

Contents

Part I Bioactive Sources: Plants, Mushrooms and Fungi

1 Glucosinolates and Respective Derivatives (Isothiocyanates) from Plants	3
Kyriaki G. Zinoviadou and Charis M. Galanakis	
2 Bioactives from Mushroom and Their Application	23
Carmen Sánchez	
3 Bioactive Products from Fungi	59
Sergio Sanchez and Arnold L. Demain	

Part II Extraction Technologies for Bioactives

4 Process Development for Bioactive Peptide Production	91
Govind Kumar Gnasegaran, Dominic Agyei, Sharadwata Pan, Indira P. Sarethy, Caleb Acquah and Michael K. Danquah	
5 Comparison of Natural Extraction and Recombinant Mussel Adhesive Proteins Approaches	111
J.J. Castillo, B.K. Shanbhag and L. He	
6 Extraction of Lipids and Carotenoids from Algal Sources	137
Adarsha Gupta, Avinesh R. Byreddy and Munish Puri	
7 Magnetic Particles for Microalgae Separation and Biotechnology	153
Ivo Safarik, Kristyna Pospiskova, Eva Baldikova and Mirka Safarikova	
8 Enzyme-Assisted Extraction of Bioactives	171
Sandesh J. Marathe, Swati B. Jadhav, Sandip B. Bankar and Rekha S. Singhal	

Part III Techniques Employed for the Bioactives Delivery

- 9 Emerging Technologies for Bioactive Applications in Foods 205**
Liliana G. Santiago, Carlos R. Soccol and Guillermo R. Castro
- 10 Emerging Technologies of Hydrogels in Bioactive
Compounds Delivery 227**
Maria Henriques L. Ribeiro

Part IV Therapeutic Role in Treating Diseases

- 11 Neurocognitive Improvement Through Plant Food Bioactives: A
Particular Approach to Alzheimer's Disease 267**
Natália Martins and Isabel C.F.R. Ferreira
- 12 Multifunctional Bioactives for Cancer Therapy: Emerging
Nanosized Delivery Systems 299**
Deepika Sharma, Monica Nijhawan and Munish Puri
- Index 325**

Food Bioactives

Extraction and Biotechnology Applications

Puri, M. (Ed.)

2017, XVI, 326 p. 41 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-51637-0
