAB. 225

Appendix B: GSO Code in C++. 229

Appendix C: Useful Links 235
